ALL BY THE BEST AUTHORITIES

Address all orders to The Ranch, Seattle.

VETERINARY STOCK.

The Farmer's Veterinary Adviser.

By Prof. James Law. A guide to the prevention and treatment of diseases in domestic animals. This is one of the best works on this subject, and is especially designed to supply the need of the busy American farmer, who can rarely avail himself of the advice of a scientific veterinarian. It is brought up to date and treats of the prevention of disease as well as of the remedies. Cloth, 8vo. \$3.00

Dadd's American Cattle Doctor.

By George H. Dadd, V. S., twenty-five years a leading veterinary surgeon in England and the United States, and author of the "American Reformed Horse Book." A complete work on all the diseases of cattle, sheep and swine, including every disease peculiar to America, and embracing all the latest information on the cattle plague and trichina; containing also a guide to symptoms, a table of weights and measures and a list of valuable medicines. Cloth, 8vo. Illustrated. 2.00

Animal Castration.

By A. Liautard, V. S. A concise and practical treatise on the castration of the domestic animals. Illustrated with 44 cuts. Cloth, 12mo. \$2.00

SHEEP AND SWINE.

Home Pork Making.

The art of raising and curing pork on the farm. A complete guide for the farmer, the country butcher and the suburban dweller, in all that pertains to hog slaughtering, curing, preserving and storing pork product—from scalding vat to kitchen table and dining room. By A. W. Fulton, commercial editor American Agriculturist and Orange Judd Farmer, assisted by pork specialists in the United States and England. There are chapters on pork making on the farm, finishing off hogs for bacon, slaughtering, scalding and scraping, dressing and cutting, what to do with the offal, the fine points in making lard, pickling and barreling, care of hams and shoulders, dry salting bacon and sides, smoking and smokehouses, keeping bacon and hams, side lights on pork making, packing house cuts of pork, magnitude of the swine industry, and discovering the merits of roast pig. The many recipes for cooking and serving pork are the favorite dishes of the best cooks. Flexible cover, 12mo. 50

Stewart's Shepherd's Manual.

By Henry Stewart. A valuable practical treatise on the sheep for American farmers and sheep growers. It is so plain that a farmer or a farmer's son, who has never kept a sheep, may learn from its pages how to manage a flock successfully, and yet so complete that even the experienced shepherd may gather many suggestions from it. The result of personal experience of some years with the characters of the various modern breeds of sheep, and the sheep raising capabilities of many portions of our extensive territory and that of Canada—and the careful study of the diseases to which our sheep are chiefly subject, with those by which they may eventually be afflicted through unforeseen accidents—as well as the methods of management called for under our circumstances, are here gathered. Illustrated. Cloth, 12mo. \$1.00

Harris on the Pig.

By Joseph Harris. The points of the various English and American breeds are thoroughly discussed, and the great advantage of using thoroughbred males clearly shown. The work is equally valuable to the farmer who keeps but few pigs, and to the breeder on an extensive scale. Illustrated. Cloth, 12mo. \$1.00

Coburn's Swine Husbandry.

By F. D. Coburn. New, revised and enlarged. The breeding, rearing and management of swine, and the prevention and treatment of their diseases. It is the fullest and freshest compendium relating to swine breeding yet offered. Cloth, 12mo. \$1.50

Diseases of Swine.

By D. McIntosh, V. S. A text-book for swine growers, veterinary surgeons and students. This is the first work exclusively devoted to the subject published in America. The subjects dealt with are based on science and confirmed by experience, so that the reader will not have to lose time in reading theories which are not confirmed by facts. In the treatment of hog cholera and other diseases which in the majority of cases prove fatal, the author's original and extensive investigations have thrown considerable light on many points hitherto but little understood. Cloth, 230 pages. 12mo. Illustrated. \$2.00

HORSES.

Youatt and Spooner on the Horse.

By Hon. Henry S. Randall. The structure and diseases of the horse, remedies, rules to buyers, breakers, shoers, etc. Youatt's work somewhat simplified and brought down by W. C. Spooner, M. R. C. V. S.; to which is prefixed an account of the breeds in the United States and Canada. Illustrated by numerous engravings. 12mo. \$1.00

The Practical Horseshoer.

