

# HERALD-ADVANCE

W. W. DOWNE, Editor and Publisher.  
MILBANK, S. D.

The latest arrival in the field of weather prophecy who predicted that there would be no rain from June 1 to July 10, has got sadly ruined by cloud-bursts and things.

REV. VIRGIL MAXEY, a Baptist minister and a nephew of ex-United States Senator Maxey, of Texas, is going to try to unite the pulpit and the stage. He will act six days in the week and preach on Sunday.

Missouri last year paid \$4,999,842 for school purposes. There were 9,687 schools in operation, employing 13,634 teachers, and the number of children enrolled was 611,541, with an average attendance of 376,977.

The perfection of ventilation is now attained by electricity. The new United States man-of-war Baltimore is supplied with an electrical ventilator which will change the atmosphere of the engine room completely in two minutes.

The Board of Visitors of West Point is considering the subject of increasing the number of cadets at West Point to 500. The plan for the increase is to allow each Senator an appointment and to give the President ten every year.

The army of France exceeds that of Germany by 40,000 men. She has also 800 more guns in her field batteries. With Bismarck in retirement and Count Von Moltke too old for active service, is it any wonder Germany is alarmed?

The union of the five Central American States is soon to be consummated. All the States have signed the new articles of confederation with the exception of Nicaragua, and there is reason to believe that she will soon come into the fold.

The English P. O. Department realized last year a clear profit to the Government of \$15,000,000. It is now proposed to reduce postage nearly two-thirds, which would cut off \$528,000 of revenue, to be soon recovered, however, it is thought, by increase of business.

COSTA RICA's latest scheme for raising money and the purpose for which it is to be raised are novel, to say the least. A new theater is wanted at the capital, and an export duty has been placed by Congress on coffee in order to raise the necessary money. However, as only \$200,000 is needed for the purpose, the tax will not last long.

It is not easy to keep track of African affairs, and speculation concerning the future of the Dark continent can take a wide range without violating reasonable possibilities. It is becoming more and more apparent that the great struggle for territory will be between Germany and England. Minor conditions may change from week to week, but they will not essentially modify the general character of the main situation.

J. G. FITCH, inspector of training schools in England, who came to America in 1888 to study the public school system, has made a report which is not very complimentary to our schools. He says they give no better education than is now afforded by the elementary schools of England, the chief fault being that the minuteness of the rules laid down for teachers and pupils "leaves little room for the spontaneity of the former and the individuality of the latter."

A COMPANY has been formed, with an immense capital, for the purpose of building a railway along the north shore of the river and gulf of St. Lawrence, from Quebec to St. Charles Bay, on the Labrador coast, a distance of 844 miles. The aim of the company is to reduce the length of the Atlantic voyage to about 1,700 miles, as against 3,050 miles between New York and Liverpool. Those who take this route to Europe will only be exposed to the dangers of the sea between three and four days.

If you think posing is easy, says a professional model in the New York Sun, just try to stand perfectly still in one position for five minutes. It is torture, and the regular pose of a model is not for five, but twenty-five minutes. A model can never rest her weight on both feet at once, for the artists are looking for long lines and graceful curves that can only be got by leaning the body to one side or the other, so that one foot must bear more than half the weight. No one who has never tried it can imagine how hard it is.

In collections centuries old, to be seen in both China and Japan, are specimens of the most remarkable drawings in the world—pictures of all kinds drawn with the thumb nail. The nails of the thumb on the left hand of these peculiar artists are allowed to grow to an enormous length, sometimes to a foot or nineteen inches, and are then pared down to a pen-shaped point. Dipping this oddly constructed pen in beautiful vermilion or sky-blue ink, the only kind of ink used in these "sacred" thumb-nail drawings, the artist gracefully outlines his work.

The Secretary of War says that, with the present force at his disposal, it will require six years to complete the compiling, indexing, printing and binding of the official record of the rebellion. There will be 120 volumes. Forty-five of them have already been distributed, and eleven are printed and are being indexed, leaving sixty-four volumes to be compiled and printed. To complete the work in three years an annual appropriation of \$350,000 would be necessary, of which \$250,000 would be required to defray the expense of printing and indexing and \$80,000 for clerical and other assistance.

## FURIOUS STORMS.

Northwestern Towns Suffer from Wind and Rain.

The Storm Was General and Many Places Are Under Water—Cincinnati Roughly Handled—Several Lives Reported Lost.

FLOODS IN THE NORTHWEST.

Rockford, Ill., June 16.—The storm of Friday night was beyond doubt the most terrific and destructive in its results that has ever visited this city. Shortly after 8 o'clock the storm began suddenly and with indescribable fury, but it was not until daylight revealed the havoc wrought that even those who were out in the work of rescue or saving property could form any adequate estimate of the results. A freight train on the Chicago, Milwaukee & St. Paul was completely wrecked and two carloads of hogs drowned. A freight train stood on the track of the Illinois Central ready to go east when the track was washed away from under it and the engine toppled over on its side. The bridges, culverts and tracks of the Illinois Central and St. Paul are destroyed for a distance of half a mile into Kent Creek valley, entailing a loss to the Central of about \$100,000 and of fully as much more to the St. Paul. The bridges washed away over Kent and Keith creeks will cost the city \$15,000. The loss of the Forest City Furniture Company will amount to about \$3,000. The Rockford Fuel & Lumber Company's sheds are in ruins and the office was swept away. They also had five horses drowned and figure their loss at about \$4,000. The Rockford Construction Company lost about \$1,000. It is impossible to estimate the amount of private losses. They are serious and entail much suffering. They will probably reach \$300,000.

