"The attempt of the Government Organ to depreciate the value of these bills, has thus met with very little success. The atue of these blur, has thus met with very little success. The at-tempt, however, may serve to show the impolicy of the govern-ment's meddling in matters which it has no business with, and its fattle efforts will doubtless be fully appreciated by the U. S. Government at Washington."

We are not aware that the Government which we happen to be in the employment of, as a Com. Rep., has "meddled with any matters it has no business with," and have nothing to say on the subject; but we do say that the Commercial Reporter of the Polynesian has never "meddled with any matter" yet that he "has no business with," and shall continue to make such comments on the trade items of this place, as his experience tells him will be interesting, and in which the mercantile community are generally interested. If his efforts are appreciated by the United States Government, so much the better, and being a good American citizen, we trust it will reward him by making him the second Comptroller of the U. S. Treasury.

WEIGHT OF WHEAT PER BUSHEL.-The commercial arsicle of the San Francisco Evening Bulletin contains the following statement.

In view of the growing importance of the wheat trade, we have taken considerable pains to inform ourselves in regard to the weight per bushel of various samples of wheat now in process of manufacturing at the Golden Gate Mills, on Pine street. To the proprietors we are indebted for much valuable assistance in weighing and measuring the same, which has been done with much care and exactness, and which we think is a fair average exhibit of our choice milling wheat, produced in California dur-

ing the year 1859:

What is the weight of Hawaiian wheat per bushel?
