Ladies Jackets Made to Order.

O. A. Kjos.

Columbia Bicycle \$47.50.

Opening of New Millinery.

Mrs. George B. Carrier will open up her new stock of Millinery in the Bunell block, Saturday, (tomorrow) and the ladies of Lewiston and vicinity are cordially invited to call and inspect her stock. All goods are absolutely new, and from the east.

Little Mabel Coleman is missing from the home of her parents in Vineland. Her father, Clark Coleman, believes she was abducted by D. T. Santo and that they are now married. The family, out of consideration for the welfare of the girl, will not interfere to prevent a marriage. The girl is only 15 years old and the couple could not be legally married this side of British Columbia, but there are grounds for the belief that they have crossed the border and were married there. Little Mabel was well known as an active member of the Salvation army. Santo was also a member of that organization. The association in their religious work resulted in an ardent courtship on the part of Santo who was a widower and has two children which he left behind. The parents became cognizant of the attentions of the rather aged lover and measures were adopted to break up the love affair. The removal to their new home in Vineland and the withdrawal of the family from active participation in Salvation army work gave the parents hope that the couple had become estranged. The elopement, however, brought the parents sorrowfully to realize that even these religious lovers could practice deceit.

Best Turkey Red Calicoes, 5 cents yard, at Alexander's.

L. J. Hornaday and C. A. Foreman returned yesterday from a business trip to the Potlatch farming district.

The - Latest - Fall - Styles!

J. P. Vollmer & Co.

Butterick Patterns for October now in.

Two pitiable waifs were brought before Judge Stookey, of the Probate court last Friday. Thomas Stevens, of Tammany, found two little boys in his granary last Thursday night. They were huddled together upon an improvised bed, made of a burlap sack spread upon the floor. They told a tale of desertion that appealed to the sympathy of the bachelor heart as it would to any other refined being. The boys, aged 7 and 5 had been turned out of a temporary home, provided by their mother and left in the old building with absolutely no provision for their comfort. They were placed upon horses, like stray cats in a bag and conveyed to the lonely spot so far away that return was impossible and there left to fate. Mr. Stevens found and fed them and brought them to town. Judge Stookey found a temporary home for them among relatives until their lawful guardian can be located. Their mother is supposed to be working near Lake Waha.

W. H. V. Rickards is in the city from the Green creek mines. He reports activity in that camp which is on the Clearwater only 60 miles from Lewiston. The Green Creek mining company has done 500 feet of development on a group of five claims and the result has been very satisfactory. Mr. Rickards is out now to secure a stamp mill for his property. The ledge on which all the claims are located has developed into a five foot fissure vein of high grade free milling ore. The assays justify the claim that the rock will average \$100 to the ton and it is of a quality that will be most easily reduced. There are now more than 20 locations in this camp and every claim gives promise of good value and permanency.

The greatest bargain yet!
36 x 18 Bleached Huck Towel, 5 cents each, at Alexander's.

At Publishers Mailing Prices

Prices are right and goods are right.

Dent & Butler, Druggists. Telephone No. 15.

AMMUNITION FOR SHOT GUNS.

John Denny returned Monday after two months spent in prospecting in and around Dixie camp. He found some valuable ore deposits. The samples of rock brought in were tested and they proved to be very rich. Mr. Denny was so pleased with the prospect that he returned immediately to perfect his locations and titles to the claims. Dixie and Big creek are coming to the front as free gold camps. The ledges are large and uniformly rich.

Clara Harley was arrested last Friday for selling two bottles of whiskey to Nichodemus Stevens a Nez Perce Indian. The woman had a hearing before Commissioner O'Neill Saturday and was held to the U. S. grand jury in the sum of \$200 which she could not give. She now languishes in the county jail.

J. B. Munshaw, the enterprising livery-man has arisen from the fire and is again installed in the big, new barn on the site of the old. Mr. Collins has rebuilt and the new structure is a credit to the city. The enterprise of the proprietor and the lessor is exemplified in this speedy and complete resurrection.

The loss from the rain up to date is not at all extensive. There may be in some sections small quantities of damaged wheat but not more than can be absorbed in domestic uses on the farm. If the dry weather continues the good times will not be interrupted by the storms of the past two weeks.

Four more sisters of the Order of Visitation arrived in Lewiston last Friday, to aid in building up a girl's academy here. This completes the force of seven. They are much pleased with Lewiston, the people and the prospect for a great educational institution here.

Persons interested in the sport of foot ball are requested to meet Saturday evening at the city council rooms to assist in the organization of a foot ball team and to promote the 'oot ball interests generally. It is the purpose to organize and begin active practice.

Go to Russell's Cash Grocery for Schilling's Best Tea, Coffee, Baking Powder and Extracts.

Coroner Strong was sent to Nezperce Wednesday to serve papers in a replevin case to which the sheriff of the county is a party. This case grew out of the foreclosure of a chattel mortgage. The parties giving the mortgage plead no consideration for the obligation and therefore they desire to recover the property mortgaged from the sheriff. The history of the case involves a transfer of title to a reservation homestead and the would be purchaser of the claim claims fraud in the fact that the homesteader showed and described one quarter section of land while the numbers given covered another tract. The case will be a complicated one to be untangled by the courts.