JOLIET, Ill., June 16.—Not since the night of August 18, 1853, has Joliet had such a storm of wind, water, hail, lightning and thunder as that of Friday night and Saturday morning. No great damage was done in the city.

The suburb of Brooklyn being low ground was three feet under water. The police patrol wagon was used to take people from their houses. Mrs. Edward Phelps, a widow, and her family were taken from her house, which in a few minutes floated down Hickory creek, breaking to pieces at the Fourth avenue bridge. The Elgin, Joliet & Eastern round-house, north of the city, was flooded with two feet of water. Residences for a mile east of the round-house were fully four feet under water. Fences and small houses were swept away, breaking to pieces at the first bridge encountered. The southern part of the city was under water until Saturday evening. All fences and sidewalks have disappeared and great distress prevails, especially among residents of the southern district.

Farmers coming in report great losses through the destruction of fences, barns, trees and crops. They say that the water lying on the fields will ruin the crops, especially if the weather grows hot.

SPRINGFIELD, Ill., June 16.—Much damage was done here to growing crops by wind and rain. Hailstones of enormous size fell, breaking windows. Trees were torn down and uprooted, corn, wheat, oats and fruit were badly cut down, and the damage done is hard to estimate. The streets were flooded and basements badly overflowed.

Much damage is also reported in Iowa and Wisconsin. The railroads suffered many washouts and trains were from five to fifteen hours late on the various lines. The wagon roads in the country were damaged and many bridges were swept away.

CINCINNATI, June 16.—Cincinnati and the country for fifty miles around experienced a sensational storm Sunday. It began at noon and for more than an hour terrified thousands. The wind was severe, the lightning of fierce disposition and alarming frequency, and the rain fast, furious and deluge-like.

By 1 o'clock every sewer in the city was full and the streets were amateur rivers. State street, a narrow thoroughfare lying very low in the valley of what was once Deer creek, became a torrent. Water stood two and three feet deep in the houses and the drift was doing much damage.

In all thirty-three houses were unroofed in the city. Thousands of trees were razed, and in the lower portions of the city many thousand dollars' damage done to goods on the first floors of stores. Two people were blown off a shanty-boat near the mouth of the Miami river and drowned and thousands of dollars damage was done to coal boats and timber-rafts. The Chesapeake & Ohio road loses \$50,000 by washouts and landslides within fifty miles of the city.

At Fairmount, Ky., three boys fishing in a boat are missing and were doubtless drowned. Covington, Belmont, Dayton and Newport, Ky., had eighteen houses unroofed and two persons hurt. Thousands of acres of wheat just ready to reap are laid flat and the loss will be great. It is safe to say that the loss in Cincinnati and a radius of fifty miles amounts to \$200,000.

LOUISVILLE, Ky., June 14.—At Bull creek, 8 1/2 miles above Maysville, Thursday night two dark clouds met and burst. The creek jumped over, and it swept like drift several dwelling-houses and their frightened occupants. The stone culvert on the Chesapeake & Ohio railroad over Bull creek was washed out into the river, and about 12 o'clock Thursday night, while the storm was at its height, the west-bound freight train ran into a washout, causing a fearful wreck. Engineer C. C. Roadcap, of Greenup County; Fireman Morris Bonaker, of Lewis County, and brakeman Charles Eaton were buried beneath the wreck. Conductor W. R. Watts and brakeman W. A. Love jumped from the hind car and escaped unhurt. About a dozen persons living on the banks of Bull creek are reported drowned. The following bodies have been found: John ggies, Lucy P. Estler, a widow, and

her two daughters, Bettie and Julia, and two sons.

Near Harrodsburg, Ky., a big storm did much damage to the fences, trees, etc., Thursday night. Lightning struck a flock of sheep west of town on the farm of Mr. Devine, killing twelve or fifteen, and on the farm of Mr. Atwood Davids it struck a tree under which some horses were sheltered, killing a valuable one worth between \$300 and \$500.

ATLANTA, N. Y., June 15.—During a rain storm yesterday collars in all parts of the city were flooded and sewer pipes were burst in many places. The loss is estimated at \$200,000.

UTICA, N. Y., June 14.—The storm through this section of the State Thursday night did great damage to crops, roads and bridges. At Norwich a large portion of the town was flooded, and the water was several feet deep in a portion of the town that had never been overflowed before. At Oneida the entire eastern part of the town was submerged. The Ontario & Western tracks for a distance of several miles were under water. At Solvise, in Madison County, a saw-mill, planing-mill, horse barn and several sheds were washed away by the flood, as was also 20,000 feet of lumber.

ROME, N. Y., June 14.—The heaviest rain for years fell in this vicinity Thursday night. Oriskany Falls, twenty-two miles south of here, was flooded by the breaking of two ponds four miles above the village. No lives were lost, but barns, a saw-mill, bridges, etc., were swept away. Hop-yards were flooded, gardens plowed up by water and other damage done. E. B. Miller & Co.'s woolen-mill and Hathaway & Reynolds's cap factory were badly damaged by water. Longley & Davis' woolen-mills also suffered damage. The loss will amount to between \$8,000 and \$10,000. The damage throughout Central New York will amount to several hundred thousand dollars.

BINGHAMTON, N. Y., June 14.—A severe thunderstorm and cloud-burst deluged the villages of Lisle and Whittier's Point and the neighboring country Thursday night. The lowlands were submerged and some live-stock perished in the raging waters. The damage in the town of Triangle is estimated at \$15,000. The damage in Cortland County will probably reach \$60,000.
