TURKS SACK AN AMERICAN HOSPITAL

Is Act of War and Lists Turkey Among Our Enemies.

WASHINGTON, June 19.—Sacking of the American hospital at Tabriz, Persia and seizure of American and British consulates there by invading Turkish troops was reported to the State department today by the American minister at Teheran.
If the report as it reached the minister is officially confirmed the outrages may be considered an act of war and settle the long pending question of whether the Ottoman allies of Germany should be formally listed among America's enemies.
According to today's dispatch the Turks sacked the hospital over the protest of the Spanish consul in charge as the representative of American interests and in defiance of the Spanish flag flying over the building.

Judge Robinson and Edward Page Were Guest Today.

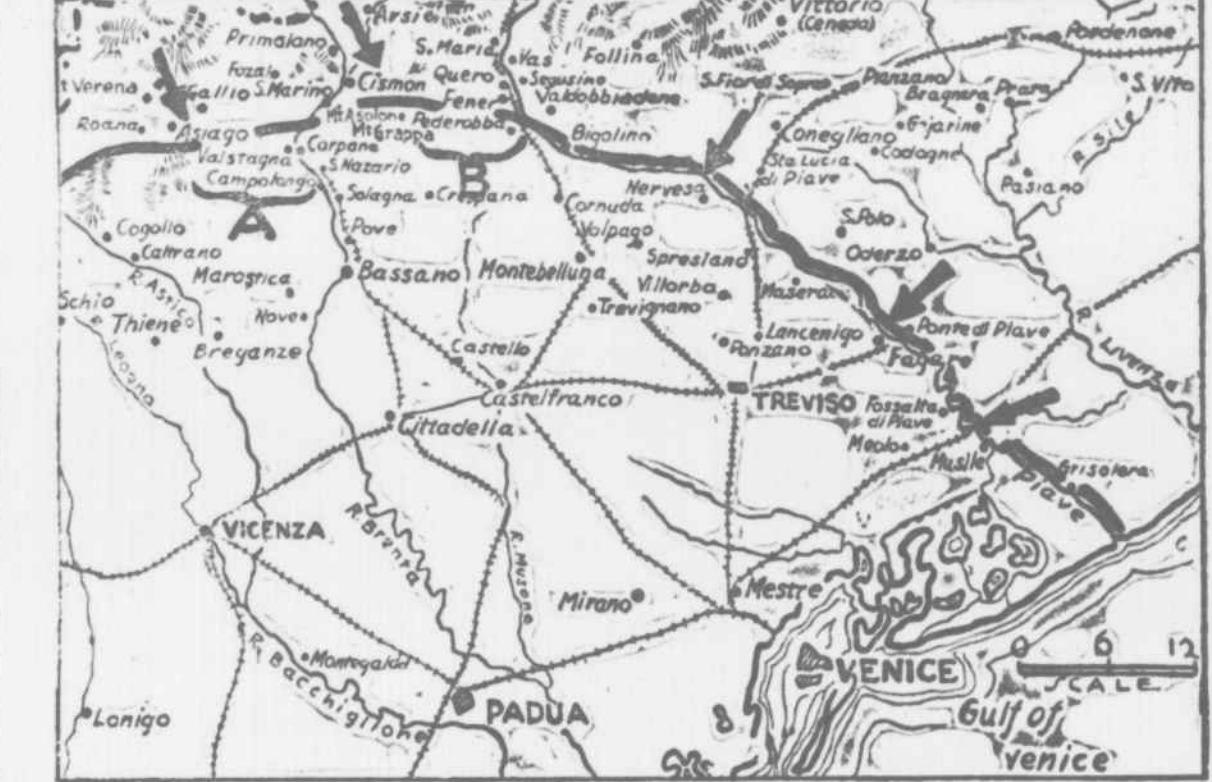

An interesting and well attended meeting of the Coal club was held at The Fairmont at noon today, at which time the present officers, including A. Brooks Fleming, president; Clarence D. Robinson, vice president and Brooks Hutchinson, secretary, were re-elected to serve for six months longer.

For the purpose of considering important coal problems which will be presented to local operators next week, and which will demand a longer business session than the regular weekly business session of the Coal club, a committee was appointed to arrange a special meeting for some night next week at the Country club, which will take the place of next Wednesday's luncheon. The committee consists of President Brooks Fleming assisted by George DeBolt, S. D. Brady and C. H. Jenkins. It was suggested by Mr. DeBolt that in the future it might be well to have evening meetings from time to time, giving the members more time to present and discuss coal problems which may come up.
Judge Ira E. Robinson of Grafton was a visitor at today's meeting of the Coal club and was the first speaker to be called upon. In a brief and interesting manner he emphasized the great resources of the Monongahela Valley and the important part the coal operators of this region are taking in the world struggle.
Edward Page, vice president of the New England Fuel and Transportation Company, attended the meeting and was called upon to speak. He told of the fuel shortage in the New England states during the past winter, stating that many schools were closed for as long as two months, stores were closed early, and of many other vital fuel saving necessities. He spoke optimistically of the fuel supply for the coming winter, showing the gradual increase in the percentage of coal received from month to month. During the month of April only sixty per cent of their allotment
