Everybody seemed to enjoy themselves.

Plums, a fine quality, 35 cents per basket.

A splendid line of oranges and lemons.

Fifteen bunches of bananas that we offer at 20 cents a dozen.

A lot of eating and cooking pears that must be disposed of at once and at a bargain.

FOR THE LEGISLATURE.

Rufus P. Morton, Prohibition Candidate
Forty-Fifth District.

To the voters of the Forty-Fifth District:

Gentlemen: Having been nominated at the recent primary election by the prohibition party as a candidate for the legislature for this district, I confidently submit the following statement of my position on some of the dominant questions of the day and invite

your support for that office at the ensuing election.

I declare, if elected, that I will seek the passage of laws favoring—

1. Prohibiting the manufacture and sale of alcoholic liquors for beverage purposes.

2. The right of voters to prohibit the saloon by counties, in the event of the failure to pass state prohibitory laws.

3. Public control (or, if necessary, ownership) of such utilities as are natural monopolies.

4. Laws giving the people the right of government through the initiative and referendum.

5. Graduated income and inheritance tax.

6. The reclaiming of swamp lands by drainage.

7. Liberal appropriations for good roads.

8. A just and fair readjustment of the legislative districts.

If elected I shall use all honorable means to further the best interests of the state as a whole and of this district in particular.

I desire to express my thanks and appreciation for the hundreds of Mille Lacs county voters who have so cordially and heartily given their unsolicited help and co-operation, as well as to the voters of the other counties of the district who appreciate that in fairness one representative should come from Mille Lacs county.

Yours sincerely,

RUFUS P. MORTON.

Buy a MONARCH

Malleable Range!

It Pays for Itself.

BUYING a Monarch Range is like investing a little money at such splendid interest that it pays back the principal in a year or so, and then for unlimited years brings a return of from 25 to 50 per cent.

BECAUSE

A Monarch requires but little more than one-half the fuel burned up by a "steel range" of the common type. Moreover it does away with the usual repair bills—saves much time—eliminates the hard part of kitchen work—and in addition does it's work so WELL that it satisfies as no other can.

You don't have to take our word for these things. Investigate:

Monarch
MALLEABLE
The 'Stay Satisfactory' Range

Steel ranges built in the ordinary way are Wasteful-Extravagant:

Investigate for yourself the way the Monarch is built. Let us show you how the Malleable Iron and heavy steel plates are riveted together, making airtight joints without the use of stove putty. See the brightly polished top and body, which will retain their fine appearance forever without the use of stove blacking. Also notice the duplex draft and other exclusive features. These things prove our statements.

They are not made in the right way nor even of the right kind of material. It is not wise to buy one, nor even to continue using one, though you may have had it only a few years. Its seams have already opened up—the stove bolts worked loose, the putty has fallen out and these "air leaks" into the flues and firebox cause a waste of fuel every year equal to a large part of the cost of a Monarch.

A Personal Word to Intending Range Buyers

In ranges as well as other lines, we aim to handle the best to be had. Our many years' experience in the range business has acquainted us with all makes of ranges and we know that the Monarch is the one and only range that could justify the above claim.