This work treats of and illustrates proper shape of shoes for different diseases of the feet, the various methods of shoeing vicious and ugly horses and mules, and a great variety of tools suitable and useful in horse shoeing; how to shoe horses to cure contraction, to prevent interfering or overreaching, best method of treating corns—whether cold or hot fitting is best, etc. Cloth, 12mo. 1.00

Riley on the Mule.

By Harvey Riley. A treatise on the feeding and training of the mule, and the uses to which he may be put. With 14 illustrations. Cloth, 12mo. 1.00

Sander's Horse Breeding.

By J. H. Sanders. Being the general principles of heredity applied to the business of breeding horses and the management of stallions, brood mares and foals. The book embraces all that the breeder should know in regard to the selection of stock, management of the stallion, brood mare and foal, and treatment of diseases peculiar to breeding animals. Cloth, 12mo. 1.50

ABOUT THE FARM.

Barn Plans and Outbuildings.

Two hundred and fifty-seven illustrations. A most valuable work, full of ideas, hints, suggestions, plans, etc., for the construction of barns and outbuildings by practical writers. Chapters are devoted to the barns, house barns, cattle barns, sheep barns, corn houses, smoke houses, ice houses, pig pens, granaries, etc. There are likewise chapters upon bird houses, dog houses, tool sheds, ventilators, roofs and roofing, doors and fastenings, workshops, poultry houses, manure sheds, barn yards, root pits, etc. Cloth, 12mo. \$1.00

How to Build a Home.

By C. F. Moore. This book deals thoroughly with the practical building of a house, giving suggestions as to safety from fire, safety of health, convenience, durability and comfort. It contains specimen contract, specifications and plans, and its study will save omissions and "extras." The author has spent several years in preparing the volume and many authorities among builders and contractors have been consulted in its preparation. Bound in unique wood covers. 158 pp., 12mo. \$1.00

The Secrets of Health, or How Not to be Sick and How to Get Well from Sickness.

By S. H. Platt, A. M., M. D., late member of the Connecticut Eclectic Medical Society, the National Eclectic Medical Association and honorary member of the National Bacteriological Society of America; our medical editor and author of "Talks with Our Doctor" and "Our Health Adviser." Nearly 600 pages. Profusely illustrated. An index of 20 pages, so that any topic may be instantly consulted. A new departure in medical knowledge for the people—the latest progress, secrets and practices of our schools of healing made available for the common people—health without medicine, nature without humbug, common sense without folly, science without fraud. Cloth, 12mo, 576 pp., 81 illustrations. \$1.50

Land Draining.

By Manly Miles. On the principles of draining, giving the results of his extended experience in laying tile drains. The directions for the laying out and the construction of tile drains will enable the farmer to avoid the errors of imperfect construction and the disappointment that must necessarily follow. Cloth, 12mo. \$1.00

Root's A. B. C. of Bee Culture.

By A. I. Root. A cyclopedia of matters pertaining to the honey bee, bees, honey, hives, implements, honey plants, etc., etc. Cloth. Large octavo. \$1.25

The A B C of Potato Culture.

By W. B. Terry. How to grow potatoes in the largest quantities and in the finest time and labor. 35 cents.

The Ice Crop.

By Theron L. Hiles. How to harvest, ship and use ice. A complete, practical treatise for farmers, dairymen, ice dealers, produce shippers, meat packers, cold storers and all interested in ice houses, cold storage and the handling and use of ice in any way. Including many receipts for iced

dishes and beverages. The book is illustrated by cuts of the tools and machinery used in cutting and storing ice, and the different forms of ice houses and cold storage buildings. 122pp., ill., cloth, 16mo. \$1.00.

The Hop.

Its culture and cure, marketing and manufacture. By Herbert Myrick, assisted by practical experts in successful hop culture in America, England and Europe, dealers in hops and manufacturers, and specialists in the sciences. A practical handbook on the most approved methods of growing, harvesting, curing and selling hops, and on the use and manufacture of hops. The result of years of research and observation. It is a volume destined to be an authority on this crop for many years to come. It takes up every detail, from preparing the soil and laying out the yard to curing and selling the crop. Every line represents the ripest judgment and experience of experts. Size, 5x8 inches; pages, 300; illustrations, nearly 150; bound in cloth and gold. \$1.50. Ginseng, its Cultivation, Harvesting, Mar-

Silos, Ensilage and Silage.

