ACCOON. An Essay upon the Limits of Painting and Poetry: By Lessing, Boston, Robert Brown For sale by Loring, Short and Harmon. In translating Lessing's Laocoon, Miss Frothingham has accomplished a task of no easy achievement; the rendering into pure flowing English, of the art criticisms of this master critic is a labor to which a life-time might be profitably devoted; this will be realized when we consider the wide difference existing in the grammatical construction of the two languages. An appendix to the book contains the translations of the many passages from Latin and Greek authors brough which the arguments of Lessing are illustrated. In order to reap the rich har vest of ideas contained in the work, it should be thoroughly read and re-read. Upon its first appearance it created an epoch in art criticism, and its lessons are as instructive and weighty to-day as then. The great principles developed throughout the book will help the reader to an ever-deepening appreciation of the undying works of the great masters of art and literature. A deep impression made upon the reader of "Laocoon" is that of the easy and complete mastery of the author over his subject. Goethe has said of it, that in the confused period of his youth, it cleared up the whole heavens to

him and made his path plain before him. "GENESIS DISCLOSED." New York, G. W. Carle-

This work may contain a good summary of the law of New York relating to women but it certainly states the law of Maine very incorrectly. It is evidently compiled from other treatises more or less old and the young g ntleman who is evidently very recently "of the New York Bar" has taken no pains to see whether the law has since been changed, This is inexcusable in a work professing to be a sort of handbook on a subject in regard to which more than any other the law is continually changing. In fact Law Books for the Public are the last things on which beginners should try their prentice hands. A Great Publishing Enterprise by Estes & Lauriat. The veteran statesman, historian and Christian philosopher, M. Guizot, as he was completing his eighty-second year, five years ago, was induced to which he had prepared in slight notes, to be expanded from his memory in narration-for the simple grandchildren. With a spirit and intent like that which prompted Sir Walter Scott to put the history of Scotland into stories told to his grandson, young Lockhart, M. Guizot essayed to deal in the same way with the history of France. The carrying out such

Guizot had been furnished by the studies and abors of a lifetime for the new task which he under-took, and his busy and practiced pen had acquired a facility in style admirably adapted to the special denands of the work. When he made he made his French translation of Gibbon's great work, which he ustrated, and some of the critical matters of which theme. As professor of modern history in the University of France, he had delivered many courses of ectures on the history of civilization, which were afterwards wrought into his admirable work under that title. His labors have been faithful in many

Grizot prepared for publication in France a work to bear the following title: "The History of France from the Earnest Times to the year 1789, Related for the Rising Generation." This answers to our title of a popular history. The whole work, estending to three and possibly to four substantial volimes, is in the hands of the French publishers. The English edition is illustrated with two hundred new and elegant wood cuts, in the highest style of the art. Of these, Messrs. Estes & Lauriat have secured electrotypes by the famous artist, A. De Newville. In addition to these, the American publishers propose, as peculiar to their edition, ferty magnificent steel line engravings. The paper, type and whole mechanical execution of the work make it as creditable, rich and luxurious a piece of finished

The causes of all the revelations and excitements, the ragedies and disasters, the glories and the recuperative energies of the nation lie back in its earliest his tory. Filled as this is, with romance, heroism, and the alternations of triumph and defeat, it has all the charm, fascination and absorbing interest which ages of human activity and endurance can connect with the scenes of man's abode. And again, this work fils a great gap in our abounding literature.

There is no good and trustworthy volume or set of into rivalry. It has the field to itself. We have examined both the English edition of the first two vol Gen. 1: 26. The elegantly printed pages and the abounding and beautiful illustrations of st scenes, places, incidents and persons, all presented in the harmonies of time, scenery, surroundings and costumes, have all the richness of the old illustrated chronicles.
