### BY AUTHORITY

BOARD OF AGRICULTURE AND FORESTRY, DIVISION OF ANIMAL INDUSTRY, TERRITORY OF HAWAII.

RULE AND REGULATION NO. 1

INSPECTION OF IMPORTED LIVE STOCK.

In order to prevent the introduction into this Territory of infectious, contagious and communicable diseases among live stock and other animals, local managers or agents of Steamship and Navigation lines or the commanding officer of any ship shall notify the Territorial Veterinarian or the local Live Stock Inspector immediately upon the arrival of any ship, of the presence on board of any of live domestic animals, including poultry and dogs, when same is intended to be landed in his Territory and shall upon arrival of any ship furnish the inspecting officer with a list of the number and kind of animals taken on board from any port outside of this Territory, the number and kind destined for the Territory, the name of the owners or consignees, and a report as to the condition of health and cases of sickness or death among the animals while on board.

If necessary to remove such animals before the arrival of the inspector, they must be confined on the pier in such a manner as to facilitate inspection, but should in no case be turned loose on the pier. Hogs and sheep shall be confined in temporary pens. Cattle and horses shall be tied on the pier. No animal of any description shall be allowed to leave the pier until the Territorial Veterinarian or local Live Stock Inspector has issued a certificate of health permitting the landing of the animal or animals in question.

In no case shall the removal of live animals from the ship for inspection or other purposes, constitute a landing until a certificate of health for such animals has been issued.

Until further notice the ports of Honolulu, Oahu, and Hilo, Hawaii, shall constitute the only ports of entry for live stock and other animals for this Territory.

Any violation of this regulation is a misdemeanor.

This regulation shall take effect at once.

C. S. HOLLOWAY,

Executive Officer, Board of Agriculture and Forestry.

Approved September 11, 1905.

G. R. CARTER,

Governor.

BOARD OF AGRICULTURE AND FORESTRY, DIVISION OF ANIMAL INDUSTRY, TERRITORY OF HAWAII.

RULE AND REGULATION NO. 2

INSPECTION AND TESTING OF IMPORTED LIVE STOCK, FOR GLANDERS OR TUBERCULOSIS.

In order to prevent the further introduction of glanders and farcy into this Territory it is hereby ordered that:

No horse stock, (including mules and asses), shall be admitted to the Territory unless accompanied by a certificate of health showing that the animal or animals in question have been submitted to the mallein test and found to be free from glanders. Said test must be made and certificate issued by a competent veterinarian whose name appears upon the list of graduates from a recognized veterinary college and whose professional standing is satisfactory to this board. The test must be made according to the rules of the Territorial Veterinarian and recorded on blanks furnished by him for this purpose.

If such animals shall not have been tested before shipment they shall upon arrival in this Territory be placed in quarantine and held there until mallein tested under the supervision of the Territorial Veterinarian or the local Live Stock Inspector and at the expense of the owner.

Any person contemplating the importation of horse stock to this Territory shall notify the Territorial Veterinarian or the local Live Stock Inspector and obtain from him the necessary blanks and instructions.

In order to prevent the further introduction of tuberculosis in cattle it is hereby ordered, that:

No cattle above the age of six months shall be admitted to the Territory unless accompanied by a certificate of health showing that the animal or animals have been submitted to the tuberculin test and found to be free from tuberculosis. The said test must be made under the same condition as those governing the importation of horse stock and be recorded on blanks furnished by the Territorial Veterinarian. If unaccompanied by such certificate the animals shall be tested upon arrival in the same manner as prescribed for horse stock.

If any horse stock shall be found by the Territorial Veterinarian or the local Live Stock Inspector, upon arrival in the Territory, to be infected with glanders or any cattle to be infected with tuberculosis, the same shall be immediately destroyed and the carcass disposed of at the expense of the Territorial Veterinarian or the local Live Stock Inspector.

Any violation of this regulation is a misdemeanor.

This regulation shall take effect at once.

C. S. HOLLOWAY,

Executive Officer, Board of Agriculture and Forestry.

Approved September 11, 1905.

G. R. CARTER,

Governor.

BOARD OF AGRICULTURE AND FORESTRY.

Office of Territorial Veterinarian, Honolulu, Sept. 12, 1905.

All owners of horse-stock in this Territory should carefully and regularly examine their animals to ascertain if they exhibit any of the symptoms of glanders or farcy as follows:

Discharge from the Nose.—This condition occurs in a number of diseases, as for instance catarrh of the nose and strangles (distemper, epizootic), but in glanders it is usually quite characteristic. In mild cases it is not very abundant but is thick and quite sticky of a transparent whitish color, somewhat resembling the white of an egg. This sticky discharge adheres to the margin of the nostrils forming tough brownish scabs and crusts. The discharge does not necessarily sink when dropped in water, as is popularly believed.

The most characteristic symptom of glanders is the presence of ulcers in the nose, usually on the partition between the nasal chambers. These ulcers are not always plainly in sight, but may be brought into view by holding the nostrils well open and turning the nose toward the sun. They vary in size from 1-8 to 1-4 inch in diameter up to one to two inches, and may become confluent and form large patches, always with ragged irregular edges. The ulcers may heal and leave depressed wrinkled scars. The amount of discharge from the nose depends upon the extent of the ulcerations; when small the discharge is scant and when more extensive it becomes more abundant. Frequently the discharge and ulcers occur only on one side. There is nearly always a swelling of the glands between the branches of the lower jaw, but not to the same extent as in strangles, and they rarely suppurate or break open.

