"Doctor" Morgan is undoubtedly a lightning meander of carriages. A vehicle, badly broken, was run into his hands on Saturday afternoon at 1:30 p. m., and was ready for service at 4. No mistake about rushing jobs in that establishment.

The Kilikili (or Ball of Twine) Society is still progressing. According to tradition, this is a very ancient organization, which existed in ages long past, and its objects are said to be of the highest merit. It is unfortunate for the race that it should have been resurrected in this enlightened age.

Judging from the list of passengers by the Island steamers Saturday and Sunday, the number does not seem to be much above the average. It was generally supposed that the city would be flooded with a large influx of natives from the other Islands, and with the jubilee festivities. The natives have decided to stay at home.

A correspondent writing from Honolulu, Hawaii, states that a young native girl, who had been at the beach fishing, on her return home fell from a cliff some 200 feet in height, and her body was found at the base horribly mangled and life extinct. The young girl was in company with her father, when the sad accident took place.

Co., amongst the several companies, declaring this course illegal according to Article 15 of the Constitution of the Fire Department, but to urge that the amount be placed to the credit of the sick fund of the Department.

From Maui we learn that the caterpillars have appeared very numerous on Maui, since the late rains, and are destroying some of the smaller cane in certain localities. On Friday, the train on the Kahului Railroad was stopped by the caterpillars, who were they along the track and on the rails. It was not until sand had been sprinkled on the rails, that the locomotive could move the train on to the Waialua depot.

No. thirteen of the series of Hawaiian Airs has just been published. The song is named "Ain Hiki Mai" and is one of the most pleasing of a number of graceful compositions. Mr. Berger has established a reputation as a composer of this peculiar class of music, his air smack of the Hawaiian soil. It is to be hoped that his fertile pen will give many another composition to delight the Hawaiian public.

Two runaways occurred on the valley road. The first was a brake and horse, which came tearing down the valley road just above the one mile bridge, and on reaching the bridge succeeded in wrecking the vehicle where the horse becoming disengaged, turned into Panoa valley and was captured. The second was brought up in front of the residence of Major Benson in a demoralized condition. The occupants of both vehicles escaped with slight bruises.

The Marshal has promulgated an order, to take effect this week, ordering all the fruit vendors from the market. If the Marshal would only order the police to clear the walks on Nuuanu street of the numerous bags and boxes which are piled up every morning in front of the Chinese shops, he would be doing a favor to the public. Another nuisance which ought to be abolished is the crowd of loafers who occupy the principal street corners, and seem oblivious to the rights of others - compelling even ladies to make a detour through the mud road these fellows and their low street talk. The vendors of

leis, who congregate on Nuuanu street, to make and sell their wares, ought to be made to respect their limits, and not occupy the whole sidewalk.

Earthquakes are becoming more frequent than during the past two or three years. We have reported on this hills, which look place about midnight of Friday, October 23d. Another quite long shake, occurred in Kau about two o'clock of a. m., of Tuesday the 9th inst. By our San Francisco papers, we notice that an earthquake was felt on the coast of October 23d, and was strongly reported as having been done in either of these shocks, they were so distinct as to be generally observed.

There is no wonder that abroad these Islands are called by many "The Empire of the Calabash." In looking into the various workshops, and noticing the number of calabashes in the various stages of completion, a stranger would readily come to the conclusion that the above quotation was correct. What will ultimately be the fate of all these calabashes, after they have been donated at the jubilee, it is hard to say. The amount of money now being expended for this class of Royal presents is something wonderful.

A circular has been issued by Commander-in-Chief Fairchild, of the G. A. R. asking the different Posts to contribute of their means to alleviate the distress occasioned by the recent earthquakes at Charleston, S. C. Geo. W. De Long, Post of this city, has accepted this suggestion Friday evening, by contributing \$50 from its funds toward this object, and also set about enlisting the sympathies of the benevolent in this direction with every prospect of largely increasing this amount. There is no doubt but that the Post here will make a good record in the cause of this praiseworthy effort to relieve the distressed of this sadly demoralized city.

The city is soon to be provided with two more drinking saloons by a pattern Government. What will be the result of this is to see natives under the demoralizing influence of liquor, but now that they are allowed to enjoy their rights, and the tabu removed, it is a common sight to see them in all stages of drunkenness reeling about the streets, many of them being in the most deplorable condition. The sight is disgusting to all who have the welfare of this people at heart, and shows a decided tendency toward lowering them in the scale of morality. This policy is sure eventually to work the ruin and extinction of the race.

Torchlight Procession and Fire Works To-night. To-night the Fire Brigade have a grand torchlight procession, and according to the programme there will be in addition a brilliant display of fire works from Punchbowl and the palace.

