DEPARTMENT OF FINANCE.

Under Article 35, Section 1 of the Constitution, it is required that each member of the Cabinet shall make an annual report of the transactions within his department during the year ending December 31.

The Minister of Finance takes this occasion to request all those having claims of a monetary nature, to present them to this office through the proper departments not later than the 10th day of January next, after which date the books will be closed.

All persons having moneys on account of the Government are requested to make their returns promptly, in order that there may be no delay in closing the accounts for the year ending December 31, 1894.

S. M. DAMON, Minister of Finance.

Striking at Honolulu—Olympia May Come Here.

The Yorktown is over in the China waters and on her way toward the seat of war. While entering the harbor at Honolulu she struck a sunken reef, but no damage was done. It is understood that the commanding officer of her has requested the Navy Department to order a court of inquiry to be held to ascertain where the responsibility lies.

Should the Philadelphia be ordered down to the Hawaiian Islands it is expected that from there she will be sent either to the South American coast or else over to China, where the last galley yarn reported she would go.

The Mohican is about ready for sea, as is also the Bennington. The commanders of them or the Alert have not any information to impart as to where they will go.

The executive officer and navigator of the Adams were found guilty by the court-martial recently convened at the Navy Yard, for their responsibility for running the ship on the rocks up at Behring Sea, and sentenced to suspension for one year, with recommendations for clemency, which has been shown by Secretary Herbert in reducing in each case the suspension to six months.

Commander J. J. Brice, U. S. N., is at present at El Paso, Hobbs Springs for the benefit of his health, where he will remain for at least a week or ten days.

Captain D. W. Mullan arrived in San Francisco a few days ago to take command of the Mohican, lying at Mare Island. He was stationed at New Orleans for three years prior to coming to this station. At one time he had command of the Nipsic and was on her during the great storm in Apia harbor when the Trenton and Vandalia were lost. His gallantry in that trying ordeal has been recounted, and since he left here, it has been substantially remembered by his native State, Maryland. The Legislature adopted complimentary resolutions in his honor and presented him with a handsome gold watch.

Captain Mullan represented the United States in Chile during the war between that country and Peru. General Bagulidano of the Chilean army appointed him on his staff and he was at the front in every engagement. The Government of Chile has presented him with a medal, which has not yet been accepted pending the action of Congress in the matter. This is Mullan's fourth visit to the Pacific Coast.

It is expected that the Ranger and Bennington will be ordered to cruise along the South American coast with special instructions to look after American interests in Peru.

The recent troubles in the Central and South American republics has suggested the necessity of narrowing the limits of the Pacific station and it has been concluded to divide it into two parts. For the long range of waters from Alaska to Callao there is only one station and one flagship with headquarters at San Francisco. Hereafter there will be two stations, one from Panama north to Alaska and the other from Panama south. The flagship of the northern station will be the Olympia, with headquarters at San Francisco. The Philadelphia will be the flagship of the southern squadron, with headquarters at Callao. This will mean another Admiral for the Pacific coast, whose name will be made known at some future date.

Timely Topics

December 29, 1894.

The movement to widen Beretania street from Punchbowl street to the Nuuanu stream is a matter which should receive the favorable consideration of the government because it is of interest to every one. It comes directly under the head of improvements and a petition to Minister King would probably have his approval when it was brought up for consideration. There are not many finer drives than on Beretania street from Punahou street to Punchbowl street, but there the squeeze begins and the good road ceases. To widen the street would not benefit any one man or set of men, the benefit would be to the masses. Good roads are as much an advertisement for a community as anything else, visitors are influenced one way or another by the pleasure derived from a drive through a city; if the streets are narrow and the roads poor they are apt to say the people in authority are "just a little Peoria," if on the other hand, they are broad and smooth the solons are said to be "up to date." Washington, D. C., owes much of the favorable comment passed upon it to its elegant streets; they are written and talked about so much that they are as well known as the Capitol itself. The streets of Honolulu are well known to people who visit the place, but the acquaintance may be strengthened by widening Beretania street.

The Dietz Oil Stove is as good a thing as anyone wants in the kitchen. It bakes, boils, broils and fries as well as a coal or wood stove at less cost and in less time. We consider the Dietz as good an oil stove as is made—the people who have purchased them agree with us. Enamel Bath Tubs are the most serviceable things a man can have for his bathroom—they will outlast Old Time himself and always look new. They cost more than a zinc lined tub, but an enamel one will outlast a dozen of the others, consequently it is cheaper in the long run to buy a good one in the beginning. There's no reason in the world why a bathroom should not be at all times as presentable as a parlor, but it will not be if the tub is dirty—you can't keep a zinc tub clean any more than you can keep a polish on a piece of lead. You can get almost any size and finish tub you want from us. We are in the line of advancement in Western Civilization, and as the town fills up with strangers, we must expect to find among new arrivals people who neither toil nor spin for a livelihood. Against such people you want to lock your chicken house and put away your valuables. We are selling the Victor Iron Safe, in sizes suitable for your business or your dwelling. This is the safe most used by Postmasters in the United States and will be here once it becomes known that we are selling them. Refrigerators are selling rapidly with us, possibly because people are getting ready for the new order of things in the ice business. We have the stock and can show you almost any size and in any style.
