THOU OR 17 Beine day, shar, one of us—we twain— Will watch aloue in teaps And call the other one in vain In voice of any cless fears, As in denth's sinus upe of us aba'l lies Which with it he, days, though it

We same of us by death bereft to of low's thought and spend What other word of hope is left To other each to each? By one shall watch and one in death shall he Watch will it be, dear, then or I? If side life's packwap as we go
One will grow faint and falk
And arek another way to know
White double and in or prevail;
And one will wait alone as days go by,

Clod's pitying gencer. Which was it be, door, then or It

I may be first to understan!
The life so far from thine:
Mine may be wee to fold thy hand—
Grown still and cold in m'ne—
As sign of death across try breast to I'e,
God chestens others so.

HOW NATURE CONJURES.

Prof. Proctor Disproves the Adage that "Seeing Is Belloving." Queer Optical Deceptions and Explana

of Some of Them-The Refracttog Power of the Air-Mistakes in Color and Shape.

tor for the Philadelphia Press previous not of the surface of individual clouds, to his recent death by yellow fever at but of the general layer. a New York hospital.]

sun, as he sets, look larger than he of the inner surface of an immens really is. I say nothing of his looking spherical shell. out of shape, because nature uses apparatus to produce that Illusion, and only to balloonists, which is to be exthe eye really does see correctly. But plained in the same way. Rising high the makes the sun look swollen and above the earth's surface in a balloon, huge without apparatus, though again we see the surface of the earth be and again we find her clever perform- neath arched into the form of an imance explained in that way. The mense bowl or basin. The mind rekindly instructive persons who wrote fuses to admit the thought that the ex-"Sandfords and Mertons" for the con- | ceedingly minute depression of the visfusion of intelligent childhood, care- | ible horizon corresponds to the seemfully explain that it is the refracting ingly immense depth immediately bepower of the air which enlarges the low the aeronaut. Or one may say setting sun, even as the refracting (though in reality it is saying the same power of water in a glass bottle en- thing) that the mind can not admit the larges letters seen through it. But the thought of the immensity of the disrefracting power of the air has nothing tance of the horizon. From a height to do with the apparent enlargement of half a mile the horizon is some of the sun. It does affect the sun's ap- forty miles away, or eighty times parent size, but the other way, further than the earth's surface below, making him look smaller not larger but the mind sets the horizon only in just such degree as it apparently three or four miles away (at least if compresses him from a globe to an the air is clear), and consequently the believe that the is really slightly convex below the obsetting sun looks larger than the sun server, appears to be markedly conin the midheavens. Nature deceives us cave. by making us think the sun in the Among illusions affecting color some fluences midheaven looks smaller than when of the most important and interesting near the horizon. Perhaps the reader are those which painters have to take thinks the statements identical. But into account in producing with opaque they are not. We see looking white. So with metallic effects, that he is behind those objects, and which are often admirably caught in thus we can not imagine him to be paintings.

be much larger when low.

vision as possible. There is seen as of the old masters. usual the complementary image of the False effects in regard to contour letter, but it has grown much larger. are also common and strangely If, for instance, the O is an inch in enough deceive the observant more diameter and the wall is twelve times readily than the unobservant. Look as far away as the eard had been, the at a medal under ordinary conditions letter seen will be apparently a foot in and the eye at once recognizes the diameter. The mind is not able to elevations and depressions for what prown suddenly larger. Yet in reality through a lens which reverses its the image in the visual field is pre-cisely the same now as it had been be-shadows really thrown from whatever the effect of distance—the same ob- seem thrown towards that light, imject seen of the same apparent size, mediately the clevations appear as but supposed to be at a greater dis- depressions and the depressions as tance, is judged to be larger.

So it is with the setting sun. The with the observant; but the unobeye sees that the sun is far off, and servant who have never, consciously to judges him to be large, though or unconsciously, noted the relation the area of his image in the visual between the position of the light and the field is no larger (indeed measur- direction of the shadows, are not deabove the horizon.

