

THE GREAT AMERICAN HOME!

ENTHUSIASM

IS AT HIGH PITCH IN THIS FINAL PRICE

BREAK SALE

SAVINGS ARE A THIRD, A HALF AND EVEN MORE.

- Men's \$7.50 Palm Beach Suits. Final Break price **\$4.85**
- Women's \$2.50 and \$3 low Shoes. Final Break price **1.67**
- Women's \$1.50 White Canvas Low Shoes. Final Break price **95c**
- Women's \$2.50 and \$3.00 High Top Canvas Shoes. Final Break price **\$1.95**
- Boys' \$2.00 Russian Calf Oxfords. Final Break price **\$1.50**
- Men's \$4.00 Russian Calf, Gun-Metal and Vici Kid Oxfords. Final Break price **\$2.85**
- Choose any Men's Straw Sailor Hat in the house **50c**
- Men's \$4 Panama Hats. Final Break price **\$2.00**
- Women's \$10 and \$12 Summer Dresses. Final Break price **\$4.50**
- Women's up to \$6 Summer Dresses. Final Break price **2.47**
- Up to \$2.00 Children's Gingham Dresses **69c**
- Up to \$2.50 Women's White Wash Skirts **\$1.67**
- Women's \$1.50 White Lingerie Waists **93c**
- Women's \$1.50 Muslin Night Gowns **98c**

IN THE BARGAIN BASEMENT

- Mother's Oats, 10c
- California Evaporated Peaches, pound 15c
- Old Reliable Coffee, pound 27c
- Quart jar Sour Pickles, 18c
- Early June Peas, 25c
- 25-lb. bag Cane Granulated Sugar, per bag 2.40

SIX FAIRMONTERS TO SECOND CAMP

List of Those Who Will Train for Officers Is Announced.

CHARLESTON, Aug. 11—Lieutenant Colonel William Wallace late last night issued a list of West Virginians who were accepted for the second officers training camp. These men will report to Fort Benning, Harrison on August 26. The list of accepted men follows:

- Fairmont—Henry J. Orin, Arthur R. Varner, Lawrence M. Cunningham, William L. Doolittle, George S. Martin, Odell P. McKinney
- Charleston—George R. Angotter, William T. Burdette, John P. Bishop, George P. Colner, John W. Campbell, Robert N. Calvert, Edward T. Donald, Thomas J. Dougherty, John C. Donnelly, David Davis, Marion C. Dusenberry, Roy H. Evans, David H. Estill, Fleming B. Fowler, Augustus K. Flynn, Hunter G. Green, Bernard B. James, Raymond A. Lee, Cameron C. Lewis, III, Mortimer J. McChesney, Nelsen-Lange, James A. Nutter, John M. Orth, Joseph J. Ruitner, John V. Ray, Irwin B. Schawbe, George P. Stacy, John L. Vandergrift
- Huntington—Arthur B. Altizer, Carlisle G. Adams, Joseph E. Briscoe, Ernest J. Bader, Charles H. Coffin, Elmer W. Cummings, William E. Lowlace, Samuel E. Love, Emmet K. McCormick, Otto A. Myers, Roy J. Moorehouse, Edgar C. Quisenberry, Harry R. Swan, Lisle C. Stahl, Robert C. Thurmond, John C. Todd
- Wheeling—Thomas McK. Cummins, Paul B. Cunningham, Thomas R. Fagan, Lawrence W. Franzheim, Samuel O. Laughlin, Jr., Emerett V. Selby, Francis McP. Snider, Buckner Smith, Jr., Lee W. Swift, Alonzo E. Wheat, Roy E. Keller, Robert E. Bowls, Sidney C. Swift, Joseph R. Curl, Gratton—Harold D. Wilmoth, Herbert W. Dent, Elbert Jones
- Morgantown—Martin E. Rahl, Louis B. West, Richard E. Davis
- Clarksburg—Howard L. Robinson, Mortimer W. Smith, Jr., Charles Harrenbach, Neal M. Hefflin
- Ravenswood—Francis Morgan
- Moundsville—Louis R. Potts
- Martinsburg—John N. Carls
- Weston—Robert H. Prichard
- Williamsport—William M. Sheffield
- Indianapolis—Wendell W. Robinson
- Weston—Howard Segner, Edward C. Smith, Andrew Edmiston, Jr., Newburg—James H. Shaffer
- Wilkinson—James B. Sterrett
- White Sulphur Springs—Howard Templeton
- Wilcox—Aubrey H. Taber
- Ronceverte—Nathaniel B. Underwood, James M. Nickell
- Harrisville—Ralph D. Woods, Leonard W. Fidler
- Ansted—Eugene R. Vawter
- Weveaco—John P. West
- Bluefield—Henry F. Day, Charles M. Flynn, Spiller Hicks, James L. Hudson, Isaac Udy, Peter D. Woods, William B. Bond
- Parkersburg—Roscoe C. Alloman, Wilmer Blackburn, George W. Hebble

Food Preserved By Sauer Kraut Method Is Extremely Healthful

(Special Dispatch to West Virginian.)

