

RHEUMATISM IS A CURABLE DISEASE

But It Must Be Treated in the Right Way to Secure Such Results as This Kansas Case Shows.

Once a sufferer from rheumatism, always a sufferer from rheumatism can no longer be said of the victims of this painful disease. At least it cannot be said of those patients who have given Dr. Williams' Pink Pills for Pale People a thorough trial. These pills do the only possible thing that can give a permanent cure in rheumatism; they build up the greatly thinned blood and enable it to rid itself of the rheumatic poisons. More than this they so purify and strengthen the blood that it can successfully fight off a return of the disease. How much better this method is than the old way of trying simply for temporary relief through the use of liniments and pain killers is shown by the permanency of its cures.

Mrs. Louisa Jones, of No. 1219 Mansfield street, Winfield, Kansas, gives this reliable statement of her cure by Dr. Williams' Pink Pills:

"I first noticed the rheumatism when I began to have severe pains and inflammation in the fingers of my right hand. The pains soon extended over my entire body. My limbs were swollen and the joints were inflamed. I could not step on my feet for six months and had to walk with crutches. I lay in bed for five weeks at one time. I suffered for over fifteen years and this long sickness made me weak and run down in health. My stomach was disordered, everything I ate turned sour and gas formed on my stomach. I suffered a great deal from nervous headache.

"The doctors did not do more than give me temporary relief and it was not until I tried Dr. Williams' Pink Pills that I was cured. I had not taken the pills many days when I could see they were helping me. I took several boxes and have never been troubled with the rheumatism since. My stomach has also been strong. I am able to eat anything I care for and I am well and hearty now."

Our booklet, "Diseases of the Blood," will be sent free to any sufferer from rheumatism, anemia, general breakdown in the health, or after-effects of the grip or fever.

Dr. Williams' Pink Pills are sold by all druggists, or will be sent, postpaid, on receipt of price, 50c. per box; six boxes for \$2.50, by the Dr. Williams Medicine Company, Schenectady, N. Y.

PERSIA MAY USE FUEL OIL

The British steamship Persia, now under charter by the Pacific Mail Company and in service as an "intermediate boat" in the Oriental trade may be converted into an oil burning steamer, according to a well defined opinion expressed by officers in the liner, which made a brief stay at Honolulu today.

The Persia now uses coal in the fire room and it is contended that with the substitution of oil a considerable amount in the annual operating expense account could be saved.

It is also stated this morning that an agreement existing between the White Star people, the owners of the Persia and the Pacific Mail, will expire with the beginning of the new year. Some doubt was expressed that the vessel would be continued in the trans-Pacific schedule, though the advance sheets of a joint time table distinctly show the Persia as one of the liners which go to make up what might be considered a weekly service between San Francisco and the Far East.

Captain Lockett, master of the Persia brought the vessel inside the harbor and alongside Alakea wharf early this morning. He reports some rather rough weather after leaving Yokohama. The work of discharging 390 tons Oriental freight was hustled along in order that the liner could be dispatched for San Francisco at one o'clock this afternoon. The Persia brought 8 cabin and 108 steerage passengers, of the latter there were 79 Filipinos for the Hawaiian sugar estates.

The through list included 51 cabin, 1 second class and 131 Asiatics. The steamer sets well down in the water and carried nearly three thousand tons cargo for the mainland.

Purser Albers stated this morning that but little excitement appeared manifested at the Chinese ports of call, despite the rather alarming stories concerning the revolution in progress there. A stiffening in prices of certain lines of commodities was noted, but it is claimed that Hongkong and Shanghai business was going along in about the usual manner. In sailing for San Francisco, the Persia took a few layover passengers and a large mail destined for the mainland.

COLLEGE OF HAWAII ANNOUNCES LINE-UP

The lineup of the College of Hawaii football team for the big game with Punahou to be played tomorrow afternoon at Alexander Field, was not decided until this afternoon. As finally announced, the Hawaii players will line up as follows:

Yamashiro, le.; Pratt, lt.; Turner, lg.; Pootuh, c.; Holt, rg.; Clark, rt.; Yap, re.; Marcellino (captain), q.; Maruloh, lb.; Cousins, f.; Rice, rb.

Deaha will referee and Fressell will act as umpire. The Punahou lineup is printed on today's sport page.

SUGAR MAN SEES MILLIONAIRE - FARMER HERE; MAY MAKE ONE OF HIS HOMES IN CITY

(Continued from Page 1)
In other words, we shall have to come to the London party; moreover the increasing consumption will fully take care of a slight cut, and it will be but a short time till the difference will be wiped out, and the reduction will not be considered a burden to sugar growers in the United States.

