Unjust Wheat Grading.

A Winona special to the Pioneer Press of the 7th inst. has the following truthful report of the business situation in the west;

A gentleman who has returned here from a tour through Western Minnesota and Central Dakota, says that farmers are selling but comparatively little wheat out there as yet, owing to what they deem injustice on the part of grain operators in the matter of grading wheat. As it is at present, the best hard wheat only grades No. 2. All other wheat grades No. 3. dissatisfaction on the part of the farmers and the unsatisfactory low prices affect all kinds of mercantile business adversely. The merchants' sympathies are with the farmers in the position they have taken, and the result is that the retail merchants generally are extending their credit rather than making collections and paying up. Report says that smut in wheat exists in various localities more or less, but the general impression prevails that the scare is magnified purposely, in the interest of grain dealers.

Corn vs. Oats for Horses.

The comparative value of corn and oats as food for horses may be briefly stated as follows: Corn is deficient in many elements of nutrition so necessary for recuperating the constant wear and tear which necessarily takes place in the body of a living animal. On this account, horses which are exclusively fed on corn and hay do not receive that kind of nourishment which appears necessary for the due support and maintenance of the animal fabric; hence, we must not be surprised that corn-fed horses show evidence of being languid, by sweat ing profusely while being worked. lack of vitality, etc. Oats, on the 25c contrary, contain more of the essential elements of nutrition than any other article of food which can be fed with impunity to horses, but are decidedly nutritious. They are the cheapest because there is less risk in feeding them, and experience has proved that horses properly ted on 60c oats and timothy hay, with regular exercise, good grooming and proper sanitary regulations, can be brought to the highest state of physical culture, and can perform more work with less evidence of fatigue than when fed on any other article of food.—American Farmer.

> Healthy animals will eat more food in cold than in warm weather. When the cool nights of autumn come the skillful feeder profits bp this fact by giving an extra allowance of food to his stock. He is abundantly rewarded by hearing the grunts arising from that comfortable pain which ing food into flesh and fat and like other machines when they are idle they are a drain upon the resources of their owner. The hopper should be kept well filled with grain if a good grist is expected .- American Farmer.

Maryland to the Front.

The Hon. Oden Bowie, Ex-Governor of Maryland, President of the Baltimore City Passenger Railway LEACH & NOCK, Proprietors. Co., also President of the Maryland Jockey Club says: "Both in my family and my private stables, as well as those of the City Passenger Railway Co. I have for years used St. Jacobs Oil most satisfactorily." Such a statement ought to convince every reader of this paper.

Special Announcement.

A large proportion of the readers of the HERALD are farmers, many of whom desire a great deal more of farming literature than we are able to give in our limited space. To accommodate all such we have made arrangements with the publishers of the American Farmer to give it as a premium for one year to every subscriber of the HERALD who pays his subscription in advance. The American Farmer is a large 16 page paper, published at Fort Wayne, Ind., the subscription price of which is \$1.00 per year. Every farmer in Grant and Roberts counties should avail himself of this magnificent offer.

PUMPS! PUMPS! Come and see those pumps at the Novelty Wood Works.