WASHINGTON, D. C., Aug. 10.—Now is the time to make sauerkraut, say officials of the United States Department of Agriculture. Tremendous rainfall throughout the country has resulted in an enormous cabbage crop. Nine out of every 10 pounds of cabbage is water. Lack of rain last year sent the price of cabbage from \$2 and \$5 a ton to \$100 and \$200.

One million dollars worth of last year's crop of cabbage was made into sauerkraut, but even so there was such a shortage of this valuable food material that the price rose from \$3.50 a barrel to \$35.

The ancient art of pickling or fermenting food, as a cheap and simple means of preserving it in large quantities, is highly endorsed by the department's experts. On account of the great development of canning industries, this healthful method of food preservation has been lost sight of in recent years in the individual homes, but it now offers a safe and sane method of caring for the perishable products coming out to the market in quantities too great for immediate consumption.

The advantages of this method of food conservation, say the department's officials, are that it is simple, requires little labor, practically no outlay, and takes care of food in larger quantities. The method also lends variety to the home menu. The ferment which develops in the food is thought by some to have a beneficial effect on the health. It is the same acid that develops in sour milk, which has had such a wide vogue as a healthful beverage. To a certain kind of pickle, fermented by the sauerkraut process, was ascribed the good health of Japanese soldiers during the Russo-Japanese war. Uncle Sam has been quick to appreciate the value of fermented food in the diet of soldiers, and has ordered large quantities of cucumber pickles, sauerkraut, etc. Not only cabbage, cucumbers and beets can be very successfully preserved by this process, but string beans, beet tops, turnip tops and other food materials which would otherwise go to waste.

Fermentation of vegetables is successful either in Northern or Southern states. Full information will be sent by the department to anyone wishing full details regarding the method.

To Preserve Cucumbers and String Beans

Containers: Cider or wine barrels, kegs, tubs, or crocks. (Do not use any made of yellow or pitch pine.)

Wash your vegetables. Remove strings from string beans.

Place on bottom of container a layer of dill and a handful of mixed spices.

Pack the vegetables into the container. When half full, add another layer of dill and spice.

When almost full add another. When contents come to within a few inches of top, add a layer, 1 inch thick, of beet tops or grape leaves.

Press down with a clean board, weighted with bricks or stone (not limestone or sandstone.)

Add brine to cover material. Allow it to ferment (in a warm place, from 5 days to 1 week; in a cool place, from 3 to 4 weeks.)

After bubbles cease to rise, exclude air by either of the following methods:

(1) Set the containers where they will not be disturbed. Cover surface with paraffin hot enough to make brine boil when poured upon it. If paraffin breaks, remove, remelt and replace.

(2) Pack the container as full as possible. Replace head.

