

May Be Body of Lusitania Victim

London, July 19.—A body supposed to be that of Linden W. Bates, Jr., of New York, who lost his life on the Lusitania, has been washed ashore on the Limerick coast. A telegram from Consul Frost, at Queenstown, to Newton B. Knox, a friend of Bates, said a watch and cigarette case with Bates' monogram were found on the body. The measurements of the body also tally.

Columbia, July 19.—Many matters will be discussed at the annual meeting of the South Carolina State Farmers' union to be held in Columbia, July 28. The officers for the year will be elected and the next meeting place selected. J. Whitner Reid, secretary, is arranging the program for the convention.

M'PHERSON MAY DIE FROM WOUND

Solicitor Cooper Goes to Waterloo to Take Statement of Wounded Man.

Laurens, July 19.—Solicitor R. A. Cooper was asked to go to Waterloo township yesterday to take the statement of John K. McPherson, a well known citizen and substantial farmer, who is said to be in a critical condition as the result of a pistol wound which he received in his leg several days ago at the hands, it is alleged, of Will G. Martin, a neighbor. The bullet, of large calibre, passed through McPherson's left leg above the knee, shattering the bone. It is said. Up to Saturday night he appeared to be getting on very well, the wounded member having been placed in a plaster cast and the patient made as comfortable as possible. Today his condition is regarded as serious; hence the visit of the solicitor to the man's bedside. McPherson is about 50 years of age and has a large family.

THE COMMERCIAL GRADING OF CORN

Grades Fixed by Secretary of Agriculture Generally Adopted Throughout Country.

Washington, July 19.—The grades for commercial corn which were promulgated by the secretary of agriculture on January 3, 1914, and which went into effect on July 1, 1914, have been generally adopted throughout the corn belt and in the cities in that part of the United States and at the Gulf ports, but are not in use in the cities along the Atlantic seaboard. The grades include the classification of white, yellow and mixed corn into six grades and "sample" and have been recognized by the Grains Dealers' National association, the state associations affiliated with this organization, the state grain inspection departments of Washington, Minnesota, Illinois, Missouri, Kansas, Oklahoma, and the department of agriculture, commerce, and industries of the state of South Carolina.

In order that the producers, dealers and consumers throughout the United States may more fully understand the correct interpretation of the government corn grades, somewhat detailed explanations are given in the new bulletin of the United States department of agriculture, No. 168, grades for commercial corn. The classification which was made by the secretary and became effective July 1, 1914, divided commercial corn into 6 classes and "sample," the classification being based on the moisture content of the corn, the color, the amount of damage, foreign material and cracked corn. It also included 11 general rules for making this classification. Necessarily even with the definite limits for the most important factors, points will arise on which the best experts may differ. For this reason, the bulletin gives somewhat in detail methods of securing a representative sample from bulk corn, mixing samples for detailed analyses, the size of samples, sieves for screening, moisture tests, determining the amount of damage of corn, foreign material and cracked corn. It also includes a color plate which represents, as nearly as possible, the various types of kernels from the standpoint of color. This bulletin may be had free upon application to the United States Department of Agriculture, Washington, D. C., as long as the supply lasts.

For Hay Fever or Asthma. Many persons dread July on account of the recurrence of hay fever. Foley's Honey and Tar Compound long has been recognized as the ideal remedy for hay fever and asthma, because it heals and soothes that raw, rasping feeling in the throat and eases the choking sensation. It allays inflammation and irritation and brings about easy and natural breathing. Contains no habit-forming drugs. Evans Pharmacy.

BIG DECREASE IN FERTILIZER SALES

Over \$100,000 Less Than Last Year—Clemson College Officials Make Report.

Clemson College, July 19.—The fertilizer tag tax for the year ending June 30, 1915, was \$155,859.76, more than one hundred thousand dollars less than the amount collected during the year ending June 30, 1914. This fiscal report was made by the president of Clemson College to the recent meeting of the board of trustees. President Riggs stated that the tax had fallen to such a low amount that it was due only to a surplus of \$67,192.84 from the year before that the college was able to get through the year without borrowing money.

The fertilizer tax and the balance on hand at the beginning of the year together amounted to approximately \$223,000 and with this sum, together with the amount received from other sources, the college was able, with the strictest economy and curtailment of expense, to get through the year without borrowing.

The legislature has given the college permission to borrow \$62,400 if necessary during the year ending June 30, 1916, and President Riggs stated that it was likely that the college would have to avail itself of this permission, when the session opened in September, because the fertilizer tax does not begin to come in in any large amount until after Christmas.

Big Scramble For Job. Gaffney, July 19.—Coroner R. F. Spencer of Cherokee county died yesterday at the city hospital after several weeks' illness. He was 68 years of age and has filled the office of coroner about two years. He is survived by no near relatives except two grandchildren. Already there are a dozen applications for the position made vacant by his death. Prominent among these are several who were candidates in the last election.

