LEGISLATURE IN SESSION.

ed to be in the nature of a permit or license. Practically, they have the effect of a license since arrests for prostitution are rarely made, if ever.
Its objectionable feature is that it recognizes and provides free medical treatment for that which, by other laws, is made a punishable offense, thereby placing the government in a position inconsistent with itself.
We concur in the opinion commonly held, that the evils under consideration cannot be suppressed, but believe it may be abated and its attendant results mitigated to a greater extent than heretofore, by the stringent regulations and surveillance provided for in Bill No. 24.
To this end the Committee offer several amendments and a new section to be numbered Section 10, which reads: The sum of \$2,400, appropriated to the uses of the Board of Health for the purpose of carrying out the provisions of the Act to Mitigate, in an act approved April 30th, 1896, is hereby made available for use by the same Board for the purpose of carrying out the provisions of this Act, and the additional sum of \$2,000 is hereby appropriated out of the current receipts of the general revenue of the Republic, for the same purposes.
The joint resolution of the House and Senate committee on the design for a great seal was reported upon by Rep. Robertson for the select committee, who stated that an agreement had been reached, and the resolution was adopted with the following amendments: The alteration recommended by the Senate committee replacing the bars in the first quarter of the shield by the Hawaiian Jack. The change in the motto of Kamehameha I, and the suggestion to replace the Phoenix by Diamond Head are not adopted. The amended resolution was adopted.
Rep. Robertson presented two bills, one amending the Civil Code and the other defining and providing a punishment for malicious injury and amending Sections 1 to 8, Chapter 23, Penal Code. Both passed first reading and were referred to the Printing Committee.
Under a suspension of the rules Rep. Robertson read a petition from fifty Chinese merchants carrying on business as retail traders in foreign products, under license as required by law, and there being now before the Legislature an Act regulating the several license laws in such a manner they deem would work them an injury they therefore pray that the existing license laws regulating retail trade be maintained. Petitioners state that increasing the number of licenses for the sale of goods and wares, which are at present under one license, means additional expense without corresponding benefits and so unjust an increase in expenses means bankruptcy to the petitioners, many of whom are merely carrying on their business in the hope of better times.
House Bill No. 6, which has passed the House and been referred back from the Senate with some amendments was read for the first time. Section 1, was not concurred in but the rest of the bill was and was referred to the joint conference committee.
House adjourned at 11:25.

simply used as bait, won't bring permanent business. We want permanent business. We are getting it too. The regular every day dealings, where we save our patrons money on every purchase, is telling in our favor.
It isn't our policy to advertise prices and after a while put them back where they were originally. When we cut prices, we never put the price back. Our business methods are fair, square and above board. We do just as we say we will. We live up to everything we advertise.

TO THE AGRICULTURAL DEPARTMENT.

The : Secretary : Disk : Plow.

AGRICULTURAL COLLEGE, MISS., Jan. 29, 1896.

DR. C. W. DABNEY, Washington, D. C.

DEAR SIR: Yours of recent date in regard to the "Secretary" plow has been on my desk some days, but I delayed sending a reply in order that I might send some photos which go with this.

Deere & Company sent one of the plows, the first one which was completed, to this station, and we gave it a very thorough test in December last. The ground on which it was used was a field which had never been plowed more than six inches deep, and which had been in red clover for three years. With three good mules we were able to plow ten inches deep without making the work too hard for the team, and by working slowly a part of the ground was plowed to a depth of fourteen inches. The plow certainly does better work than I have ever seen done with any other implement. S. M. TRACY, Director.

Mr. Tracy, in a letter to Deere & Company, says: I have never seen ground left in as good condition after the plowing, the furrows being thrown so as to pulverize the soil more thoroughly than can be done by an ordinary plow, and all trash and weeds were completely turned under.
