

BY AUTHORITY.

Notice to Corporations.

In conformity with Section 1441 of the Civil Code, all Corporations are hereby notified to make full and accurate exhibition of their affairs to the Interior Department on or before the 31st day of July next, the same being for the year ending July 1, 1896.

Blank forms for this purpose will be furnished upon application to the Interior Office.

Upon failure of any Corporation to present the exhibit within the time required, the Minister of the Interior will, either himself or by one or more Commissioners appointed by him, call for the production of the books and papers of the Corporation and examine its officers touching its affairs under oath.

J. A. KING,
Minister of the Interior.
Interior Office, May 21, 1896. 310-31

MEDICAL CONVENTION.

The proceedings of the Medical Convention which has been in session during the past week came to an end last night. They have not been of material interest to the public generally or they would have been given more prominence in these columns. The adoption of the California fee bill last night, however, directly concerns the public. This doubles the rates heretofore charged by the leading physicians, and it will be readily seen that people of ordinary means will no longer be able to afford the luxury of getting sick. Ordinary visits in the daytime will cost \$5; night visits from \$10 to \$20; consultation fees are \$10 to \$25, to be charged each time by each physician attending; ordinary obstetrical cases from \$25 to \$100. Major operations of the first class will cost from \$500 to \$1000; second class \$250 to \$1000; minor operations of the first class \$100 to \$250; second class \$20 to \$100. Administration of anesthetics, vaccination, microscopical examinations and other extras of various kinds are additional charges.

Only about one quarter of the physicians in the city were present to vote on this fee bill, and it looks as though many of them stayed away on purpose. There is little doubt the public generally will resent the exorbitant charges made and hereafter grin and bear many of the ills which flesh is heir to rather than call in a physician, the payment of whose fees would impoverish nine out of ten laboring men.

The action of the Board of Health in limiting the press to one representative "to be agreed on by the different papers" on the present trip of the Board to Molokai was extremely stupid. No man can serve two masters, let alone three or four newspapers, even if the latter could agree on a representative. When the BULLETIN wishes to send a reporter to Molokai it will present its request in due form and it is hardly likely it will be refused. The settlement was so thoroughly written up six months ago in all the papers that everything concerning it is still fresh in the public mind, and a report of the present visit of the Board is unnecessary.

Senator Waterhouse did well to call the attention of the Senate to the slight put upon its members by the action of the Board of Health in not notifying the Senate of the proposed trip to Molokai or extending an invitation to the Senate Committee on Public Health to visit the settlement. He said it was on a par with the discourtesy shown the press.

HILLO NEWS AND NOTES.

Continued from 1st Page.

At Lahaina the steamer W. G. Hall was met and yielded up files of the Advertiser and Bulletin which were the occasion of turning the saloon into a reading room.

News of the death of Kate Field, carried verbally by the steamer Kilanea Hou's company, caused deep and general regret at Hilo.

The passage from Lahaina was pleasant on the whole, the only heavy swell being while weathering the cape. There was some good native singing by the sailors, aided by people who came on at Makana and led by John T. Baker.

Mr. Brasch growled a little at a fellow in front of his stateroom who was practicing for the Legislature, apparently, so volubly did he conduct a discussion among the deck passengers in that quarter. He disregarded all adjurations to kulikuli until he was good and ready for the previous question near midnight.

At three o'clock the good ship was steering by the glare of the city's lights over the isthmus of Waialae, which Captain Clarke says has proved a very good navigating convenience. The whole trip seems to have been enjoyed by all the passengers. A good table is set on the Kinau four times in the twenty-four, and coffee and toast can be had at any hour by a hungry or restless passenger. Captain Clarke and all his officers and their assistants study the comfort and pleasure of the people committed to their charge on the briny track.

More of the islands and their chief industry can be seen on the Kinau route than on any other. The scenery visible along the windward coast of Hawaii skirted by this well-appointed steamship is unparalleled in the group. It includes Haleakala, the mountain having the largest extinct crater in the world, and the other rugged mountains of Maui; plantations, mills, villages and ranches on the same island; on the premier island of Hawaii the triplet giants—Mauna Kea, Mauna Loa and Hualalai mountains, with their snowy crowns, and Mauna Loa sometimes belching out fire and smoke from its summit, together with the splendid chain of sugar plantations running parallel and close to the awfully rockbound shore, for scores of miles leading into and past Hilo town. Down the often lofty and perpendicular cliffs forming the front wall of these plantations are hundreds of cascades supremely beautiful plunging from great heights into the sea. Caves, natural arches of land springing out over the surfs, deep gulches, winding roads, graceful and lofty flame trestles, smoking sugar mills, immense fields of cane luxuriantly green or whitening to the harvest, curious and varied apparatus for loading steamers under difficulties, an everlasting fringe of surf, all these things engage the eye and maintain the eager interest, especially, of the stranger unused to such scenes.

At five o'clock the steamer is passing into the harbor. Four weeks away from Honolulu, and not once in that time under a mosquito net!

This is the day of the Gleaners' Lawn party at Hanaelea Lawn this afternoon. Go there after the ball game.

Still left in the Waterhouse bargain sale some table covers, Terry quilts, sheetings and pillow cottons, no more can be had at such prices when these are gone.

There is much discussion about town relative to the fee schedule of physicians. Several doctors deprecate its adoption, saying that it is in their opinion altogether too high.

The members of Geo. W. De Long Post, No. 45, will attend the evening service of the Methodist church tomorrow in a body. Veterans of the United States Army and Navy, Sons of Veterans, and visiting friends are invited to attend.

The Catholic Cathedral and grounds are being profusely decorated for tomorrow's service, Whitsunday. Flags and bunting ornament the front of the building and the grounds on the mauka side are transformed into a street, with booths, tents, etc., in gala dress.