BOARD OF AGRICULTURE AND FORESTRY, DIVISION OF ANIMAL INDUSTRY, TERRITORY OF HAWAII.

RULE AND REGULATION NO. 3.

CONCERNING GLANDERED HORSE STOCK IN THE TERRITORY.

It having been brought to the notice of this board that a contagious disease known as glanders and farcy prevails among the horse stock in various portions of this Territory; therefore, in case any animal shows symptoms of glanders, the owner or person having charge of the same, or any person having reason to believe or to suspect that an animal has glanders shall immediately notify the Territorial Veterinarian or the local Live Stock Inspector.

If the Territorial Veterinarian or the local Live Stock Inspector decides that there is reason to believe an animal is suffering from glanders he shall at once isolate the suspected animal or animals and either submit them to the mallein test or remove them to quarantine, where they shall be kept under observation until the nature of the disease can be definitely established.

All animals which upon examination by the Territorial Veterinarian or the local Live Stock Inspector are found to exhibit definite symptoms of glanders shall be destroyed and the carcass disposed of under the supervision one of the above mentioned officers.

All other animals which have been exposed to the infection by being in the same stall, yard or premises, or which in any way have come in contact with an affected animal, shall be quarantined for such period as shall be required by the Territorial Veterinarian or the local Live Stock Inspector, or submitted to the mallein test.

The premises where affected animals have been kept shall be disinfected under the supervision of the Territorial Veterinarian or the local Live Stock Inspector.

All expenses in connection with the examination, testing, destroying and disposing of affected animals, as well as quarantine and disinfection, shall be paid by the owner.

Any violation of this regulation is a misdemeanor.

This regulation shall take effect at once.

C. S. HOLLOWAY,

Executive Officer, Board of Agriculture and Forestry.

Approved September 11, 1905.

G. R. CARTER,

Governor.

The type or glanders known as farcy consists in a specific inflammation of the lymph vessels and glands of the skin and may occur on any part of the body or limbs.

The glands become swollen, forming the so-called farcy buds, and often occurring as a chain of nodules along the enlarged lymph vessels. The nodules break open and discharge a yellowish white, sticky pus, forming crusts similar to those seen around the nostrils. The abscesses may heal up and new ones form in the

same vicinity or on more distant parts of the body.

The disease may be either chronic or acute in its course and the chronic form may at any time become acute. Mules and asses almost invariably develop the acute form while in horses either form may be seen. Want of feed and over work frequently causes latent glanders in the horse to become acute.

The disease is often accompanied by a short dry hacking cough and a tendency to sudden swelling of one of the legs, especially the hind legs.

In a large number of cases of glanders the symptoms are very slight even though the animals may have been affected for months or even years and herein lies the great danger of the spread of the disease to other animals or to man.

In the course of a few days the Territorial Veterinarian will have for distribution copies of Bureau of Animal Industry Circular No. 78 entitled "Glanders and Farcy" and which gives a detailed description of the history, nature, symptoms, diagnosis and prevention of the disease in question.

All requests for this circular should be addressed to:

DR. VICTOR A. NORGAARD,

Territorial Veterinarian, Honolulu, 631

Foreign Markets Again After American Flour.

MINNEAPOLIS (Minn.), Sept. 8.

Local flour mills are coming into their own again. Foreign business, after a year of stagnation, is being revived, and hope is rising in the breasts of millers that the coming season will see the foreign markets a big absorber of America's flour.

One of the largest local milling companies was given a bid on 10,000 tons of patent flour to-day, and while the prices were just out of the line of the possibility of meeting them, it was not remote. The offer came from China via San Francisco and is equivalent to 100,000 barrels. The bid this morning makes the second order of that size that has come into the market inside of a week.

ADMIRAL NEBOGOTOFF DISMISSED.

ST. PETERSBURG, Sept. 6.—An imperial order was issued to-day dismissing Rear Admiral Nebogotoff and the captains of the battleship Nicolai I. (now the Iki) and the cruisers Admiral Seniavan (now the Minoshima) and General Admiral Apraxine (now the Okinoshima), which were surrendered to the Japanese in the battle of the Sea of Japan. All four officers, besides being deprived of their rank, are liable to punishment under the provisions of the naval penal code. The Emperor has ordered all other officers who surrendered their vessels to be tried on their return to Russia.

Details of Italian Earthquake.

Rome, Sept. 8.—All Italy is suffering from terrible depression because of the news from the south, where one of the worst earthquakes ever experienced occurred to-day. Although the earthquake was felt all over Calabria and to a certain extent in Sicily, the worst news comes from Pizzo and Monteleone and from eighteen villages which are said to have been completely destroyed. According to the latest news received, 370 persons have been killed and a great number injured. It is as yet impossible to even estimate the property losses.

The shock was felt at 2:55 o'clock this morning. It lasted for eighteen seconds at Catanzaro and soon thereafter was felt at Messina, Reggio, Monteleone, Martignano, Stefaconi, Piscoppo, Naida and Olivadi and other points.

Scenes of indescribable terror ensued. Women, aroused from their sleep, rushed half clothed into the streets screaming with fear, carrying their babies and dragging along other children, and calling for help on the Madonna and the saints. The men escaped into the open with their families, all calling on their favorite saints for protection.