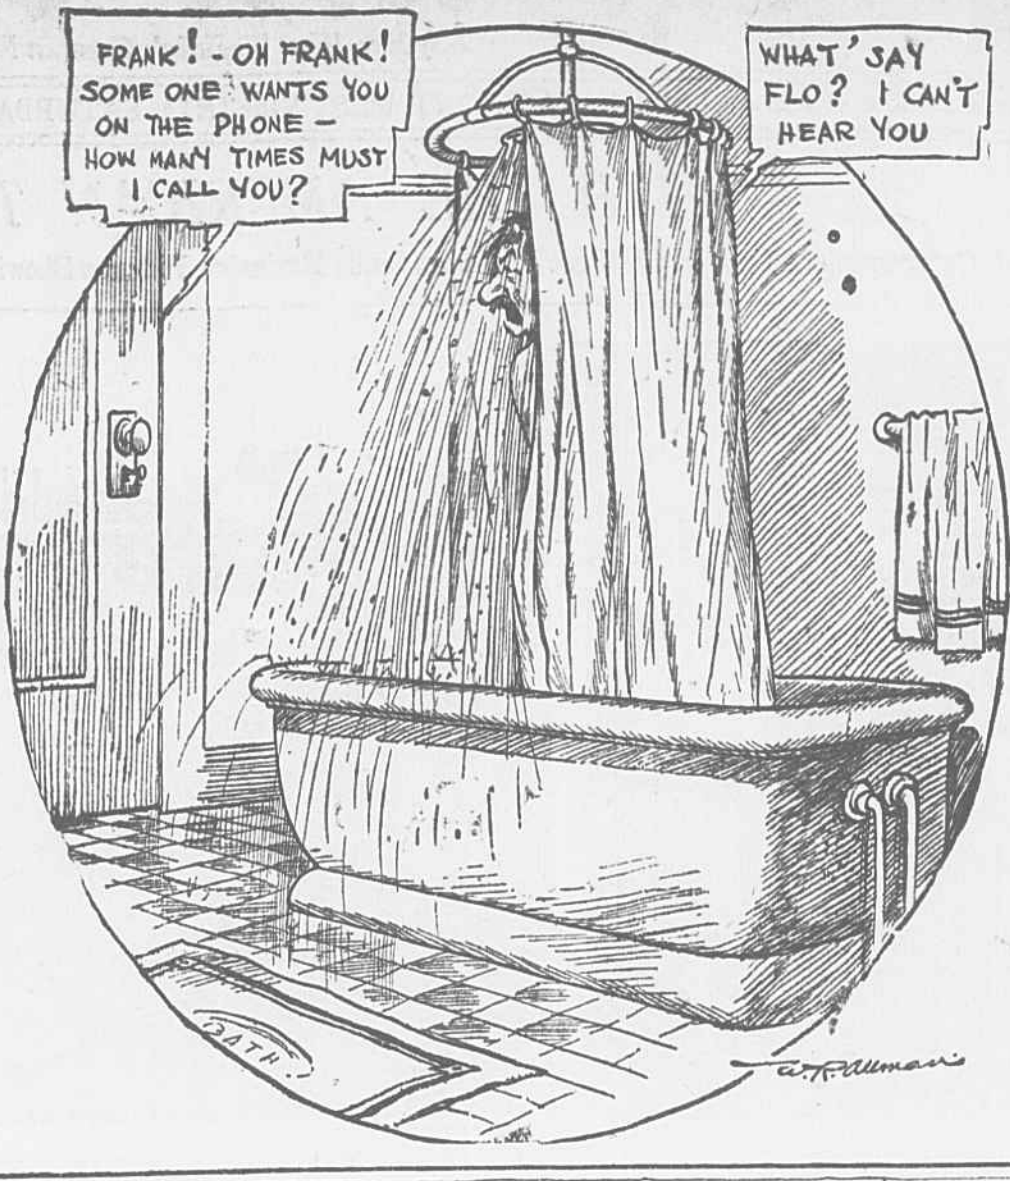

Allow to stand for 24 to 48 hours. Remove boards and weights. Head up container tight. Bore a 1-inch hole in head.

Fill container full with brine. Let stand until bubbles cease to rise.

Add more brine if possible. Plug vent tight. Store in a cool place.

To make brine: 1 pound salt. 10 quarts water.

To each 15 quarts of the brine add 1 quart of vinegar. DONT MISS ANY STEP.

Before we feed them to the Cows—

All men's straw hats—senate split and mackinaw straw

ANNOUNCE BIRTH. A son was born to Mr. and Mrs. Frank Vockrodt of New York this morning at Cook hospital. He has been named John Grey. Mr. and Mrs. Vockrodt had been here for several days for a visit with Mr. Vockrodt's mother and sister, Mrs. Anna Vockrodt and Miss Virginia Vockrodt, on Gaston avenue. The child is a great grandson of Mrs. Linnie Hall of city.

51 AUTOMOBILES NOW COST MORE

Former \$1200 to \$1400 Cars Advanced to Super-Six Price—Hudson Cost, Too, Must Soon Go Up.

Material costs have increased so much and so fast lately that all automobile prices must be advanced.

So far the Super-Six remains at the price it has sold at all this year. That is because present cars are built of materials contracted for last year before the biggest increase became effective.

Since January some car prices have been advanced twice. Increases run from \$200 to \$300 on cheaper cars than the Hudson, and from \$350 to \$700 on cars which sold above the Super-Six price.

Until Hudson prices must be advanced a Super-Six can be bought for about the same price as cars which recently sold at \$1200 to \$1400

Hudson Choice when others cost less

Even when such cars sold at \$200 to \$300 less than the Super-Six, its sales were greater than those of any makes of their class. Everyone who knows will choose a Hudson as against such cars now that there is so little difference in their cost. No material change has been made in design or construction. They are practically the same as when sold for much less than present prices.

Hudson leadership is understood by all motorists. All know the effectiveness of the Super-Six motor. No other car has or can have a motor like it. That is why no other car has ever equaled its records for endurance.

Almost 40,000 owners now drive Super-Sixes. They have made records that to many are quite as impressive as those made on the speedway and in contests which have been extensively advertised.

The Super-Six is a life-time car. Its great endurance is due to the smoothness of the Super-Six motor. It minimizes vibration. Vibration is the most destructive force in a motor. All Hudson tests show how minimizing vibration endurance is obtained.

The Super-Six is the most powerful automobile motor of its size known. By minimizing vibration most of the power is delivered and is not as with other types, consumed within the motor.

