ENGLISH SPARROW FELLS

Two Birds Fight in City Hall Park

and Fair Pedestrian Gets the

Worst of It.

SPECIAL TO THE INTER MOUNTAIN, St. Paul, April 28.—A sparrow knocked a swoman down the other afternoon just after 5 o'clock on the Fifth street side of the city hall. The sparrow recovered and flew away.

the city hall. The sparrow recovered and flew away.

The city hall sparrows are the most impudent of their unruly tribe. They have become so familiar with man that they have no fear of him.

Occupied with their own troubles and supported by their own insufferable impudence, they chatter and fight at will about the building and grounds, oblivious of the rights of the human species and chattering with laughter at the futile efforts of the tramp dogs which pursue them.

Two of the tribe got into a wordy argument on the coping of Register of Deeds Fitzgerald's window yesterday afternoon. There must have been a challenge to combat, for there was presently a fight going on.

The rules were ignored. They fought on

MINES ABOUT NEIHART

ARE QUIET AT PRESENT

Great Falls, April 28.—Judge Richard Bennett of Neihart says that the Neihart mining district at present is quiet. "The low price of silver during the past few years has retarded development work, and as the rich ore clutes were gradually worked out the mines closed down.

"There is no lack of rich ore in sight in the Florence, Queen, Galt, Diamond R, Ingersoll, Broadwater, Silver Belt, Big Seven Ripple, Benton and numerous other properties, but the products being almost exclusively silver, and this at so low a price, it is not hard to see why present conditions prevail.

"The camp is a wonderful silver producer. The Broadwater has produced by tunnel development, over \$4,500,000. The Big Seven's (this property carries some gold values) output in two and a half years was about \$375,000.

"The Calt and Florence have each produced in the neighborhood of \$300,000. The Silver Belt, owned principally by David L. S. Barker, has produced about \$175,000.

"The Benton group has to its credit in

David L. S. Barker, has product in \$175,000.

"The Benton group has to its credit in production nearly half a million dollars. The Diamond R has about \$10,000 or more. There are many other producers, all the way up from \$5000 to \$20,000, that we never hear of, that would be som rick producers with a fair advance in the price of silver.

BRITT IS NOW THE

FAVORITE IN BETTING

(Continued from Page Eight.)

expect a bustling fight, in which there will be some stiff punching.

Fitzgerald has done a lot of rough work with Kid Parker, while Britt has had a burly boxing partner in Dave Barry, a middle-weight. Britt will box for the remainder of the week with Sant Berger, the heavyweight. He is fast and clever and will carry Britt at a good pace.

Manager Greggains, knowing the confusion which attended the seating of spectators at the fight last month, has secured a new force of ushers. He says he will personally guarantee ticketholders the seats called for by their coupons.

WOMAN TO THE GROUND

# IN THE STREET TODAY

Let Associated press.

New York, April 28.—So few stocks were traded in and the changes were so insignificant that it was difficult to detect the drift of the market at the opening.

Subsequent transactions did not relieve the market of its opening dullness, but the price level was light and slightly above last night on an average.

There appeared to be a more general shad-ing off at 11 o'clock.
Selfing of the usual leaders ceased and they steadied at the low level. Meanwhile small offerings of other stocks continued, resulting in losses of 3 in Pullman, 245 in Northwestern and a point in Canadian Pacific.

## COPPER STOCK QUOTATIONS

(Reported by Coe Commission Co.) Boston, April 28.—The copper mining shares closed today as follows:

## LEAPS THIRTY-FIVE FEET; GETS ONLY SCALP WOUND

Car Repairer, Rendered Nervous by Liquor, Takes the Jump of His Life in St. Louis.

SPECIAL TO THE INTER MOUNTAIN.

St. Louis, Mo., April 28.—Edward Quinn, a car repairer 29 years old, jumped from a third-story window at No. 1000 Cass avenue at 5 o'clock this morning.

George Phillips and Edward Curley heard the crash of glass, and, running to the window, saw Quinn lying on the pavement, 35 feet below.