Mr. A. Binnard last Sunday caught two large carp with hook and line from Snake river. He hooked another which was so large he could not land him. These fish are new arrivals in our waters. They have come perhaps from the lower Columbia; or they may have been placed in the Snake or may have escaped from some private pond in sufficient numbers to stock the river. While the carp is only a second rate food fish, they will be a valuable acquisition to the Snake, as there are but few good fish in that stream.

Mr. Fansler, of Vineland, makes an encouraging report. He owns a five acre farm on which he planted garden for family use. He worked all summer for wages and cultivated his garden by working over time. This fall he marketed his surplus, with the return of a cash asset sufficient to support his family a year. The question of whether a man can make a living on five acres in the Lewiston valley is determined by this example. Mr. Fansler's five acres made a living for him and leaves him his wages intact as a clear profit.

Louis N. Roos returned Saturday from a trip to Camas prairie and Craig's mountain.

Leland News Items.

Every day of sunshine this week saves 30,000 bushels of the Potlatch wheat.

F. W. Galbraith, the Leland dentist, does all kinds of dental work at reasonable prices.

No soreness of gums caused by the anaesthetics used by F. W. Galbraith, dentist, Leland, Idaho.

J. M. Harrington and a crew of a dozen men passed through Leland Monday en route to the pine regions of the Little North Fork. He has boats with him and will take to the river at Chapman's mill. The crew will be out about two months.

The Leland Mills will put on a night shift next week. They have already in store several thousand bushels of fine milling wheat and the demand for the flour is such as to keep the mill running at its fullest capacity. Leland supplies a great quantity of the flour used on the reservation, the Weippe and in the mining camps of the Pierce district.

The great wheat crop of the Potlatch is about one-fourth saved. The rainy weather caught the farmers with most of the grain in the shock. All agree that very little damage has been done, but are apprehensive for the future if the wet weather should set in again. This week there are seventeen steam threshers at work on Potlatch ridge and there will probably be twenty by the close of the week. This means a saving of 30,000 bushels each day that they can run. Some grain is still standing, but the greater portion has been cut and is either stacked or in the shock. At the most careful estimate it will take three weeks of good weather to save all the wheat. The yield, per acre, is running from 25 to 60 bushels.

Dr. J. Q. Moxley and Pres. J. N. Stacy are in Spokane this week. They went there to promote the mining interest of the Golden Gate company and other properties in which they are interested.

J. W. Rozen, of Russell, is in the city on business.

Prosperity Is Certain

to come when you can make a little money go a long way. The secret of making money is in saving money.

Buy Right—

That is the idea. We are prepared with a new fall stock to make prices that will talk to the point.

John M. Fix.

A Full Line of Mandolins AND Guitars ----

Will be in next week. The celebrated 'Gruncwald' make. Don't fail to see them. All prices.

The Book Store.

Baker's Barbed Wire.

Best in the Market.

Our last year's sales convinced the farmers that Baker's Barb Wire has the call for durability and strength. Our first car-load will arrive next week.

Garland Stoves and Ranges.

A car load of these next week. There is no need to boast about the Garland. Last year's buyers will help us sell this invoice.

C. C. BUNNELL.

100 patterns suits for Ladies, stylish fall and winter costumes, no two alike, the finest assortment ever seen in Lewiston, now on display at Alexander's.

Normal Notes.

Several new students have enrolled during this week.

The class in psychology is delighted with that study and much credit is due to Pres. Knepper who handles the subject in a very able manner.

The Political Economy class is this year composed of young lady Seniors. The books are now here and many interesting subjects are being discussed.

A general meeting of the Normal society will be held this week and officers elected for the coming term. This society will give its usual public entertainment some time this month.

The Excelsior Literary society held its regular meeting last Friday afternoon and elected the following officers: Miss Louise Griffiths, president; Miss Cora Coburn, vice-president; Miss Mary Benton, secretary; Miss May Steen, treasurer. This society started with a good attendance and promises to be the Clonlan's most dangerous rival.

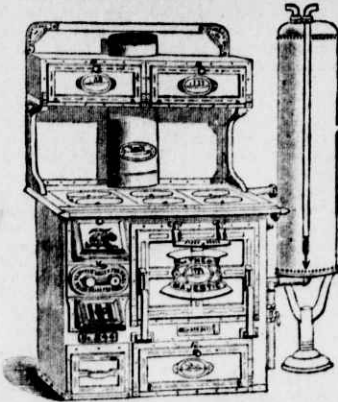

The Clonlan Literary society held its regular meeting last Friday after-

noon which resulted in the election of the following officers: Miss Jennie Harrington, president; Mr. Mitchell, vice-president; Miss May Knepper, secretary; Miss Bernice Mot'oy, treasurer. With this corps of able officers the society will doubtless make excellent progress during the coming year.

The Seniors welcome to their class, Misses May Stephenson and Laura Patton, of Caldwell, Idaho, Miss Reeder, of Moscow, and Miss Edith Ward, of Leland. The Misses Stephenson and Patton come highly recommended from the Idaho College at Caldwell. Miss Reeder was a student of the Normal last year and is a very successful teacher of Latah county. Miss Ward is a popular young teacher of Nez Perce county, and was also a student of the Normal two years ago.

Our fall stock of Gentlemen's and Youth's Clothing, is all the newest and latest creations of the tailoring art, made of the very best materials, at prices just as low as you have been paying for shoddy satinetts elsewhere. Buy our Clothing and after comparing with others, your money back at any time, if dissatisfied. Alexander's.
