

National Cane Shredder

PATENTED UNDER THE LAWS OF THE HAWAIIAN ISLANDS

THE UNDERSIGNED HAVE BEEN APPOINTED SOLE AGENTS FOR THESE SHREDDERS AND ARE NOW PREPARED TO RECEIVE ORDERS. The great advantages to be derived from the use of the NATIONAL CANE SHREDDER are thoroughly established and acknowledged by Planters generally.

The large number of Planters using them in the United States, Cuba, Argentine Republic, Peru, Australia and elsewhere, bear witness to the above claim.

The use of the SHREDDER very largely augments the quantity of cane-mill can grind (25 to 30%), also the extraction of juice (5 to 12%).

It is a great safeguard, making known at once the presence of any pieces of iron, stakes from cars, or anything which would be liable to damage the mill, and allowing ample time to remove same before damaging the mill. The SHREDDER is very strongly made, and from the manner of its operation it cuts or tears these pieces of wood or iron without often breaking the SHREDDER; and if anything breaks, it is simply some of the knives or cutters, which can be quickly and economically replaced. The SHREDDER, as its name indicates, tears the cane into shreds of varying lengths, perfectly opening it and allowing the mill to thoroughly press out the juices without requiring the immense extra power necessary to grind or crush the whole cane. The SHREDDER spreads the shredded cane uniformly and evenly to the mill rolls, and does away with the necessity of spreading the bagasse by hand between the mills, where regrinding is in use. No greater amount of boiler capacity is required to operate the SHREDDER than that which was sufficient for the mill, for the above reasons. We furnish full working drawings for the installation of our SHREDDERS, enabling any competent engineer to successfully install and start them.

In ordering SHREDDERS from us, please send small sketch, showing the diameter and width of the mill rolls with which SHREDDER is to be connected, also the side (either right or left hand as you face the delivery side of the mill), upon which the mill engine is located, also the height from floor line to center of front mill roll shaft, and distance center this shaft to front end of bed plate. These SHREDDERS are now being used by the Hilo Sugar Co and Hawi Mill, Kohala, where they are giving great satisfaction.

Prices and further particulars may be had by applying to

EVERYTHING LOVELY.

The Official Deputation Compose the Ewa Trouble.

Deputy Marshal Brown and C. A. Doyle, the Japanese court interpreter, returned to town from Ewa on the first train this morning, after having satisfactorily adjusted the trouble between the Japanese laborers and the Ewa plantation management.

The Deputy Marshal, Mr. Doyle, G. O. Naayama, K. Okkots and G. Narita, Secretary at the Japanese Legation, left yesterday afternoon for the plantation. On arrival they found the Japs in a state of disorder. Mr. Doyle addressed the delegates, who would impart their grievances to the visitors. This was done. It was found that the Jap who had been cut had not taken the trouble to wash the blood off him.

Dr. Peterson was immediately brought and he dressed a small cut over the man's left eye.

The men were then heard. They had several grievances, the principal ones being that they were given insufficient wood and they could not buy their goods in town but were compelled to buy all their stuff at the plantation store. This latter grievance was met by Manager Lowrie with the explanation that when the men were getting their goods from town they were in the habit of buying five-gallon kegs of wine and selling it to the men on the plantation. Other petty grievances were stated, which were all quickly disposed of.

Mr. Brown addressed the laborers through the interpreter to the effect that all people resident in Hawaii were subject to the country's laws, and if the plantation policeman had assaulted the Jap, the injured man had redress in the courts of law. The Jap could get out a warrant any time if he felt satisfied that the other was in the wrong.

The delegates considered that the aggrieved man, who had five witnesses to the assault, had not sufficiently recovered to undergo the exertion of procuring a warrant, but they hoped he would be able to do so in a few days.

Mr. Doyle then requested the men to go to work, and they readily assented. The men started to work at 6 o'clock yesterday evening and at 9 o'clock the mill was running in full blast. Manager Lowrie was the happiest man about the plantation when everything was again in working order.

Mr. Narita stated that in his opinion the Japs were entitled to full civil rights, and therefore had a perfect right to buy and use wine if they so desire.

Interpreter Doyle elicited the information that the principals in the strike were late arrivals by the Aikoku Maru. They claim they were involuntary contract laborers. They came here under offers made them in Yokohama. On arrival here they found they could not land unless they had \$50, or would sign as contract laborers. The men were working all right this morning.

Life Is Misery

To many people who have the taint of scrofula in their blood. The agonies caused by the dreadful running sores and other manifestations of this disease are beyond description. There is no other remedy equal to Hood's Sarsaparilla for scrofula, salt rheum and every form of blood disease. It is reasonably sure to benefit all who give it a fair trial.

Hood's Pills cure all liver ills.

LUCOL ::

IS THE

BEST PAINT OIL!

Save Half the Amount of Your Oil Bill Through Saving in Pigment.

Every painter should use Lucol instead of Linseed Oil, because:

1. Lucol is more durable than Linseed Oil.
2. Lucol is more economical than Linseed Oil.

PROOF THAT LUCOL IS MORE DURABLE.

Six years of actual use in exterior house painting in California (the most trying climate for paints), in the burning heat of the Arizona Desert, the Arctic cold of Alaska, and on the Atlantic coast, have fully and practically shown that Lucol, always outwears Linseed Oil under the same conditions. All the acid works in San Francisco have discarded Linseed Oil for Lucol.

ILLUSTRATE THIS YOURSELF.

Put strong ammonia on Linseed and Lucol paints. The Linseed paints are destroyed in a few minutes; the Lucol paints are practically unaffected.

PROOF THAT LUCOL IS MORE ECONOMICAL.

Break up 1 1/2 lbs. paste white lead in one pint of Lucol, and the same quantity in one pint of Linseed Oil. Spread the paints on similar dark paint spreads as far as and covers much better than the Linseed paint. To get equally good covering with the Linseed paint you have to use 2 1/2 lbs. of white lead to one pint of Lucol Oil. This means a saving of 1 lb. of paste lead to each pint of Lucol used, or 6 lbs. to every gallon, equivalent to your saving more than half the first cost of the Lucol.

Lucol is not in competition with cheap Linseed Oil substitutes.
