In a few minutes the whole community of monkeys, a dosen in number, assembled and sat in rows before him, with their hands crossed in their laps or resting on their knees, langhing, gesticulating and answering. "The conversation continued for a full quarter of an hour, to the intense delight of the monkeys, who took a lively part in it. As their interlocutor was about to go away they all became intensely excited, climbing up the balustrade and uttering cries of lamentation; when he finally departed and disappeared more and more from their view, they ran up to the top of the cage, and, clinging to the freize,

The prince met Miss Machav in Italy twelve years ago while she was touring that country with her mother. He followed her through Italy and proposed marriage. He belonged to one of the oldest families in Italy, with a lineage and history rivaling those of the old Italian kings, and both Mrs. Maskay and her daughter felt flattored by the proposal; but Mrs. Mackay told Prince Colonna frankly that her daughter was only a stepdaughter to Mr. Mackay and would therefore have no wedding allowance. As a matter of fact she did not possess a dollar in her own name. The prince declared that he cared nothing for that, and his uncle, Prince Stigliano, is said to have written a letter to Mrs. Mackay stating that it was a love match and that money was of no consequence.

Mrs. Mackay finally consented, and in 1983 they were married. The wedding was one of the social events of Paris, Mgr. DI Rende, the papal nunclo to France, officiated at the ceremony. There was no settlement before the wedding, but afterwards Mrs. Mackay allowed her daughter an income of \$175,000 a year. In addition she gave herdaughter many valuable presents, including diamonds, coaches and furniture.

one horned. Its color is a dirty gray, almost verging on the mouse color. And it had two horns, though one was so small as to be scarcely perceptible, a mere hump with a tuft of stout bristles three or four inches high. The other real horn was about three or four feet long, thick and tufted about with bristles at the base, and curving and tapering gracefully to a hard sharp point. This might have been a formidable weapon in a battle, though the rhinoceros usually dealt with its foes by trampling them underfoot, and used the horn as a rod of guidance for its
