

# 40,000 SHOT GUN SHELLS

is quite a large number and in the hands of good hunters will considerably diminish the bird population of the Islands. While we have no grievance against the birds, yet the above number is the amount of cartridges we have just received, and they are all fresh.

Good ammunition is one of the chief requisites to good hunting and ours is the best.

Improved and modern SUGAR MACHINERY of every capacity and description made to order. Boiler work and RIVETED PIPES for irrigation purposes a specialty. Particular attention paid to JOB WORK, and repairs executed at shortest notice.

### Camilla Urso Dead.

New York, Jan. 29.—Camilla Urso, who in private life was Mrs. Frederic Luere, for many years a violinist famous in Europe and America, died at the New York Infirmary yesterday after a brief illness.

## EAT POISON!

### FIVE DIE IN ONE ROOM

When we put our new rat poison on the market we called attention to the fact that it was a real poison and would kill. Our patrons who have tried it verify our claim. They bring wonderful tales of the mortality among the rats. One customer says that five were poisoned in one room the first night it was used.

## RATS MUST GO

is the well-chosen name of this new destroyer of rats and mice. A trial will convince anyone that if rodents are to be exterminated our poison will do the work quickly and surely. A large can costs fifty cents. There is sufficient poison to destroy hundreds of rats. Isn't it worth this to free your house, barn or yard of rats? You know the importance, too. Insist on having the real RATS MUST GO.

### THE CHEMISTRY OF TEARS.

Tears have their functional duty to accomplish, like every other fluid of the body, and the lacrimal gland is not placed behind the eye simply to fill space or to give expression to emotion. The chemical properties of tears consist of phosphate of lime and soda, making them very salty, but never bitter. Their action on the eye is very beneficial, and here consists their prescribed duty of the body, washing thoroughly that sensitive organ, which allows no foreign fluid to do the same work. Nothing cleanses the eye like a good salty shower bath, and medical art has followed nature's law in this respect, advocating the invigorating solution for any distressed condition of the eyes. Tears do not weaken the sight, but improve it. They act as a tonic on the muscular vision, keeping the eye soft and limpid, and it will be noticed that women in whose eyes sympathetic tears gather quickly have brighter, tendered orbs than others. When the pupils are hard and cold, the world attributes it to one's disposition, which is a mere figure of speech, implying the lack of balm tears, that are to the cornea what saliva is to the skin or nourishment to the blood.

The reason some women weep more readily than others, and still more readily than the sterner sex, has not its difference in the strength of the tear gland, but in the possession of a more delicate nerve system. The nerve fibres about the glands vibrate more easily, causing a downpour from the watery sac. Men are not nearly so sensitive to emotion; their sympathetic nature—the term is used in a medical sense—is less developed, and the eye is therefore protected from shocks. Consequently, a man should thank the formation of his nerve nature when he contemptuously scorns tears as a woman's practice. Between man and monkey there is this essential difference of tears. An ape cannot weep, not so much because its emotional powers are undeveloped as the fact that the lacrimal gland was omitted in its optical make-up.—Dietetic and Hygienic Gazette.

### A PRAYER.

Almighty God! eternal source  
Of every arm we dare to wield.  
Be Thine the thanks, as Thine the  
force,  
On reeling deck or stricken field:  
The thunder of the battle hour  
Is but the whisper of Thy power.  
Thine is our wisdom, Thine our might;  
Oh, give us, more than strength and  
skill  
The calmness born of sense of right.  
The steadfast heart, the quiet will  
To keep the awful trust with  
death.  
To know Thee in the cannon's  
breath.

O Lord of love! be Thine the grace  
To teach, amid the wrath of war,  
Sweet pity for a humble race.  
Some thought of those in lands afar  
Where sad-eyed women vainly  
yearn  
For those who never shall return.

Great Master of earth's mighty school,  
Whose children are of every land,  
Inform with love our alien rule  
And stay us with Thy warning hand  
If tempted by imperial greed,  
We, in Thy watchful eyes, exceed;

That in the days to come, O Lord,  
When we ourselves have passed  
away,  
And all are gone who drew the sword,  
The children of our breed may say,  
These were our sires, who, doubly  
great,  
Could strike, yet spare, the fallen  
state.  
—S. Weir Mitchell, in St. Louis Globe-Democrat.

