He has had practically very little civil training, and his civil career has been disfigured by just the defects which his military education made most probable.

Captain Ericsson has invented a new orpedo boat which is said to be so much ore murderous than anything previously conceived that it will tend to make naval warfare impossible. That statement, however, must be received with many grains of allowance. Many inventions have been heregislators. He has in fact gone out of his way to misrepresent the situation; has beasted of encouragement which he never received; has failed signally in explaining away difficulties pointed out by objectors; and has acted in a manner far more suggestive of quackery than anything else. Some of his sayings and doings in fact have been almost such as Count Cagliostro himself, the "arch-quack of Europe," as Carlyle calls him, might have envied, and Mr. Montague Tigg, the talented Chairman of the great Anglo-Bengalee Company, could have taken valuable points from him. It remains to be seen whether the stock of the canal company will be taken. It may be, for there is an inexhaustible fund of credulity in the world. But even should it be subscribed there will be a wide gap between that event and the building of the

SOMEWHAT PREMATURE.

The Indiana Democrats are trying to make a new national platform for their party. The attempt is somewhat premature, for it is by no means certain at this noment that the Democracy will make another national fight under its old organzation and name. Beside the probability that new issues will come to the front through the force of circumstances, it is scarcely ever in the power of a beaten party to dictate the terms upon which it will make the next contest. With the issues which are to divide the country four years hence, or two years hence, the Republican party will have something to do, and it is hardly likely that it will seek advice from its opponents. Until, however, it is determined whether the South will train distance of the maximum channel during the six months ending August 9th last. This improvement has opened through sands and shoals a broad, deep highway to the ocean, and is now going to a more active field.

Report of the Indian Bureau. WASHINGTON, November 21st.—The annual report of the Indian Bureau for 1880 has been completed. It exhibits a continu steady advancement toward civilization on the part of nearly all the Indian tribes, and very remarkable progress in many instances, especially the Ogallallas and Brule Sioux in Dakota and the Pacific Coast Indians collected at the Yokima Agency. The demand upon the Bureau by the Indians of a large najority of the Agencies for implements which enables them to perform manual labor are far beyond the means at the disposal of the department for that purpose. The desire of the gage in civilized pursuits, and the improvenent in their manner of putting in and caring for crops raised, shows that the efforts of the past few years are gradually bringing them o a self-supporting condition. Among Republicans here generally, there is disgust that such a controversy should have arisen as has been precipitated in Ohio about the board and lunch bills at Chicago, and it is regarded as very small business at the best. It is noticed that dispatches from Columbus about it are very favorable to Foster. It is thought here by some that the whole disa greeable business has been sprung just now for the purpose of trying to injure Sherman's chances for the Senate. The Observer is a moderate Liberal newspaper. DUBLIN, November 21st .- Winter has set in severely. The whole country is covered with snow. Many land meetings were held to-day throughout the country, but the attendance was smaller than usual on accoun of the frost. LONDON, November 21st.-Forster, Chie Secretary, has gone to Ireland, but will re-turn to attend the Cabinet Council Thurs-

day, and the reports that he may bring will go far to decide the course of the Government. Dublin, November 21st .- At a Land League meeting at Tipperary yesterday, Boynton, one of the indicted agitators, de-livered an inflammatory speech. The hither-to quiet county of Kildare is now under the

minion of the agitators. LONDON, November 21st .- Five person have been arrested near Lough Res. County Galway, for assisting to reinstate a famil in a house from which it had been evicted Two of the men arrested, named Challeran and Pindar, are Secretaries of branches of the Land League. Another prisoner is widow, who was arrested for trying to force possession of the house. All were remanded for trial and bail refused,

Laycock's Challenge to Hanlan. LONDON, November 21st.-Laycock, in hi challenge to Hanlan, says he must so ment on the subject, not wishing to be drawn into such a controversy. SORGHUM GROWING ON THE ISLANDS. ISLETON (Sacramento county).

November 18, 1880. Another new enterprise has just been started in our little town. In fact, Isleton is fast becoming a manufacturing town. The beet sugar refinery has been running now for some months, and it has been making a fine quality of sugar, both golden and white. The most of the beets are of excellent quality, and are yielding all the way from 18 to 25 tons per acre. But the enterprise at present specially interesting is making of syrup from sorghum. Josiah Pool, being of an enterprising mind, thought he would try the raising of cane this season, for an experiment, and have it worked up Oswego canals in this section. There are seven hundred boats between Dorchester and Utica. To morrow an attempt will be made not more than half worked up, he concluded to try another process and work the cane up into syrup. Accordingly he pro-cured a presser and some copper kettles and went to work making syrup, and the consequence was a success. The cane is of two kinds-the early amber and the Honcut and topped one-eighth of an acre and gathered 5,600 pounds of cane, of the Honduras, and from this 5,600 pounds of cane he ment, \$18,585; military establishment, \$2,585; public works, \$18,514,129, and in miscellaneous classes, \$5,600, making a total of revisory reductions of \$18,802,414. Some increase in the amounts of estimates for the year 1882 over the amounts appropriated for the year 1881 appear in the civil establishment, military establishment and miscellaneous classes. In public works I have reduced the estimates to accord with what I understand to be the amount required for the absolute