How is it, then, the render may here ask, that the apparent calargement of the setting sun and moon varies with the condition of the sir? The setting or rising moon, in particular, looks much larger when the sir is thick. Does this not prove that the refractive action of the air is in question? The sweets of the selemetive action of the air sir, that you will have to sleep on the being perfectly well known no phenom- billiard table or go elsewhere. - Washens whatsoever can prove that that ingles Critic. setion does what it is not espable of do-The explanation of the effects of

Here nature uses apparates and maker er conjuring so much the more ec-

We have in what is called 'loom an illusion depending on the offects of thickened air. A saller will tell you that a ship really looks larger when she looms through fog than when the air is clear. But if her distance is known and her apparent size measured with a sextant or other sultable instrument, it will be found that she looks no larger than she should look, whether the air be clear or thick The mind is simply deceived into thinking the ship is farther away than she really is, and so judges that she looks

The Illusion of a deeply arched instead of a nearly flat sky is occasionally broken. Probably but a small proportion of those who read these lines have ever noticed the sky surface looking flat. I have observed the appearance myself three or four times during my life, but then I have been always on the lookout for it, this particular Illusion having long had great interest for me. The occasions when the flatness of the under surface of the cloud sky can be recognized are those when the clouds lie (actually) in long parallel beds of tolerably uniform breadth and separated from each other by erably equal distances and lying in the same general level—the sun being near the horizon, so as to illuminate the cloud-bands underneath. At such times, as also when instead of uniform bands a kind of net-work of clouds covers the sky towards the place of the horizon sun, an effect of foreshortening [The subjoined article is one of the is produced which brings out the horilast written by Prof. Richard A. Proc- zontality of the cloud surface-that is,

I remember one occasion when I was "Seeing is believing," says the old traveling across the Western prairies, proverb, but "seeing is deceiving" towards the time of sunset, that as the would be nearer the mark. We are sun in his descending motion passed deceived by false impressions even from above to below a layer of clouds hen we know the real state of the uniformly reticulated, the golden tinge se, so that nature may in some sense along an edge of each of the cloud compared with a conjurer who ex- streaks so distinctly indicated the relaplains the trick he is about to play, tive positions of the different parts of yet deceives the eye as perfectly as the network of clouds, that the true though we knew nothing about the flatness of the surface was as strongly manner of his performance. We know forced on me as esually the incorrect that the handkerchief which we gave arched form is impressed on the mind. him to experiment upon has not been For the first and only time in my life I cut in half, yet we saw him cut it was not only able (as on three or four in half; we know he has not pounded other occasions) but actually forced to our gold watch in a mortar, yet that is feel what an immense globe this earthworld of ours is. For there was the Here is nature about to perform her widely-spanning surface of cloud lookdaily conjuring trick of making the ing perfectly flat though really part

There is a converse allusion familiar Nature simply takes us in when surface, which (regarded as a whole)

QUEEN OF HOLLAND. Her Aged Husband Adores Her, and Her

Will In His Law. Quite another style of a woman is Queen Emma, to whom the Dutch are reconciled only because she is a good nurse for their King; popular she could never be, because the Dutch detest even the most talented Germans, and Emma is a Princess of Waldock-Pyrmont. However, the King adores her and is only contented in her society and she seems to think there is no difference between thirty years and three score and ten. When William went to Potsdam to attend the marriage of his brother he little dreamed of marrying, but he met Helen of Waldeck-Pyrmont, now Duchess of Albany, and felt that at sixty-one life might recommence were she to become the Queen of Holland. Helen looked upon her aged admirer with scorn and refused his flowers and jewels. One day William overheard Emma say to her sister: "I should never refuse to become a Queen." "Ah," he exclaimed. 'as you find your sister is wrong will you marry me?" Immediately she accepted, and in 1879 became Queen of Holland. Those who were at the Dutch court when Emma made her entree say she was simple as a child; that she looked upon her palace as a marvel, danced and laughed as though she were not conscious that the courtiers were criticising her every gesture. The aged husband was shocked, but very kindly led her to the portrait of his mother, the proud Marie Paulowna, and said: "She never danced; a Queen should never laugh in public." Emma, like a never laugh in public." Emma, like a and as many more killed by unjustifiable "country gretchen," accepted the rebuke with good grace, and "since But the age is bettering. Men and methbuke with good grace, and "since then," say the Dutch, "we have nothing serious to criticise in her deportment, but the manner in which she murders our language we can hardly forgive." Already has Emma begun by prescribe some form of proprietary remedicing. to teach the Princess Wilhelmina the edy duties of a sovereign. When, in 1886, the King was ill and the socialists very daring, Queen Emma, without a word to her husband, calmed the dissearch he succeeded in securing some of the turbance in three days. Of her daughter she wishes to make a King, not a Queen. Not long ago her horses ran away. The coachman was thrown out, and she, with Wilhelmina, just escaped. Orders were given to bring out fresh horses, for, "if we do not start again my daughter will learn the ordinary demand all over the land. The meaning of the word fear."

