

BLUE HILL

The hard frost of last week completely froze up the corn crop, and if the farmers have any corn that is dented but not hard, or some that is ripe, they should save it for seed and put it where it will dry. Those who depend on the seed houses for their seed corn next year will undoubtedly pay large prices.

George Ham and wife of Cutler are spending a few days at W. H. Thompson's.

The new state road in Blue Hill has been completed and is now open for travel. We shall soon have a fine road to Princeton.

Fred Nickerson of Elk River, the state engineer, was a Blue Hill visitor on Monday and set the stakes for the new bridge across the St. Francis river.

The Iowa Bridge Co.'s crew of men arrived on Saturday and have put up their camp on the H. J. Brande land near the river. Louis Solberg of Princeton has secured the job of hauling the cement and steel from Princeton and will also haul the gravel.

Mr. and Mrs. Guy Seifert spent Sunday afternoon at Geo. Deglman's.

Miss Minnie Ristow returned to the city last Saturday after spending a month with her brother-in-law and sister, Mr. and Mrs. Ashaw Reiman.

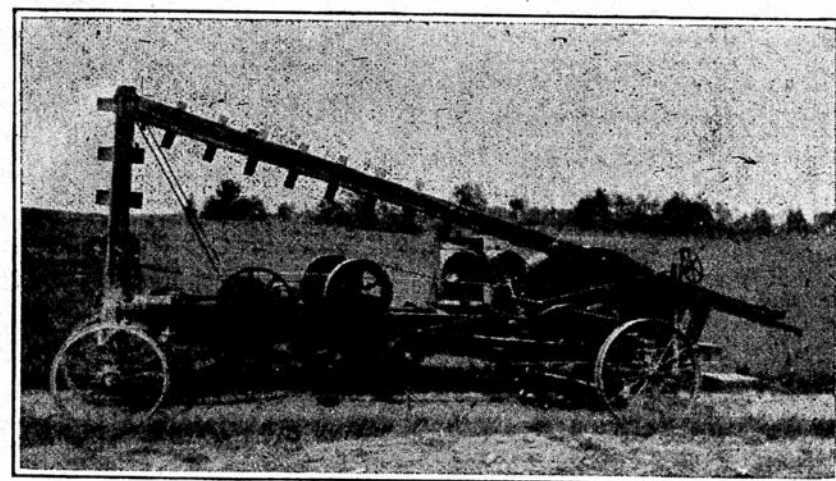

Pure Water a Necessity

No man can afford to gamble on the water used from a dug well. It may contain typhoid or other disease germs for several years and not hurt you or your family; but tomorrow, next week or next month your system may be just right to propagate those germs and you have to fight for your life with great odds against you.

The human system contains a large percentage of water. It is estimated that 87 percent of typhoid is caused by impure water, 5 percent from milk—incidentally impure stock water. Milk contains mostly water, so it is just as important to have a pure water supply for your stock.

Every man owes to his family and himself the protection which a pure water supply affords. Do not put it off until tomorrow as you may regret it all your life.

The Drilled Well the Only Sure Sanitary Water Supply

the water for your stock. Hauling water during winter is a very unpleasant job.

A drilled well will prove a profitable investment from the start giving yourself and family, also your stock the protection which a pure water supply affords. Will supply an abundant amount of clear sparkling water through dry seasons as it is not dependent on wet weather ooze and surface seepage.

Just phone or write us and we will be glad to have the opportunity to call on you and talk the matter over without the least obligation to yourself. We are able to give you prompt service and make you a better price per foot by letting your well job now instead of letting it go until the snow flies.

Geo. A. Coates

Mr. and Mrs. Frank Betzler spent Sunday afternoon with the former's parents.

Eugene Shaw is busy threshing in this neighborhood.

Arvel Gennow was a pleasant caller at the Aug. Bauman home on Sunday evening.

Minnie A. Perry, D. C., wishes to announce that she has moved her office from the former location to a steam heated office over Creglow's store in the I. O. O. F. building. 39-1tc

Wood Duck Cannot Be Legally Killed.

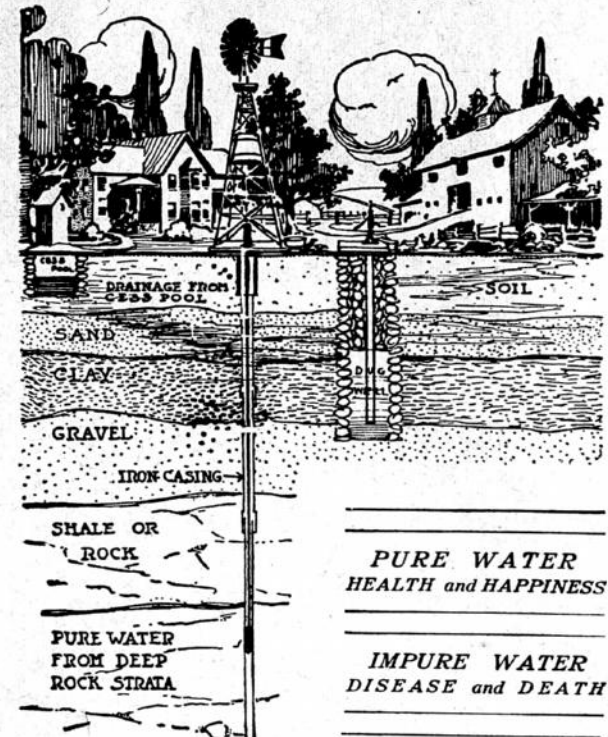

Complaints have come to this office that wood duck are being shot in the sloughs surrounding Princeton. The laws (federal and state) specifically state that wood duck, mourning dove, snipe (other than jacksnipe and yellowlegs), woodcock, upland and golden plover, ruffed grouse, Chinese ring-neck and English pheasant shall not be killed until 1920.

There are many wood duck in this part of the country and it is well to warn hunters to leave them alone. These ducks breed in the state of Minnesota and are denizens of the northwest. So it is well at this time to warn ruthless violators of the law to be on their guard, for any person may place them under arrest—it does not require a game warden to bring them to justice. Beware!

You know as well as anyone when you need something to regulate your system. If your bowels are sluggish, food distresses you, your kidneys pain, take Hollister's Rocky Mountain Tea. Nature's wondrous herbs blended scientifically. Results guaranteed. 35c. C. A. Jack Drug Co. Adv.

PURE WATER

IS ONE OF THE PRIMARY NEEDS OF HUMAN LIFE AND IS NO LESS ESSENTIAL THAN AIR OR FOOD

Study this picture—A printed volume could not say more.

Statistics show that 87 percent of all typhoid is due to impure water.

You have undoubtedly figured on having a well drilled this fall. Why not let that well contract now, and have your job done before the fall rush instead of taking chances on the old well which may run dry this winter, when you most need

the water for your stock. Hauling water during winter is a very unpleasant job.

A drilled well will prove a profitable investment from the start giving yourself and family, also your stock the protection which a pure water supply affords. Will supply an abundant amount of clear sparkling water through dry seasons as it is not dependent on wet weather ooze and surface seepage.

Just phone or write us and we will be glad to have the opportunity to call on you and talk the matter over without the least obligation to yourself. We are able to give you prompt service and make you a better price per foot by letting your well job now instead of letting it go until the snow flies.