Quinn, who slept in the room with his two friends, had been drinking. He crept from bed and leaped through the window in an attempt to kill himself.

The injured man was sent to the city hospital. It was found that he struck the pavement head first, but had his hands extended like a diver. He has a bad scalp wound and is supposed to be hurt internally, but his skull was not fractured. He recovery is expected.

Until about a week ago Quinn was in the employ of the transit company, but he began drinking a great deal and has not been at work recently.

He lived at No. 1000 Cass avenue, and is single. No other cause than liquor is assigned for his attempt to end his life.

He is said to have imagined that police-

#### STARVES HIMSELF IN JAIL BECAUSE MOTHER IS AWAY

never hear of, that would be som rich producers with a fair advance in the price of silver.

"The late advance in silver gives renewed hope. Mr. David L. S. Barker has just returned from a six-months' tour of the mining regions of Old Mexico, and in comparison, he looks more favorably to Neihart than ever before. He will increase the force of workmen in the Silver Belt mine at once.

"The closing down of the Diamond R concentrator, almost immediately after its completion and the expenditure of nearly \$255,000, was rather a black eye to the district to outsiders who do not know the facts as to the cause.

"More mem—poor men—have made fortunes, small and large, in Neihart, ranging from \$5,000 in mining, than any other district of its size in the Rockies, and all this has occurred with an average price of silver not to exceed 65 cents an ounce.

"Old-timers are loath to leave, knowing the vast possibilities of the place. With an apparent shortage in metallic money and the commercial needs of the world gives promise of an advance and permanent demand for silver.

"Great Falls business interests are interested in the development of this vast tributary mining region right at its door, and have always lent a helping hand."

BRITT IS NOW THE Demented Boy in Georgia Won't Eat Food That Has Been Prepared by Strangers.

SPECIAL TO THE INTER MOUNTAIN.
Brunswick, Ga., April 28.—Rather than
at food that was not prepared by his
other. Bailey Chance died here yester-

mother. Bailey Chance died here yesterday.

Thirty days ago Chance was placed in jail on a writ of lunacy, as he had been acting queerly for some time.

From the day of his incarceration until his death Chance never touched a mortiel of food. He said that if he were to eat food that had not been cooked by his mother he would die immediately.

Viands of the most tempting quality and appetizingly prepared were offered the man day after day, but he absolutely refused to partake of them.

Several attempts were made to force

Several attempts were made to force food down his throat, but he became so violent and resisted so fiercely that the attempts were discontinued.

Chance's mother was not here and it was not possible to gratify his desire for food cooked by ker.

FOR RENT Two housekeeping rooms, mod-ern, gas range, hot water heating. Upton Ell., No. 412/4 South Main.

There must have been a challenge to combat, for there was presently a fight going on.

The rules were ignored. They fought on the grass and incidentally in the air. Twice they went to the mat together and took the count. Then one of them made a fierce onslaught and the other took to flight.

Chattering at a high pitch they whirled about through the air. The pursued took a long curving flight that brought him close to the rail on the Fifth street side of the grass plot.

A little woman, dressed all in black with drooping tails bordered in white streaming behind her veil, was just passing.

The flying bird struck her fairly in the face. She screamed and fell to the walk. The bird fluttered to the street and fell. His pursuer followed and pecked at him. He took refuge again in flight to escape the repeated blows that were aimed at him. The woman gained her feet before assistance reached her.

"Well, I declare," she said, and went on. The birds went up on top of the Odd Fellows building to have it out. FURNISHED ROOMS New Gay & Grady block, No. 7 West Mercury street. All mod-FOR RENT-Newly furnished front suite of rooms. Tallant block, corner Park and

Prof. R. G. Young, in Conjunction With the Members of Board of Education, at Work on Problem.

One of the burning questions of the day is, "What can be done to save the defin-quent children from becoming criminals?" R. G. Young, in co-operation with the school trustees of Butte, is in a fair way to solve this problem, so far as this city is concerned.

is concerned.

During the meeting of the legislature last winter a bill was drafted by the school board of Butte for the purpose of doing away permanently with truancy in the schools. This bill was passed and is now a law.

a law.