Summer Aches and Pains. That backache or stiff muscle that can not be explained on account of having "sat in a draft and caught cold" is more than likely the result of weakened or disordered kidneys.

Foley's Kidney Pills promptly relieve backache, sore, swollen and sleep disturbing bladder ailments. They put the kidneys in sound, healthy condition, and help them eliminate uric acid and other poisons from the system. Evans Pharmacy.

A Woman With a Farm That Cost Her Ten Cents. In the current issue of Farm and Fireside, the national farm paper published at Springfield, Ohio, appears the following interesting account of a woman who has a little farm that cost her ten cents:

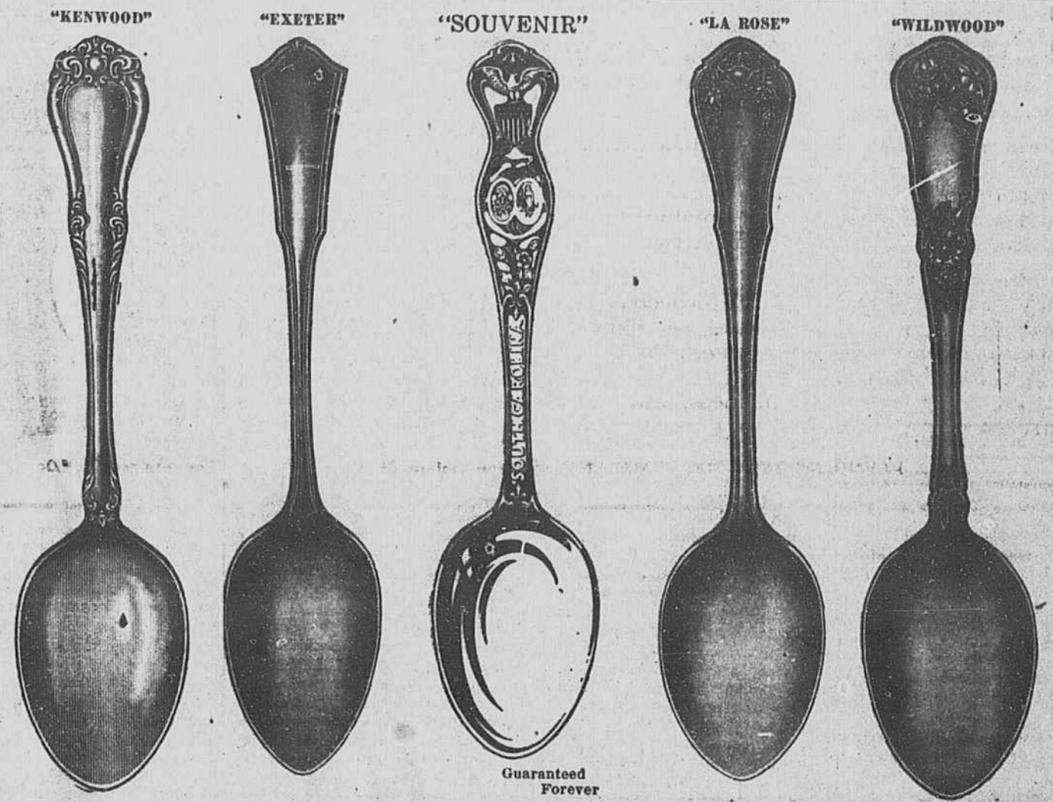

SET OF SILVER SPOONS FREE

With Each Paid Subscription to The Daily Intelligencer For a Year

CHOICE:

Of Souvenirs, "La Rose," "Exeter," "Kenwood" and "Wildwood" Designs

Benefit by Chamberlain's Eucalypti. "Last winter I used Chamberlain's Liniment for rheumatic pains, stiffness and soreness of the knees, and can conscientiously say that I never used anything that did me so much good."—Edward Craft, Elba, N. Y. Obtainable everywhere.

Miss Serena Helen Blue of Minnesota is the owner of the smallest government homestead. A few weeks ago she went to the U. S. Land office at Cass Lake, Minnesota, and in return for 10 cents received a deed to her homestead, which is little less than a tenth of an acre in size. "It is a triangular point of land jutting into Turtle Lake, and measures 188 feet long by 38 feet wide in its widest part. To comply with the Homestead law she built a log house and lived in it for seventeen months. The law required her to cultivate at least 2 1/2 square feet of the 3,484 square feet in her homestead, but instead she cultivated nearly half the area and raised tomatoes, cabbage, and clover. "Miss Blue is twenty-seven years old, and in a letter to Farm and Fire-
