## Lebanese Radio Calls For Direct Negotiations With Jews

TEL AVIV, August 27 (Palcor)—The Beirut ((Lebanon) radio today called for direct negotiations with the Jews and implicitly supported the view of the Israeli Government that mediation attempts by a third party are bound to fail. This was the first positive response from a semi-official instrumentality of an Arab state to the Israeli Government's invitation to direct peace talks.

The Lebanese radio stated that no international commission has

hitherto been able to propose an acceptable solution and there is no doubt that Bernadotte will be equally unsuccessful. Direct negotiations, said the radio, are the only alternative to renewed war which "would cost the Arab states the lives of thousands of young men on whom the countries' futures depend." A spokesman for the Israeli Foreign Office, asked to comment on the broadcast, said that if the commentator was expressing the view of the Lebanese Government it shows an encouraging sense of realism.

"If we study the first alternative," the Lebanese radio said, "we shall see that the Arabs cannot lose from direct negotiations. There is a chance of a reasonable solution being found and young lives which otherwise would have been lost on the battle field would be saved."

"If Arab leaders decide on direct negotiations they wouldn't be betraying their peoples; they would be trying to save lives and to restore the rights of Palestine Arabs." The second alternative would mean that all the Arab states must unify their armies to fight a decisive battle in Palestine and occupy the entire country "at whatever cost," the radio said.

First YMHA in Boston, organized in 1875, had as its headquarters a room in City Hall set aside for its use by the mayor.