"Our opinion that the tariff will remain untampered with has not been changed, and nothing has transpired since the question has been brought up which could induce us to change it. We believe there will be no change of any kind during the next session of Congress as the tariff question is too delicate to be taken up in a Presidential campaign year.

CARTER "ON JOB"

(Continued from Page 1)
usually continued throughout my trip East and added very much to my pleasure. I have taken pains to meet experts and discuss various questions with different city officials.

"Irving Fisher, professor of political economy at Yale and author of the famous report on 'National Vitality; Its Wastes and Conservation,' is a college mate and I spent a most interesting evening with him. The State of Kentucky has reprinted his report and put it in the hands of each school teacher, believing it should be read and studied by everyone. Professor Fisher states that boards of health are as yet imperfectly developed and that they can never become the power they should be until—

"First: Public opinion better realizes their usefulness and the fact that their cost to taxpayers is saved many times over by the prevention of death and disease.

"Second: Until more and better health legislation is enacted; and

"Third: Until special training perfects the new profession of health officer.

"We must give more support and power to our Board of Health if we are to have conditions as they should be.

"Pure air, pure water, pure ice, pure milk, pure food, effective garbage removal, notification and isolation of disease, improved and extended sewerage as well as its disposal, drainage, clean streets, elimination of public and private nuisances are essential factors in our effort for health and healthier Honolulu.

"The New York Legislature has put the Board of Health of New York City out of reach of injunction or the delays of law by requiring five days' notice, and then only from the highest court of the city. This it has done believing that the members of the Board of Health are the best judges of what should be done in health matters, better than the courts.

"At Rochester Drs. Goler and Roby's work in school hygiene has set a new standard. Chicago's Board of Health believes its research work justifies the statement that the germs of pneumonia propagate in and around the teeth and that mouth hygiene will control pneumonia.

"We do not begin to realize the loss and waste in Honolulu due to our failure to establish thorough medical inspection of our schools. If the native Hawaiians object because of any one disease, then omit that, but save every child that it is possible to save from defective sight, hearing and teeth, as well as disease.

"Save the child and you save the state.

"More and more we begin to recognize that we are entitled to demand good health as well as liberty and the pursuit of happiness.

"More and more we learn that Pasteur gave to man new hope, new ideals and revolutionized the world when he stated that 'man has the power to rid himself of every parasitic disease.'

"Tuberculosis, typhoid, pneumonia, smallpox, diphtheria, yellow fever, cholera, dypsoy and a host of others will some day be looked upon just as we now look upon scurvy.

"The Panama Canal would have cost more in time and money save for the lavish expenditure on sanitary control.

"Our future cost will be greater than to pay the bills now for drainage, new streets and new sewers.

"Every cesspool must be filled. Rats, flies and mosquitoes must go.

"Sanitary legislation and sanitary conditions are the indices of advanced civilization. Ignore them and we will be judged accordingly."

Mr. W. H. Babcock who arrived on the Sierra today with his family is one of the successful and wealthy farmers of Washington.

As an incident of his success, he recently sold a million dollars worth of land and invested in the finest apartment house of Seattle. He has a home in Los Angeles and comes from that city for a three months' visit in Honolulu. He is accompanied by Mrs. Babcock, Miss Babcock and Miss Paul. They have their automobile with them and will take in the sights leisurely, making their headquarters at the Courtyard.

Mr. Babcock is a great believer in the future of the West Coast. He has bought land at twenty-five cents an acre and sold it at prices, after improving, all the way from ten dollars to three hundred and fifty dollars an acre. He is not a land speculator, however. His farm buildings are the finest on the West Coast, and have a reputation. He has between one and two hundred head of horses and many acres of fine orchard land.

He believes in giving the other fellow a chance. He has employed many men, and having plenty of land has given the worthy ones an opportunity to buy homes, with nothing but their credit and good name to start with. Out of fourteen men he has thus given

BIG CAISSON TO BE TOWED HERE

The largest steel caisson ever constructed on the Pacific Coast and one of the largest in the world will soon be towed to Honolulu for Pearl Harbor. Details of the construction have come from San Francisco, where it is being built by the Union Iron Works.

It is the gate for the Pearl Harbor drydock. All the parts have been built and are ready for assembling. The caisson will be 125 feet 4 1/2 inches in length, 43 feet 6 inches in height and will have a width of 15 feet on the upper deck and 20 feet at the stringers. On account of its great height some trouble is anticipated in launching it. The contract price is \$147,000, and the contract calls for the delivery of the caisson at Pearl Harbor. Towing this unwieldy craft to the Islands will be a big undertaking in itself and an operation which will cost about \$15,000.