No bill passed by the law-making body could have been of greater import to the citizens of the state. It covers a long needed want in the school system and will greatly aid in eradicating criminal tendencies in the young generation now growing up in the state.

# As Soon as Possible.

It is the plan of those directly responsible for this law to put it in active operation as soon as possible. There are so many excellent features in it that the public will, no doubt, lend all necessary assistance to make the law effective.

Mr. Young, as superintendem of the schools, found something out of the ordi-

nary routine had to be done to suppress truancy in the schools. While in the East last summer he made a study of the meth-ods employed there, especially in Boston and Chicago, and soon discovered the thing necessary to aid him in making of the truant children of Butte, most useful citizens.

the truant children of Butte, most useful citizens.

This school is for the purpose of conschool to be directly under the supervision of the school board, just the same as other schools in the district.

This school is for the purpose of confining truants, both boys and girls, and teaching them some useful trade—something in the line of mechanical arts—the gris to be taught housekeeping also evon though some of them might take up one of the other arts.

One of the first things taught will be the use of tools in wood work. Drawings will be made of the object as a whole, then in parts; these will be followed by the boy cutting and placing the parts as a whole. Should it in time be a success he will be permitted to send the articles to his home for use there, or do whatever may be thought best by those interested. The same plan will be followed with the girls.

In this way the children who would other

In this way the children who would oth-

MESSENGER SERVICE

crwise have become incorrigibles, perhaps criminals, are steadily taken along the path of industrial success.

There are several hundred children in this city who dislike school and seek every possible excuse to absent themselves from the routine of school life.

They are intellectually dwarfed. This does not necessarily signify that they are criminals nor should they be classed as such. These boys and girls are fitted for some useful work, provided their fitness be discovered.

#### discovered. Danger for Children.

When these children are unfortunate enough to have parents who do not seem to possess the qualifications necessary to control them there is great danger for the children.

control them there is great danger for the children.

They grow up belligerent under the necessity of attending school and are unpleasant to deal with at home and abroad. They become a general nuisance to the teachers, who in fact are not always sorry to have them absent. Now these are the little folks to be reached by Juis new law.

It provides for an industrial school for the purpose of affording a place of confinement, discipline, instruction and main, animace of children of compulsory school age who may be committed thereto.

Section 1923 of the bill reads: "Every child between the ages of eight and sixteen, not engaged in some regular employment, and who is an habitual truant from school, or who absents itself habitually from school, or who, while attending any public, or private or parochial school, is incorrigible, vicious or immoral in conduct, or who habitually wanders about the streets and public places during school hours having no business or lawful occupation shall be deemed a juvenile disorder-juperson and be subject to the provisions of this act.

In speaking of this industrial school Mr. ly person and be subject to the provisions of this act."

Young said to the Inter Mountain:

"It is the desire of the school trustees and myself that this senool be opened in Butte at as early a period as possible. The law reads that it be established within two years, but all that can be done will be done to try and put it in operation at an early date.

"One of the plans we loope to see carried out in the work is to have a married man and his wife to take charge and create a home spirit in the school. It is desired that a department of gardening be introduced.

"It is a well known fact that digging in the earth has a desirable effect on the morals of people; especially is this true of the children.

"Then, too, it will teach them to study growth, to watch the flowers and vegetables as they develop through the different stages of growth. This will indirectly teach them to protect rather than destroy.

"No boy who learns the care of plants will take a strick and knock the heads off flowers; in time he will learn to protect all things.

"The care of flowers will also awaken the artistic instincts and when combined with the work indoors in the mechanical arts, will make a useful citizen of a bow who might otherwise have been a care to the state in later years."

Wharton—Last night at the theater I was a supplementation.

Wharton—Last night at the theater I saw a magician break two eggs into a silk hat, hold the hat over a flaue, and then produce two live rabbits from it. And the hat was not injured, I think that a wonderful trick.

Barton—Pshaw! That's nothing. At the house where I board the cook can break two eggs into a bowl, and after beating them a little, turn out an omelet the landlady will make to serve six persons without straining her conscience in the least.
