THE OLDEST CHINESE FIRM IN HONOLULU.

### COMMISSION MERCHANTS.

Dealers in Fine Silks and Grass Linens. Chinese and Japanese Goods of All Kinds.

Nuuanu street.

The Bulletin, 75cts. per month

### BIG ROCKS ON ROOFS

### BLASTING INJURIOUS TO INSANE PATIENTS

South Sea Islanders on Navy Reservation in Unsanitary Condition

—Board Will go to Molokai.

Probably the most important subject that has come before the Board of Health for solution since plague problems vanished is that raised by the receipt of the following letter from Dr. R. M. Malster, superintendent of the Oahu Insane Asylum:

Honolulu, Aug. 26, 1901.  
 H. C. Sloggett, M. D., President Board of Health.

I would call the attention of the Board of Health the serious condition which exists here as the result of the blasting and running of stone crusher, which is located on the mauka side of the asylum grounds. Patients whose exhausted and diseased condition of their nervous system requires that they be kept quiet and peaceful are daily exposed to the shock of blasting and the running of the rock crusher. They become very much excited, nervous and unmanageable when they would not be molested.

Not only that, but the danger from flying rocks, which are at times thrown to all parts of the grounds and some weighing several hundred pounds are hurled on the roofs of the nearest building crashing through and would kill anyone if they should be underneath. The buildings are injured, windows are broken and the fence destroyed in places, enabling patients to escape easily.

Hoping some action will be taken to suppress the evil, I am.

Yours truly,  
 DR. R. M. MALSTER.

Supt. Oahu Insane Asylum.

After receiving the letter Dr. Sloggett conferred with Superintendent J. H. Boyd on the matter. He found Mr. Boyd willing to investigate with the Board all suggestions for the removal of the trouble. He stated that to remove the stone crusher would require the expenditure of \$25,000. A committee consisting of Dr. Sloggett, Dr. Moore, Dr. Pratt and F. C. Smith was appointed to visit the asylum with Messrs. Boyd and Campbell.

The Board decided to make the regular trip to the Molokai settlement leaving Honolulu, Friday, September 6. All persons desiring to make the trip must file applications before Wednesday, September 4, with Dr. Pratt, stating purpose for which they wish to visit Molokai. The steamer taking the crowd will return by Sunday morning following the departure.

Captain J. F. Merry has written the Board of Health concerning the condition of the South Sea Island squatters on the Naval reservation. He calls attention to the very unsanitary condition prevailing and asks the Board to assume jurisdiction over the place. He says that there is no objection to the squatters remaining if their premises are kept healthful. Last May there were 167 people in the settlement and Dr. Pratt reported a rather alarming prevalence of tuberculosis among them. In discussing the subject, the report of Rev. Mr. Bingham was referred to. He states that most of the settlers are people who came here to work on plantations and since the expiration of their contracts the managers of plantations have defaulted in their agreement to transport them back to their homes. The whole subject was turned over to Dr. Pratt for investigation.

An application of Mrs. Kalki for permission to join her husband, a leper at Molokai, was refused.

The epidemic of smallpox having practically subsided in the United States, the Board rescinded the order, requiring that Porto Rican immigrants be bathed and fumigated upon arrival.

At the suggestion of Superintendent Boyd of the Public Works department new rules governing the removal of garbage were adopted. Henceforth a small fee will be collected for the service. The limits of the area were extended to the Fertilizer Works west; Ponahoa street east; between Jao street and the sea. Garbage boxes with a capacity of 12 cubic feet must be provided by the owner of the premises. There is no distinction now made as to the kind of garbage, the department will remove.

Dr. Archer Irwin reported the death of a Japanese woman and baby on Maui as the result of the administration of anti-febrile purchased from Japanese drug stores. Irwin reports that much trouble is encountered because of the ignorance of Japanese drugists as to the properties of drugs. No action was taken by the Board.

The plumber's report for the two weeks ending August 15, showed 66 permits issued and 38 sewer connections made.

Dr. Cleveland was reappointed the

physician to examine the female school children. The examiner of the boys is Dr. Sinclair.

H. Bowman was given permission to associate himself with Sheriff Andrews in the garbage business at Hilo.

The Board denied the request of Mr. Mendonez for permission to abandon cesspools on his Hotel street property without filling up, according to regulations.

The regulation prohibiting the keeping of swine in certain limits in Hilo was made more stringent.

The Koloa hospital report showed one patient at present.

It was recommended that a license to practice medicine issue to Dr. Henry Hayes.

An inquiry from Theo. Richards was read asking if a vacancy could be found on the staff of government physicians for Dr. R. V. Anderson. Anderson was surgeon a Bellevue for one year. He was born in the Islands and desires to return.

Sheriff Baldwin of Walluku writes that he knows of no one in that city willing to serve as sanitary inspector without pay. On a salary of \$15 to \$20 per month he believed he could find an acceptor.