(Continued from Page 1)
lapses. For instance, say that raw sugar should be given a protective tariff up to four or four and a half cents, and when the price goes above that figure, the tariff lapses. This plan would assure the consumer an even price, or at least give him protection against exceptionally high prices. It would also give the producer a sufficient protection and enable him to do business on a stable basis. Whether there is any concerted movement to carry out such a plan I do not know. I have seen it mentioned in some publication I have read recently, and a number of good men seem to be thinking over the matter seriously.

"The drought in Europe was a terrible one this year. I was not in the best sugar districts, but in some parts of England where we stopped the fruit went unpecked. It did not develop, but dried up on the trees.

"I have not come in contact with anything in particular associated with the Panama Canal. I understand that the American-Hawaiian company has ordered its new ships.

"One of the most astounding things I encountered was on my way home, when someone showed me the proposed contract presented to our local harbor commission, by which for what appears to be a consideration of one dollar, a very valuable part of the Hilo waterfront and wharfage is to be turned over to the railroad company and the American-Hawaiian Steamship Company for something like ten or twenty years.

"One thing is certain. You can't promote traffic by giving exclusive privileges to favored corporations. The contract in the form in which I read it is most extraordinary, to say the least, of course, I am not informed on the present status of the matter."

NEW TEACHERS ARE APPOINTED

Two teachers to take the place of substitutes have been appointed according to the information given out by Superintendent of Education Willis T. Pope this morning.

They are Miss Myrah Drake, who is a daughter of the superintendent of the San Luis Obispo county school, California, and Miss Flora B. Beecher, who is a graduate of the Stanford University.

They are to fill positions in Kona, Hawaii.

PERSONALITIES

PIER STROMME, a well known newspaper man of Wisconsin and North Dakota called on the Governor this morning. He is a passenger on the steamer Persia and is touring the world writing articles on each place as he goes through.

WALLACE R. FARRINGTON, editor of the Bulletin has been appointed by Governor Cruce of Oklahoma, as a delegate to represent that State at the Pan-Pacific Congress to be held in this city next February. Former Associate Justice Galbraith, now a resident of Ada, Oklahoma, hopes to be in Honolulu next winter and take part in the proceedings of the Congress.

Lots of men are willing to tell us just what to do, but they never have time to show us.

Mr. W. H. Babcock who arrived on the Sierra today with his family is one of the successful and wealthy farmers of Washington.

As an incident of his success, he recently sold a million dollars worth of land and invested in the finest apartment house of Seattle. He has a home in Los Angeles and comes from that city for a three months' visit in Honolulu. He is accompanied by Mrs. Babcock, Miss Babcock and Miss Paul. SIERRA CHIEF IS PROMOTED

Chief Engineer Samuel Church was found not present when the roll of officers in the O-r-n-i-e liner Sierra was called this morning.

Explanations followed and it developed that Church has received a well merited promotion in the service, having been detailed to shore duty and it will be his business to supervise the work now being done on the Sonoma and Ventura, which are undergoing extensive alterations at the Union Iron Works preparatory to plover-shoot, but they say there would not have been any "big fess" had it not been for the doctor's unerring aim. Every time Clark's sun cracking bird of gorgeous plumage dropped Sugar sold at \$1, several transactions of months ago and wavering weapons.

C. A. Smith, the first assistant engineer in the Sierra has been promoted to the office of chief, and the transfer of Chief Sam Church resulted in a general advance of all members of

the popular Oceanic steamers engineering staff.

Another Change Noted.

Dr. J. A. Nelson, who for years has been a regular visitor to Tahiti as ship's surgeon in the Mariposa, is making a trip in the Sierra in place of Dr. G. W. Clark, who in said has been called to the Canadian Northwest on a business mission. Dr. Clark will join the Sierra for the next voyage, however. It seems that over on the Coast the genial Dr. Clark has been heralded far and wide as a marksman of no mean ability. His many friends in Honolulu stand aghast at the wonderful tales told of his prowess with gun and rod. It is claimed that on the last visit of the Sierra at this port the liner's officers went on their annual pheasant and plover-shoot, but they say there would not have been any "big fess" had it not been for the doctor's unerring aim. Every time Clark's sun cracking bird of gorgeous plumage dropped Sugar sold at \$1, several transactions of months ago and wavering weapons.

STOCK MARKET STILL SUFFERS

A fair volume of transactions but no more buoyancy in the market is the stock situation today, the same influx of orders that have combined to prevent a much business in sugar securities being still in force.

As expected for some time, Hawaiian Sugar is going to declare a further extra dividend. Announcement of the directors yesterday in voting a further extra of \$1 per share, payable on November 15. This was about the only point of interest in the day's transactions. Melville six per cent bonds were in some demand, and Oahu Sugar sold at \$1, several transactions of months ago and wavering weapons.
