REACT TO LOWER LEVEL

STOCKS WHICH ADVANCED SO SEN-SATIONALLY ON THURSDAY.

Erie Securities Furnish New Points of Strength-Movements and Rumors of the Past Week.

NEW YORK, Aug. 8 .- Efforts were made to-day to shift speculative interest into new ranged from \$2.25@3; bucks were reported at | quarters of the market. The opening dealings showed that the glamour of the supposed plan for the merger of Southern trunk line railroads had taken hold on the imagination of the speculative world, and most of the stocks which were violently affected yesterday started off on a fresh upward movement to-day. But it also became quickly evident that the movement was overrunning itself. Either the desire to take profits or the belief that prices had been lifted to above the intrinsic value of stocks led to prompt reactions in Louisville & Nashville, Illinois Central, and conspicuously in Hocking Valley. The last-named stock not only lost its opening rise of this morning, but all of yesterday's sensational | Am. Car & Foundry ... gain as well. The reaction was not so violent in other stocks, although Rock Island developed a heavy tone and Colorado Fuel became weak with considerable sentimental | Am. Smelt. & Refining effect on the general list. It cannot be said that the reaction in the Southern group materially altered the general conviction in the street that important developments are impending regarding the group. The difficulty encountered by Louisville in its advance about 150 was attributed to the fact that Fair to medium heifers...... 4.25@ 4.85 | that is the figure at which the option is supposed to be held by J. P. Morgan & Co. Heavy calves 4.00@ 6.25 to buy the control of the road. Some of the was by brokers usually employed by the Good to choice cows and calves ... 35.00@50.00 | speculative leader whose publicly pro-pers took the bulk of the arrivals at an official announcement of the acquisition of ders for double the number here. There | Louis & San Francisco contained no referwas only one load of light hogs, a double ence to the further extensive projects deck, averaging 154 pounds, that sold for | which are supposed to lie back of that operation. In fact, no official countenance could be secured from any source of yesterday's many rumors. Among the new points of strength the most conspicuous and most influential was that in the Erie stocks. No reason was forthcoming for their advance beyond a revival of the old rumors of large holdings in the property by if they received only a few hogs to-mor- | J. J. Hill and plans for its improvement by that capitalist. The rise in Amalgamated Copper seemed to be purely speculative in its origin. Other points of strength were the Colorado & Southern stocks, Texas & Pacific and a number of minor stocks. The banks have not gained enough from the interior to offset the drain to the subtreasury, and a poor bank return is indi-Sheep-Receipts none; shipments none. cated. This and the holiday prompted to The market is in a better condition than realizing late in the day and the closing The bond market was dull and irregular. Total sales at par value were \$1,175,000.

During the early part of this week the nterest in the stock market had fallen to so low an ebb that the members of the Stock Exchange eagerly availed themselves and petitioned the governors with practical unanimity to close the exchange. After this action had been taken the market sprang into activity again and by Thursday the volume of dealings had again risen to well above half a million shares. The fact that the awakening was coincident with the return to New York from a vacation trip of the speculative leader of all the important speculative movements that have recently occurred, did not escape notice and comment, and the public outgivngs of this leader of enthusiastic confidence in higher prices for the future warranted an inference that his own operations n the market were shaped to that end. Some of the most violent movements were n stocks in which this leader and his following have been conspicuous and successful operators in the past, and in which their continuing interest is avowed. These price movements have been accompanied by a flood of rumors, which may be either cause or effect, but which have an important bearing on the stock market situation in any event. Official announcement, or even admission on the subject has been meager, but there is a general credence in the theory that important developments are pending looking to the consolidation of interests in the Southern trunk line field. The only accomplished fact of the week on which to hang the theory was the formal announcement of the plan to take over the Chicago & Eastern Illinois by the St. Louis cisco system in other directions into the Southern field made it evident that there were new relations to be adjusted in that field. Stocks of other systems which the new element might be supposed to threaten with dangerous rivalry, instead of showing depression, were buoyant in the market and the speculative public promptly formed

the inference that relations were to be harmonized throughout the field. The manner in which the seemingly accidental passing of control and cornering in the market of Louisville & Nashville had resulted in the final lodgment of control of that system in hands identical with the control of the Southern Railway was recalled to corroborate the impression of the workcago, Indianapolis & Louisville was further | ings, \$3,223,350. evidence in the same direction. The supposed complaisance shown by the Southern Railway to the expansion plans of the St. Louis & San Francisco was made good for the supposition that the Southern Railway | counts, 21/02 9-16 and 2 9-16/02%. Consols, powers would be found in ultimate control also of the new system. This would leave the Illinois Central and some of its supposed plans for expansion on one side. It had been supposed that Chicago & Eastern Illinois was destined for ultimate absorption by Illinois Central. It will be seen therefore that the fabric of possibilities built up by Wall-street surmises up to this point threatened to bring into array against each other's interests once more the same powers that were in conflict early last year in the transcontinental field, generally distinguished as the Morgan and Harriman parties. Wall street has been quick to finish its structure of surmise by a theory that these powers had grown too wise to repeat the destructive struggle of last year, and were to unite in adjusting the control of the Southern trunk line territory. This is the substance of the causes of the revival of speculation in Wall street in the latter Hogs-Receipts, 2,500. Market lower. Pigs and | part of the week which has but meager for the great requirements thus foreshad-