By Manly Miles, M. D., F. R. M. S. A practical treatise on the ensilage of fodder corn. Containing the most recent and authentic information on this important subject. Illustrated. Cloth, 12mo. 50 cents.

Forage Crops

other than grasses. How to cultivate, harvest and use them. By Thomas Shaw, professor of animal husbandry at the University of Minnesota. A new work embodying the author's long, successful experience, and the results of all science and practice in growing and feeding forage crops. "It will work a revolution in animal husbandry." Illustrated. Cloth, 12mo about 300 pages. \$1.00

Farm Appliances.

Describing numerous useful and labor-saving appliances, and will be found of great value in every department of farm work. With nearly 200 illustrations. 50

Fences, Gates and Bridges.

A much-needed and valuable work. The descriptions are abundantly illustrated. The book also contains a synopsis of the fence laws of the different states. Over 100 engravings. Cloth, 12mo. 50

Farm Conveniences.

A manual of what to do and how to do it. Describing all manner of home-made aids to farm work. Made up of the best ideas from the experience of many practical men. With over 200 engravings. 1.00

Irrigation Farming.

By Lucie Wilcox. A handbook for the practical application of water in the production of crops. A complete treatise on water supply, canal construction, reservoirs and ponds, pipes for irrigation purposes, ditches and their structure, methods of applying water, irrigation of field crops, the garden, the orchard and vineyard; windmills and pumps, appliances and contrivances. Profusely, handsomely illustrated. Cloth, 12mo. 1.50

The Fertility of the Land.

By I. P. Roberts. A summary sketch of the relationship of farm practice to the maintaining and increasing of the productivity of the soil. The book is the result of a long life of teaching, experimenting and farming, and is the most important single book of farm methods. Illustrated. 12mo. \$1.25

Practical Forestry.

By Andrew S. Fuller. A treatise on the propagation, planting and cultivation, with descriptions and the botanical and popular names of all the indigenous trees of the United States, and notes on a large number of the most valuable species. 1.50

Soils and Crops of the Farm.

By George E. Morrow, M. A., and Thomas F. Hunt. The methods of making available the plant food in the soil that are described in popular language. A short history of each of the farm crops is accompanied by a discussion of its culture. The useful discoveries of science are explained as applied in the most approved methods of culture. Illustrated. Cloth, 12mo. \$1.00

Celery for Profit.

By T. Greiner. The celery industry has recently been greatly increased, and this delicious vegetable is now found on nearly every table. The newer improved methods of culture are described in this volume. 20 cents.

The New Onion Culture.

By T. Greiner. By the process here described a crop of 2,000 bushels per acre can be as easily raised as 500 or 600 bushels in the old way. Paper, 12mo. 50 cents.

Asparagus Culture.

By James Barnes and William Robinson, F. L. S. The best methods employed in England and France. With translation of Mr. Lobouff's Essay on Asparagus, and particulars of the seven years' competition instituted for its improvement. 50 cents.

Maple Sugar and Sugar Bush.

By Prof. A. J. Cook. The name of the author is enough of itself to recommend any book to almost any people, but this one on maple sugar is written in Prof. Cook's highest style. All the difficult points in regard to making the very best quality of maple syrup and maple sugar are very fully explained. All recent inventions in apparatus and methods of making this delicious product of the farm are fully described. Profusely illustrated. 35 cents.

Sugar Beet Seed.

A new book. How to grow the best seed of the most improved varieties. Full practical and scientific details, including the

secrets of the most famous European producers who have been in the business for 100 years. The only book on the subject; worth its weight in gold to any one thinking of going into what promises to be a lucrative specialty, as millions will be spent for sugar beet seed in the United States. The author, Lewis S. Ware, has devoted 20 years to this book. Cloth, postpaid. \$1.50.

The New Horticulture.