Timely Topics

— OR —

A FEW WORDS ON BICYCLES AND CUTLERY.

In a Coast newspaper devoted to the bicycle business we read that dealers in bicycles are authority for the statement that the business aspect of the bicycle trade has materially changed during the past year. Instead of the main business consisting in dealing with men's wheels, quite the contrary is true. Dealers are now doing their utmost to attract the eyes of the women. All of which shows that the ladies are taking very kindly to bicycle riding all over the world. And it is the same here, the demand for ladies' wheels is continually increasing. We have received five of the TRIBUNE LADIES' WHEELS on this steamer and have more on the way. These wheels are of this year's make, direct from the factory, no back numbers, and have all the latest improvements.

We have also a number of Tribune racers and gent's roadsters, and a number of "Zimmy" wheels. This is an entirely new machine, named after the great rider, Zimmermann, and we shall be pleased to explain its merits to intending purchasers.

But we started in to say a few words on CUTLERY, of which we received an immense assortment on the Australia, which is now unpacked and on exhibition. In table cutlery we have an immense variety in new and elegant patterns and all sizes. In pocket cutlery we have a number of new designs. Knives to cut lead pencils and knives to trim your finger nails with, and knives to cut down your expenses with. We have pruning knives which are just the thing for the members of the Legislature to use in cutting down the appropriation bills, and some suitable for the Advertiser man to do his "cheese-paring" with. In fact we have all kinds of knives, large and small, light or heavy, but all of them of the best quality and manufacture.

We have carving knives with ivory, buckhorn or bone handles, butcher knives, skinning knives, knives with corkscrews in them for camping out or staying at home. In fact we have all sorts of knives suitable for all sorts and conditions of people.

Last Week's Steamer

brought us some of the handsomest little gold chatelaine watches ever seen. Beautifully enameled in reds and blues, set with diamonds, and without them; others with rows of pearls and other gems. All made to run and keep good time.

All have handsome gem set brooches to match, and the "toot and scramble" of the whole is truly beautiful. They belong to a class of watch not heretofore imported, and we take pride in showing them to our customers. The prices are not as high as one would imagine for such high grade goods; ranging from \$50.00 up.

Our small oxidized chatelaine watch at \$6.00 must also not be overlooked. For a watch costing almost nothing; running well, and rich looking, this cannot be equaled by anything we have seen.

Our agency for one of the best Swiss watch manufacturers, enables us to place before you, designs which are exclusive and unique, and movements which for time keeping qualities cannot be excelled.

You will be surprised how fine a "Non-magnetic" silver watch we can sell you for \$14.00. One that will resist all magnetic influences; which in this age of electricity is a point of incalculable value. No matter what grade of watch you are going to buy, ours is the stock to pick it from; because no other stock is half as large, no other stock contains the exclusive patterns, and no other prices can come down to ours; AND WE GUARANTEE EVERY SCREW in them.

H. F. Wichman NOTICE.

The British Commissioner and Consul General regrets that owing to the bad state of his health he will be unable to hold a Reception this year in honour of Her Britannic Majesty's Birthday.

W. W. DIMOND'S

The report of three physicians connected with the Board of Health on the condition of the water which the people of Honolulu drink is valuable, if for no other reason, that it gives one time to select the right company to insure one's life with, and to make necessary arrangements for cemetery lot and undertaker.

If the citizen who prefers life to uncertainties, the inconvenience and bother of treating Bright's disease or fever may be easily avoided by an investment in the proper sort of filter. We have one made of natural stone, the water being filtered through a cylindrical disc. This disc is easily removed for cleansing and may be made perfectly clean by a moment's brushing.

The filter has not been named yet, but another, identical in shape and manufacture is called the Success. Ours is just as good without a name and costs a dollar less. You see, the name amounts to something. We have also a stock of the Gurney improved refrigerators and ice boxes, some of which have water tanks and taps, in which filtered water may be kept cool.

Dr. W. W. Dimond
Von Holt Building.

Auction Sales by Jas. F. Morgan.

COFFEE ESTATE AND LANDS For Sale.

I am directed to sell at Public Auction on Wednesday, May 27, '96, at 12 o'clock noon of said day at my sales rooms on Queen street, in Honolulu (unless sooner disposed of at private sale) the following described property, namely:

A tract of land of about 2,500 acres in fee simple situated at Kolo and Oleloa in the South Kona, Island of Hawaii, about eight miles by a good road from Hilo, one of the largest villages in Kona. There is an excellent building on the land itself from where the coffee and other produce could be shipped and a good site for a mill near the landing. Fifty acres of land are in coffee. Roughly estimated there is about seven hundred acres of splendid coffee land lying all on one block on both sides of the Government Road. Eight hundred acres lying above and to the East of the seven hundred acres above mentioned is also excellent land and although at a higher altitude is no doubt also well adapted for coffee culture. The lower land below the coffee belt is suitable for pineapples and sisal. There is a drying house, store and work-rooms, a Gordon's Pulper, laborers' quarters and water tanks at the plantation, and the land is partly walled. There has never been any blight on this land, although coffee was planted a great many years ago. Old residents of Kona like the late D. H. Nahunu, J. W. Kuaimoku and others have testified to this fact. There is a sea fishery appurtenant to Oleloa in 1.

Terms cash or part of the purchase price can remain on mortgage at eight per cent per annum. Deeds and stamps at the expense of purchaser.

A map of the property can be seen and further particulars obtained at my sales rooms.

J. F. MORGAN,
211-1d Auctioneer.

Twelfth Annual Meeting

OF THE
HAWAIIAN

Jockey - Club

June 11th, 1896.

OFFICIAL PROGRAM:

Races to Commence at 10 a. m. Sharp.