More Proof for Hudson

If you have followed Super-Six history you have been interested in each succeeding test and know it has called for greater and greater endurance. At first we did not know the limit of Hudson endurance. Then we felt we could rest content if the car would hold up in the one hour and the 100-mile trial. That was greater than other cars had done. But, the Super-Six showed no wear at the end of those runs. We wanted to know just what its true limits were so new tests were made.

Each succeeding trial was made harder in an effort to reveal the real limits of Super-Six endurance. No such test has yet been found.

Each Test More Trying

When there were no more revealing stock car tests to be made then special racing cars were built. The same principle which accounts for the endurance in stock cars was built into racing cars. On the speedway in competition with the fastest, most carefully built automobiles in the world, the Super-Six specials made records unequalled by any racing car in the history of racing.

In nine championship races twenty-two entries were made. All save one finished within the money; an accident forced that one car out.

Hudson specials won first in four events; second in six, third in two, fourth in three; fifth in three; sixth, seventh and eighth in one.

These records mean much to all who are familiar with the terrific strains encountered at high speeds. One hundred miles at racing-speed calls for greater endurance than a year of ordinary use.

Almost 40,000 Cars prove it

But, if these records do not mean so much to you then think of the almost 40,000 cars that individual owners are using. Recall what you must have heard in the way of praise for the Super-Six from those owners you know. The Super-Six is known in every community. You do not have to go far to find a Super-Six enthusiast. There is a Super-Six for every six miles of improved roadway in America.

Can there with such evidence as to Super-Six quality be any choice now when compared to cars that now sell in the Super-Six price class?

When there was a difference of \$200 to \$300 some did buy other cars because of the apparent saving. Now all must choose the Super-Six. Such preference will soon exhaust the supply of materials bought in last year's more favorable market. Then the price of the Super-Six must be advanced. Until that time judged by the standards of other cars in performance and price, the Super-Six is the best automobile value on the market.

But, you must not delay if you are to get a Super-Six at its present advantageous price.

CATALANO HELD FOR GRAND JURY

Defense Made Effort To Get Dependant Admitted To Bail.

Gioacchino Catalano, Pittsburgh Italian, representative of the Bollettino Della Sera, an Italian newspaper published in New York, who is charged with the murder of Melvin T. Daugherty last Sunday in the store of Dominick Demario at the corner of Madison and Quincy streets, was held for the action of the grand jury without bail at the preliminary hearing which was held before Justice Musgrove yesterday afternoon. The trial was well attended and eight witnesses for the state were examined.

Congressman M. M. Neely represented the prisoner while the interests of the state were looked after by Prosecuting Attorney Walter Haggerty. After the trial the prisoner was returned to the county jail to await the action of the grand jury.

The evidence as disclosed at the hearing points out the fact that the prisoner was injured in the quarrel which preceded the shooting and that when he was arrested he was bleeding about the face. With this as evidence the defense will base its argument on the grounds of self defense. No witnesses were examined by the defense yesterday as they contended them-

selves with trying to have the prisoner released on bond.

FOUR EXEMPTIONS

(Continued from Page One.)

of his mistake and was anxious to get into service for Uncle Sam. He passed the examination.

The other delinquent was Edgar H. Parker who has been located at Monongah and heard nothing of being drafted until yesterday. He appeared for examination, but being shy three fingers and one eye he was discharged.

The local board is hoping that there will be better spirit manifested among those that will appear for examination Monday. To these eighty young men the board has asked the press to print the following:

"If you pass the examination and have no adequate grounds for a discharge, do not make an application for one. If you do you will be refused, and you will bear the stigma of trying to be a slacker and to escape serving your country when your services are needed."

Monday the board will spend the entire day at the city hall giving the eighty young Fairmont men who are in the second call their physical examination. All who have been drafted in this second call must report at seven o'clock promptly.

GIRLS! MAKE A BEAUTY LOTION WITH LEMONS

At the cost of a small jar of ordinary cold cream one can prepare a full quarter pint of the most wonderful lemon skin softener and complexion beautifier, by squeezing the juice of two fresh lemons into a bottle containing three ounces of orchard white. Care should be taken to strain the juice through a fine cloth so no lemon pulp gets in, then this lotion will keep fresh for months. Every woman knows that lemon juice is used to bleach and remove such blemishes as freckles, allows sand tan and is the ideal skin softener, smoother and beautifier.

Just try it! Get three ounces of orchard white at any pharmacy and two lemons from the grocer and make up a quarter pint of this sweetly fragrant lemon lotion and massage it daily into the face, neck, arms and the hands. It should naturally help to whiten, soften, freshen and bring out the roses and beauty of any skin. It is truly marvelous to smoothen rough, red hands.
