house in Baltimore county for the summer, has some very pronounced views on the subject of automobiles and their relation to the public roads. In a newspaper interview Mon-day he said: "This is so important the Gov-ernor should convene the Legislature for the purpose of providing a means of checking the speed of automobiles in the State before one cent of the \$5,000,000 for roads is spent. Otherwise the money might as well be thrown out of the window. I own a machine, but it is not in this country, and I know what damage they do to roads when driven at a high rate of speed. Railroads pay for their rights of way. They have to have watchmen, and they go only about 40 or 50 miles an hour, while these automobiles, with no precaution for the public safety, run helter-skelter, as fast as 60 miles an hour. It is an outrage. * * * At the present rate automobiles would do more harm than all the benefits good roads could do the ndowners. It is a disgrace that any set of landowners. It is a disgrace that any set of persons should so monopolize the roads as they do. People are afraid to use the roads where the automobiles go. Women in carriages have to get out to let the machines go thundering by. The automobile drivers will not let you have half of the road. They want all of it. When they frighten your horse they only laugh at you."