There has been no development in the money market to indicate effective relief owed. The week's gold shipment was called a special transaction and was attributed to the working out of Austria-Hungary's currency conversion plan, but it is expected that this may draw some further gold from here. The Paris demand for gold in the London market also has shown signs of revival. General conditions in this country ored, 94c; large white, 94c. Eggs-Receipts, have continued highly favorable to values | 6,870 packages. The market was irregular. State except for the continuance of the anthracite miners' strike and some threats of labor troubles in other directions. The bond market as a rule has been rather quiet and irregular for investment

CORN LEADS IN A SLUMP

IT GOES OFF 2 3-4C, A TOTAL OF

CHICAGO, Aug. 8 .- Corn was hammered by the bears fast and flercely to-day. The growing crop was ripening too rapidly under the influences of perfect weather to suit the holders. In the general alarm there was a panicky drop of 2%c, a decline of 41/2c since yesterday's high price, and of over 7c in a week. The pit and countryside were both bearish. Deliveries of wheat also were too heavy for prices and on sympathy everything turned very sick and heavy. Even the fortunate shorts would not cover enough accounts to relieve the slump. At the close September corn was 24@2%c depressed, wheat %@%c down and oats %c lower. Provisions had inherent strength, but closed unchanged to 35c low-

The corn pit was filled with bears from the sound of the starting gong. The country was selling and the professionals took an active part on the bear side. For the past two or three months corn had been bulled to death. To-day the outlook for crops could not have been better. Hay and oats, as well as corn, promised abund- ASSETS, TOTAL VALUATION JULY 1, 1902...... ant yields. Even with the wheat market weakening on the prolific season the general opinion was that the coarse grains were still far out of the natural range with wheat. The opening sales to-day insome time until the avalanche of selling orders struck the pit and resulted in the losses orders came out and then millers dumped long stuff freely. Shorts became did not equal the desire on the part of the longs to sell out, and September, which sold early at 531/60531/c, floundered at 50%c. There was a little reaction late, but the close was very weak, 24/02%c lower at 51/4c On the decline December touched 39%c and that the influential bull interests had closed out their holdings. Receipts were Detroit. We have personally examined its factory plant and have gone over the land. very small at thirty-seven cars, but had Wheat was influenced to a great extent by the weakness in corn. Big commission houses were sellers freely on the fine weather, big deliveries and bearish crop

advices. Receipts still kept above last year's figures. There was moderate early buying by shorts, which steadied prices for a time against lower cables and other bearish influences. When the corn break came wheat went off in all options. Clearances were poor and augmented the decline. Cash business was at a good premium, as high as 4 cents, but the selling pressure persisted and most options closed cent lower. Business was always heavy. Local receipts were 226 cars, none of contract grade; Minneapolis and Duluth re-ported 72 cars, a total of 298, against 511 last week and 379 a year ago. Primary receipts were 1,037,000 bu, compared with 912,000 last year. Seaboard clearances in wheat and flour equaled 313,000 bu. Ar- CAPITAL \$100,000 gentine shipments were 48,000 bu, against

light demand. Receipts were more liberal and the sentiment was generally bearish. The cash demand was fair, but had little effect. September sold from 31%c down to 30%c and closed weak %c lower at 31c.

PROSPECTUS ON APPLICATION. THE GREAT NORTHERN PORTLAND CEMENT CO. Owns 6,200 acres

and Newaygo counties, Michigan. It has located there the town of Marlborough, on the main line of the Pere Marquette Railway from Chicago to Bay View, and directly connected by rail with the lake port of Ludington. There are about 4,200 acres of break of 2%c. Corn came from all quar- marl beds and 1,000 acres of clay, sufficient to make 12,000 barrels of cement every day ters, both from longs and shorts. Stop for twelve years. A conservative estimate of the value of these beds is \$2,000,000.

The company also owns buildings and machinery to the value of \$325,000, and light buyers, but the demand for covering residence and business property and lots in Marlborough worth \$300,000. The entire proceeds from the present sale of stock will go to increase the facilities of the present plant, and by October 1 it will be turning out 2,000 barrels per day at a

net profit of several hundred per cent. May 38%c. Bulls were simply terror-strick-en. One story that went the rounds was
