

YOU certainly want to save money, and you would like to have better bakings. Then use Calumet. It's the biggest thing you can do to improve the quality of your bakings—and lower baking costs.

Calumet is made in the largest, most sanitary Baking Powder Factories in the World. No Baking Powder is made under better conditions—none can be better in quality.

It contains only such ingredients as have been officially endorsed by the U. S. Pure Food Authorities. An absolute guarantee that it is pure.

It received highest Awards, World's Pure Food Exposition, Chicago—Paris Exposition, Paris, France—positive proof of its superior merit.

It is used by more housewives, domestic scientists and chefs than any other brand. That would not be the case, if it were possible to secure a higher quality leavener.

It is sold at a moderate price. All you have to do is to compare costs to determine how much you can save by buying Calumet.

Pound can of Calumet contains full 16 oz. Some baking powders come in 12 oz. instead of 16 oz. cans. Be sure you get a pound when you want it.

Calumet Cream Cake Recipe

—3 cups pastry flour, 1 level teaspoon Calumet Baking Powder, 1/2 cup butter, 1/2 cup granulated sugar, 2 eggs, 1/2 cup cold water, Whites of 2 eggs, 1 teaspoon orange extract. Then mix in the regular way.

GREAT SAVING IN PHOSPHATE NOW POSSIBLE

The United States owns the richest and most extensive phosphate fields in the world. Heretofore heavy annual wastes of valuable phosphatic material have occurred during the mining and manufacturing processes. A new method of controlling these losses devised by the United States Department of

Agriculture consists in mixing the "run-of-mine" phosphate with sand and coke and smelting the mass in an electric fuel-fed furnace. In this process, the phosphoric acid is driven off as a fume and may be readily collected in concentrated form. Millions of tons of phosphates previously wasted will be saved potentially as result of the perfection of this new reclamation system.

EXPERIENCE, THE TEACHER

Our news columns today tell of two prominent citizens of Flagstaff who started from that city last Saturday afternoon for Grand Canyon via the new Maine road, and after encountering impassable mud fifteen miles from the Canyon, were compelled to spend the night without food or bedding on the broad expanse of Coconino's wide domain.

It will be recalled that last spring when discussion of the proposed road from the Old Trails Highway at Maine to Grand Canyon was under headway, the News pointed out numerous reasons why the board of supervisors should hesitate to construct this road, and among which was the fact that at best it would never prove more than a "dry weather" thoroughfare. We had consulted practically every old-timer in western Coconino upon the subject, and without exception the verdict was that such a road was impractical from the standpoint of making it a permanent all-the-year road; that the rains in the north come in July and August, just at the time when travel over the proposed road would be greatest, and that after any hard summer rain the road would be impassable; that the first community in Coconino to become snow-bound in winter is that of Spring Valley, and the last to emerge from hibernation late in the spring is the same locality, through which this road passes, and in order to reach which the traveler must attain an elevation of over 7000 feet near the old Baumgartner ranch. These conditions, as we pointed out at that time, preclude the possibility of the road ever amounting to more than a six months road, and that in view of these facts the Williams-Grand Canyon road would have to be maintained anyhow.

The experience of the two Flagstaff gentlemen last week was by no means an unusual one with travelers over the new road. There is not a service station at either Grand Canyon or Williams but that can tell of innumerable other instances of a similar nature gleaned from mouths of indignant tourists. As a matter of fact a Cadillac touring car met with the same fate experienced by the Flagstaff gentlemen on the same day at almost the same spot.

It is hardly necessary to state that the two Flagstaff gentlemen returned to Flagstaff over the "abandoned" Williams-Grand Canyon route.

ACTIVITIES FOR BETTERING NATION'S HEALTH

Thirty-five Red Cross Health Centers in the Pacific Division are now contributing their quota to the nation-wide effort to raise the standard of vitality of the American people. In addition to these, are such other Health Centers as that of Alameda County, Berkeley, Chico and San Luis Obispo, in California, to which the Red Cross has contributed service either through its Senior or Junior Organization. Several others, which are now being equipped, will open in the near future.

Scientific supervision of children's development is the most popular activity in these centers. The effort in this work is to help normal children to become superior children by checking, at their beginning those defects which retard growth. Another popular undertaking of the same kind is the dental clinic. The Santa Rosa Health Center conducts a psychiatric clinic twice a month. Free treatment for infected eyes was arranged for by another center to combat a local epidemic. Prenatal work

is a feature of other centers. Information and literature may be secured from any of the Health Centers telling how to keep well yourself and how to keep your family well.

Classes and health study clubs are fostered, and occasionally recreational features are added both for grown-ups and youngsters, depending on the local need for such work.

This constructive and beneficial program has gone forward with rapid strides throughout the United States under the stimulus of the Red Cross, showing the nation's belief that there is patriotic work to be done in peace as well as war times.

Miss Rauch, Division Representative, emphasizes the fact that every Red Cross membership in the coming Roll Call will mean a vote for a healthier nation.

They Dip Oil Up In Buckets In Bolivia

Wash., Sept. 30.— They dip oil up in buckets when they need it in some parts of Bolivia, Trade Commissioner W. L. Shurz asserts in a department of commerce hand book on that country given out today. The surface accumulation of oil due to natural seepage, the book declares, is most evident in the country west of the Santa Cruz-Yacuiaba trail.

Making Extraordinary Mileage a Certainty

Car Owners want more rubber on the tread where the wear is hardest; more gum between cord plies to perfect a resilient and powerful carcass. And they want a scientifically constructed Non Skid tread with all angles and contacts to resist skidding and give sure traction. Firestone Cord Tires have met these demands of the car owners.

Read Letters Below

Records from 29,000 to 57,000 Miles

Cord Tires built the Firestone way could not fail to produce mileage. Every day, from all over the country, comes the word that 10,000, 20,000 or 30,000 miles are frequent and consistent records.

Now and then they are emphasized by unusual instances such as quoted below. Performances like these demonstrate the ultimate possibilities of Firestone Cords under careful driving.

Sept. 10, 1921

Firestone Tire & Rubber Co., Jacksonville Branch, Jacksonville, Florida.

Gentlemen:—

I submit herewith the history of a 33x4 Firestone Cord tire. This tire has run 57,000 miles. I have retreaded it seven times. The average mileage to each retreading was about 7,000. I think you will agree this is a remarkable record. It is especially unusual as I know the owner to be a severe driver. However, he gives his tires proper inflation. The tire in question is not yet out of service and has every indication of being sufficiently strong for another retread. I am mailing photographs under separate cover.

C. U. Penney, Plant City, Fla.

Sept. 2, 1921

The Harvey R. Mack Co., Thirteenth & Harrison Place, Minneapolis.

Gentlemen:—

It occurs to me that you might be interested in the mileage that I obtained from the set of Firestone Cord tires on my Dodge coupe. The first tire went over 29,000 miles. The second tire rolled up a mileage of between 34,000 and 35,000. These were both rear tires and had been cut considerably by chains. The two front tires have gone better than 35,000 miles and are still in good condition. I expect to get at least 40,000 miles from each of them. I need scarcely say that the Firestone Cord will be my tire choice for the future.

Archie H. Beard, 522 LaSalle Bldg., Minneapolis.

FABRIC 30x3 1/2 NON SKID EXTRA SIZE \$13.95

In this fabric tire as in our cord tires only Firestone resources and experience can provide this quality at this price.