Speeches and addresses are extended to the young men and women of this city. It is hoped that all whose sympathy is with the temperance reform going on in every civilized community on the globe, will give us their presence at this meeting. Mrs. R. JAY GREENE, Rec. Sec.

Lecture on Chemistry. On Friday evening last Prof. Van Slyke delivered an interesting lecture, in the new Bishop Hall of Science at Punahou, on the elementary principles of chemistry, designed to illustrate how intimately this science is interwoven with our every-day life. The lecturer spoke of this as one of the most recent of the sciences, hardly dating further back than the opening of this century. The various elementary principles were stated and illustrated by some very interesting experiments, some of which were new, even to those who had enjoyed the best advanced lectures on the subject in laboratories twenty-five or thirty years ago. The Professor appears to be supplied with the most perfect apparatus that is now in use, and with such tools and such a complete laboratory, it must be as great a pleasure for him to give illustrations as it was to the audience to witness them. He stated the present lecture was the first of a series, which he will give, in the same easy and comfortable hall, so arranged that every one can hear and see all that is said and done.

The Builders. It is stated on good authority that Mr. E. B. Thomas has been awarded the contract for erecting Mr. M. Melderny's new brick building on the corner of Merchant and Fort streets. The building, if erected according to the designs, will be a magnificent one, the lower front story is to be composed of iron and plate glass.

Mr. Thomas has also commenced the foundation walls of two-story brick building, the south corner of King and Maunakea streets. Mr. Lucas has the foundation laid for Mr. Mendonca's two-story building, corner of Nuuanu and Hotel streets. The same gentleman is laying the foundation for a two-story brick building on the east side of Nuuanu street, for a Chinese firm.

Just below the above, Mr. Thomas has a two-story building well in hand, and will shortly complete it. Mr. Mayhew is making good progress with the Chinese Club building, having reached the second story. It promises, when completed, to be a fine structure.

There are several other buildings projected, but the plans are not matured, and it would be premature to present to speak of them. Fire at Kohala. On Friday night, at a quarter to 7 o'clock, the brush houses of Kohala plantation were discovered in a blaze. Three of these houses were full, and the fourth partly full. As there had been no work in the mill for three weeks past, there is every reason to believe that the fire was the work of an incendiary. Of course many stories are being told, but the foundation seems to have gained the most credence is as follows: A Japanese hand had been found for dropping work and refusing to return. All day yesterday he was missing, having been seen by one of the lunas. The fire broke out between the houses, about half

way their length, where it could not be seen until well under way. It is supposed that the Japanese, to vent his spite, set this fire going. Cutting began in the morning preparatory to grinding on Monday. Fortunately this mill burns the trash direct from the grinding, and will not be long delayed. It is just three years since the brush houses of this plantation were burned, and these new ones were put up at great expense, with every precaution taken to insure their safety from fire that could occur in any ordinary way.

In Memoriam - Wm. B. Wright. On Saturday morning, November 13th, Mr. William B. Wright, an old and much respected citizen, departed this life at his residence, near the Insane Asylum, Kapalama, aged 55 years. At the time of his death Mr. Wright was Superintendent of the Insane Asylum, a position which he has held since July, 1875, with credit to himself and his country. Being of a kind and humane temperament, he was by nature peculiarly fitted for the duty of caring for the temporal wants of those who were placed under his care. About two years ago Mr. Wright sustained a stroke of paralysis, and subsequently a second attack, since which his bodily health has been gradually failing. Tuesday Mr. Wright was seized with a third attack, from the effects of which he never rallied until death ended his sufferings. There are many in this city who will miss "Uncle Billy's" kind and genial face and greeting from their midst. Mr. Wright during his younger days was an active member of the Fire Department, and later on of the Masonic Fraternity and Knights of Pythias of this city.

The funeral took place Sunday afternoon, under the auspices of Lodge Le Progress de l'Oceanic, No. 124, A. F. & A. M. The remains were deposited in the Hawaiian Band, and a large detachment of firemen, Knights of Pythias and Free Masons, followed by a large concourse of citizens. His remains were deposited in Nuuanu Cemetery with the solemn and impressive funeral services of the Masonic Order, and also of the Knights of Pythias.

The Press in China. The leavening influence of the press is reported on the increase in China. The Pekin Gazette is the oldest newspaper in the world, but its contents have an official dryness not calculated for wide reading. Recently small journals, more like those of the outer world, have been started at various centers. These are printed in the native language. Two more native journals have been added to the list - the Amoy Sin Pao and the Tientsin Shin Pao. The former consists of twenty-four very small pages of rather closely printed matter, and is sold for about 1 1/4d. English, per copy. The new Tientsin paper consists of eight pages, and is issued daily at about a halfpenny. It is reported that the habit of reading these papers is growing among the Chinese officials. The North China Herald affirms that the press, as a public factor, is beyond doubt increasing in the empire, and that before long every large center of population will have its own newspaper.