A Slip of the Tongue.  
The Count—Mees O'Nair, will you be please receive my devotions? I loofa you vid grande passion.  
Miss Milly O'Nair—But Count, will you serve me devotedly? You are something of an autster.  
The Count—Oyterer! I serfe him stewed, fried, on ze half—he' what say I? I would say I serfe you vid my heart all.—Judge.

### FAVOR MACKAY CABLE

BUSINESS PROPOSITION APPEALS TO SENATORS

Will Be as Thoroughly American as if it Were Owned by the Government—Perkins Withdraws His Measure.

[Special to The Bulletin.]  
Washington, Jan. 16.—It is nearly a settled fact that Congress will not pass a law at this session providing for a Government constructed cable in the Pacific. The hearings that have been had upon the question before the House and Senate Committees have come pretty near convincing a majority of the members of the respective committees that the best thing to be done in the case is to let the Commercial Cable Company, of which John W. Mackay is the head, go along and build its proposed cable without interference from the Government.

The statements made by the representatives of the Mackay company have been so convincing that they have caused many near putting a stop to all talk about a government cable. The company declared before the Senate committee this week that if the government does not interfere with its plans it will have its cable in operation in two years from now—first of the summer it will be completed, placed in a cable ship and be ready for the trip around the Horn. The company also promises to have a completed cable in operation to the Philippines within two years from now—first of the summer it will be completed, placed in a cable ship and be ready for the trip around the Horn.

The company also proposes that it will make the public rate between San Francisco and Manila just one-half of the present rate via Europe. It will give the United States Government a rate amounting to one-half of the public rate, making the rate on Government messages one-quarter of the present Manila-American rate. The company promises at any time after the cable has been completed to turn it over to the Government at the actual cost price, if that be not satisfactory Manila-American rate. The company also proposes that it will make the public rate between San Francisco and Manila just one-half of the present rate via Europe. It will give the United States Government a rate amounting to one-half of the public rate, making the rate on Government messages one-quarter of the present Manila-American rate. The company promises at any time after the cable has been completed to turn it over to the Government at the actual cost price, if that be not satisfactory Manila-American rate.

### RESULTS OF SHIP SUBSIDY BILL

OUTLINED BY SENATOR FRYE

Washington, Jan. 17.—The Senate Commerce Committee today authorized a favorable report on Senator Frye's ship subsidy bill. The report will be made by Senator Frye.

The Democratic members of the committee voted against reporting the bill. They also voted solidly for a motion offered by Senator Mallory to strike out the general subsidy provision of the bill. The committee made several amendments to the bill. The most important are those allowing mail-carrying vessels under the bill to be either iron or steel, instead of steel only as originally provided, and reducing to 1000 gross registered tons the vessels receiving the bounty under the bill.

The report prepared by Senator Frye was read to the committee. It says that the purpose of the bill is to establish the maritime supremacy of the United States in trade with Asia and in the Gulf of Mexico and the Caribbean sea; to establish thoroughly trade between the United States and South American republics, and to give the United States a respectable representation on the North Atlantic. The claim is made that all these results will be accomplished within ten years. The report also asserts that the bill will extend the shipbuilding industry in time from abroad to the United States the center of that industry, as the centers of other industries recently have been transferred, and also that it will give to the United States a measure of maritime independence corresponding to our industrial and agricultural independence.

Senator Frye furnished to the press the following summary of the report: "The establishment of this complete American ocean mail service, involving much shipbuilding, will require several years. It will render the United States an independent of foreign powers for its ocean mail service as is Great Britain. The cost of the American service by American mail steamers will be \$4,700,000; the cost of British and Colonial service by British steamers is \$4,700,000. Receipts from ocean postage by the United States are now estimated at \$2,500,000. The annual deficit under the American system proposed, including minor services, will be about \$2,000,000. The annual deficit under the British Colonial system is \$2,188,000.

"The postal subsidy provisions enable the Postmaster General to establish an American ocean mail system superior to the systems of Great Britain, France and Germany.

"The American ocean mail system outlined contemplates on the Pacific weekly mail service to Hawaii, to the Philippine Islands, Japan, China and South America, and a fortnightly service to Pago Pago, New Zealand and Australia. The maximum cost would be \$2,325,000.

"On the Atlantic the bill contemplates semi-weekly mail services to London, Havana
