Mr. Bush keeps the seventh day as the Sabbath or rest day. This is well known to everybody in the community who knows that gentleman.

There has been a machine patented in California for cultivating sugar beets which does the work of twenty men and two horses, and, owing to superior cultivation, increases the yield of beets from two and one-half to five tons to the acre.

MR. BLOUNT'S INSTRUCTIONS.

Hon. James H. Blount's instructions from the Secretary of State of the United States, which the Bulletin had the honor of presenting for the first time to the public, contain nothing contrary to the opinions held, from the first until now, by the opponents of the revolutionary scheme of annexation regarding the Special Commissioner's mission to these Islands.

Another Touchstone. Honolulu, May 13, 1893. In an article last week the Star man threatens to get into personal journalism. He should remember Punch's advice to those about to marry, "don't." At least one half of our 400 here live in glass houses, and if stone throwing should become fashionable, Messrs. Konyon and Bush would certainly be artists in that line and the result would be disastrous.

German Syrup. "We are six in family. We live in a place where we are subject to violent Colds and Lung Troubles. I have used German Syrup for six years successfully for Sore Throat, Cough, Cold, Hoarseness, Pains in the Chest and Lungs, and spitting-up of Blood. I have tried many different kinds of cough Syrups in my time, but let me say to anyone wanting such a medicine—German Syrup is the best. That has been my experience. If you use it once, you will go back to it whenever you need it. It gives total relief and is a quick cure. My advice to everyone suffering with Lung Troubles—Try it. You will soon be convinced. In all the families where your German Syrup is used we have no trouble with the Lungs at all. It is the medicine for this country." G. G. GREEN, Sole Man'fr., Woodbury, N.J.

Washington by the Provisional Government's Commissioners, supplemented by the prejudiced and well-stuffed communications of newspaper correspondents. More interesting if not more important than the contents of his instructions from the Secretary of State is the terse prescription given by the Commissioner himself, in his communication to the Hawaiian people, of the status of American citizens participating in any conflict between parties for supremacy on these islands. This is in conformity with the law of nations in similar cases provided, with which citizens and subjects of different Powers, who desired to know, were made acquainted at the crisis of 1887. To what extent American citizens who took up arms for overthrowing the government of this country, friendly to their own, were encouraged to rely on the support of their nation's strong arm, and by whom any such encouragement might have been proffered, are other questions that may as well be left to Mr. Blount's inquiry for solution. In this as in other respects the opposition can afford to maintain its unvarying coolness and patience, joined with confidence that the United States will not uphold wrong committed in her name, and the subsidized and mercenary press might with advantage to its feelings at a later stage try to imitate the same condition of equanimity. Americans who are opposed to filibustering and violence will be prouder of their great nation than ever as they read the words in which President Cleveland's representative assures the law-abiding and peace-loving of his fellow-citizens on this foreign strand that they will be protected in any emergency:

"While I shall refrain from interference between conflicting forces of whatever nationality, for supremacy, I will protect American citizens not participating in such conflict."

EDITOR BULLETIN:

At least one half of our 400 here live in glass houses, and if stone throwing should become fashionable, Messrs. Reputations would be ruined, statuses tumble from their pedestals, angels have their wings clipped and their halos sadly tarnished. So I should advise the learned Medico to prescribe for W. G. S. He needs it very badly. But how Elder J. E. Bush's record in Samoa can have any more effect on the present political situation than the sun spot theory of the Rev. S. E. Bishop is a puzzle to

One of the best moves of the Provisional Government is the creation of a Department of Agriculture and appointing such a practical man as Mr. Marsden as Commissioner. The horticulturist and gentleman farmer have been yearning for something to fill this large aching void in this respect and their wants are now satisfied. The grocer whose stock of good things is mixed with garden seed, red herring and other bric a brac feels safer in the seed department of his business under the guardianship of a commissioner of agriculture. The farmer may feel safe in planting seed according to the directions in the catalogue and may be reasonably sure that they will resemble the portrait on the outside of the package. Heretofore one could never feel sure when they planted a package of lima beans whether beans or wild parsnips would be the result. Under the influence of a Commissioner of Agriculture seeds are guaranteed to come up as represented. The man who planted in joyous laughter the seeds of the ostensible pansy and carnation only in tears to reap the bachelors button and the glistening foliage of the sorghum will now rest easy and get rid of his insomnia. He can now plant the seed of the Morning Glory and the Moon flower and have the front of his house look like a florist's advertisement in the Century Magazine; no more danger of a bunch of Norway oats and a hill of corn trying to climb the strings nailed up for non-resident vines. The Commissioner of Agriculture will see to these things even though he neglect to tell you that the ingredients for an insecticide strong enough to rid the country of the McKinley blight can be obtained from us. Leave your orders.

Speaking of agriculture reminds us of the Hendry Breaker about which we have written occasional thoughts. We have sold plenty to plantation managers who have had more or less difficulty with plows until they hearkened to the voice of the inventor and bought the Hendry and what they now say is the best breaker in the world. The roots seven feet deep and stones as close together as you find them in a Vermont pasture have no depressing effect upon him now, his plow scours all right and work comes easy. Any man who desires to make plowing a pleasure can do so by using a Hendry Breaker.

The dry months are rapidly approaching but the promised pumping plant for Makiki remains in embryo. Private citizens feel the necessity for water and suggest the Aermotor as the best means of securing it. If we were to recommend it here people would say we have only selfish interests to serve; for that reason we refrain from saying publicly that it is the best windmill on earth and that it will pump water while other mills stand idle, that with the tower and wheel being galvanized you have a sure thing against rust and wear. There are other good points we could tell of and will when you come in to inquire about them.