Queen Emma is a brunette, rather pretty, according to the Germans beautiful, but a peculiar habit of winking detracts much from her appearance. Over the King she has control, and if he objects to any decision made by her she threatens to leave the palace to him-a dream of unhappiness. Every day the royal family dines at seven o'clock; afterward there is music and reading by the Queen, whose audience consists usually of her husband, daughter and the Jonkheer Alewyn, the only person whom William cares to see .- Hague Cor. from W. H. Dean, of No. 778 Seventh street,
New York, it is not necessary to make the
bare assertion that Allicock's Fonces
Plastens cure lumbago. Mr. Dean says:
Some ten days ago I was taken with a
very violent pain in the small of my back.
It was so severe that I could hardly
breathe; every movement caused great
agony. I finally found out it was lumbago.
Being entirely helpless, a friend sent to a
druggies and got two Allicock's Fonces
Plastens; these were well warmed and
applied to my back, one above the other.
In half an hour, to my great delight and
surprise, I found the pain began to abste.
In two hours I was able to walk out and
attend to my business, tho pain being aimost gone. Next day I was all right but
continued wearing the plasters for a week. colution, and moved to desperation as bespiorre and Marat were leading the wer of France to the guillotine, she de-mined that she would put an end to Marat's bloody reign.

Marat had demanded two hundred thousand victims for the guillotine!

He proposed to kill off the enemies of the Revolution to make it perpetual!

Horrible thought!

No weater it from the blood of this partie. Gaining access to his closely-guarded quarters by a subterfuge, she found him in his bath, even then inexorable and giving written directions for further slaughter!

He asked her the names of the inimical deputies who had taken refuge in Caen. She told him, and he wrote them down. "That is well! Before a week is over they shall all be brought to the guillotine."

At these words, Charlotte drew from her bosom the knife, and plunged it with su-

Log Cabins are fast go ing out of style as fashle able residences. Log Cab-ins will, however, always have a place in American history, as they were the most prominent feature of our country's early social

life. The pioneers were strong, rugged, healthy. Warner's Log Cabin Cough and Consumption remedy is a reproduction of one of the best of the old time roots and herbs remedies, which kept them well. Everybody praises "Tippecanoe" as a stomach tonic.

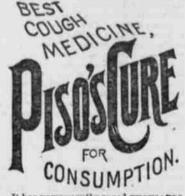

BITTERS

One of the most important organs of the human body is the LIVER. When it fails to properly perform its functions the entire system becomes deranged. The BRAIN. KIDNEYS, STOMACH, BOWELS, all refuse to perform their work. DYSPEPSIA, CON-STIPATION, RHEUMATISM, KIDNEY DIS-EASE, etc., are the results, unless something is done to assist Nature in throwing off the impurities caused by inaction of a TORPID LIVER. This assistance so necessary will be found in

Prickly Ash Bitters!

It acts directly on the LIVER, STOMACH and KIDNEYS, and by its mild and cathartic effect and general tonic qualities restores these organs to a sound, healthy condition, and cures all diseases arising from these causes. It PURIFIES THE BLOOD, tones up the system, and restores perfect health. If your druggist does not keep it ask him to order it for you. Send 2c stamp for copy of "THE HORSE TRAINER," published by us.

PRICKLY ASH BITTERS CO., Sole Proprietors. ST. LOUIS. MO.