By H. A. Stringfellow. This book has attracted considerable attention because of the revolutionary cultural methods advocated. Any one wanting food for thought will find it here. \$1.00.

The Pruning Book.

By H. L. Bailey. This is the first American work exclusively devoted to pruning. It differs from most other treatises on this subject in that the author takes particular pains to explain the principles of each operation in every detail. Specific advice is given on the pruning of the various kinds of fruits and ornamental trees, shrubs and hedges. Considerable space is devoted to the pruning and training of grape vines, both American and foreign. Every part of the subject is made so clear and plain that it can be readily understood by even the merest beginner. Cloth, 8vo, 530 pages. Illustrated. \$1.50.

American Fruit Culturist.

By John T. Thomas. Containing practical directions for the propagation and culture of all the fruits adapted to the United States. Thoroughly revised and greatly enlarged edition by William H. S. Wood. This new edition makes the work practically almost a new book, containing everything pertaining to large and small fruits, as well as sub-tropical and tropical fruits. Richly illustrated by nearly 800 engravings. 158 pp., 12mo. \$2.50.

Fruit Culture for Profit.

By I. T. Quinn, practical horticulturist. Teaching how to raise pears intelligently and with the best results, how to find out the character of the soil, the best methods of preparing it, the best varieties to select under existing conditions, the best modes of planting, pruning, fertilizing, grafting and utilizing the ground before the trees come into bearing, and finally, of gathering and packing for market. Illustrated. Cloth, 12mo. \$1.00.

The Nut Culturist.

By Andrew S. Fuller. A treatise on the propagation, planting and cultivation of nut-bearing trees and shrubs adapted to the climate of the United States, with the scientific and common names of the fruits known in commerce as edible or otherwise useful nuts. Intended to aid the farmer to increase his income without adding to his expenses or labor. Cloth, 12mo. \$1.50.

Small Fruit Culturist.

By Andrew S. Fuller. The book covers the whole ground of propagating small fruits, their culture, varieties, packing for market, etc. It is very finely and thoroughly illustrated, and makes an admirable companion to "The Grape Culturist." Cloth, 12mo. \$1.00.

Grape Culturist.

By A. S. Fuller. This is one of the very best of books on the culture of the hardy grapes, with full directions for all departments of propagation, culture, etc., with 150 excellent engravings, illustrating planting, training, grafting, etc. Cloth, 12mo. \$1.50.

Peach Culture.

By Hon. J. Alexander Fulton. The best work on peach growing. It has been thoroughly revised and a large portion of it re-written, bringing it down to date. Cloth, 12mo. \$1.00.

Strawberry Culturist.

By Andrew S. Fuller. Containing all information necessary to enable everybody to raise their own strawberries. Fully illustrated. Flexible cloth, 12mo. 25 cents.

Cranberry Culture.

By Joseph J. White. Contents: Natural history, history of cultivation, choice of location, preparing the ground, planting the vines, management of meadows, flooding, enemies and difficulties overcome, picking, keeping, profit and loss. Cloth, 12mo. \$1.00.

The Spraying of Plants.

By E. G. Lodeman. A very timely book that can be safely recommended to all horticulturists and fruit growers. Cloth, 8vo. \$1.00.

Field Notes on Apple Culture.

By Prof. L. H. Bailey, Jr. A most useful and thoroughly practical book for orchardists. Cloth, 12mo. 75 cents.

Quince Culture.

By W. W. Meech. An illustrated handbook for the propagation and cultivation of the quince, with descriptions and varieties, insect enemies, diseases and their remedies. New and enlarged edition. Cloth, 12mo. \$1.00.

Bush Fruits.

By Prof. W. Card. A horticultural monograph of raspberries, blackberries, dewberries, currants, gooseberries and other shrub-like fruits. The entire subject is exhaustively treated from the commercial grower's standpoint, as well as for application in the home garden. The principles which underlie the cultivation and management of the various bush fruits are discussed in the introductory chapter, while in the succeeding ones each kind is treated in detail as to its special requirements of soil, location, fertilizers, propagation, planting, tillage, pruning, harvesting and marketing, evaporating, etc. One of the most important contributions to promological literature. 540 pages. \$1.50.
