

SILVICAL SUBJECTS FILL THE DAY

SUPERVISORS GET MUCH GOOD FROM EXTRA SESSION IN DISCUSSING THIS THEME.

As was expected, it required all of yesterday for the forest supervisors to wade through the subjects which were on the program for Wednesday under the general head of silviculture. The discussions brought out so many points which the supervisors desired to hear that the extra day was well worth while.

The morning session opened with a paper on "Field Methods of Conducting Reconnaissance and Forms of Compiled Data and Maps" by W. N. Millar. The speaker went into the details of this line of work in a very clear-cut manner and concluded with an appeal for the simplification of the forms for the data records, but urged reconnaissance to be continued.

"The Forest Working Plan" was a subject, mostly of a technical nature, treated by Supervisor T. Mason. Although of little general interest, the points brought out in the discussion were of great value to the supervisors.

Methods of reforestation and whether broadcast sowing or seed planting by the several methods was preferable to the planting of nursery stock was a theme which brought forth expressions from nearly every supervisor present, at least all upon whose forests the two plans for growing trees have been tried. The conclusions of the thorough ventilation of this subject were that sowing and seed planting should be confined to the very best sites, where moisture is abundant and where previous conditions indicate that seed would germinate well and bring forth strong seedlings; that experience has shown the planting of nursery-grown stock most satisfactory under general conditions; that a much better stand is secured and that the expense per acre to secure equal stands is less than that of seed planting.

The beetle-fested district in the Flathead forest, where the ravages of the pest has caused some alarm and led to a campaign being inaugurated to control the situation, was another theme of interest yesterday. Page Bunker, supervisor of the Flathead, gave an account of the situation and told of the plans to cut and burn the trees of the entire district where the beetle is spreading. This called for opinions from a number of supervisors from other forests, who questioned the soundness of expending so much money in the one district on the Flathead when there were other sections throughout the district where the beetle was doing considerable damage, but where a history of the bug showed it to have advanced to only a certain stage and then been overcome by natural enemies and thus held in check. It was shown, however, that in the Flathead district the spread had been more than normal, and it was deemed advisable not to allow the bugs to go so far that they could not be checked without serious difficulty.

Donald Brewster, forest assistant in charge of the Priest River experiment station, established near Priest River, Idaho, in this district last fall, gave an interesting account of the reasons for selecting the site, the buildings constructed and the work planned, urging the supervisors to take advantage of the facilities of the station in securing help upon any problem or line of investigation which they desired to follow.

Today the supervisors will take up the subjects under the department of lands of which the following will receive prominent attention: Settlement—Policy, procedure, blanket listing, systematic examinations, estimates for, closing forests, rights of way, roads and trails, driveways, telephone lines, conflict with power sites, conflict with administrative use and soil examination.

Stations—Selections within forests; withdrawals outside forests, policy on number of, placing improvements on, appropriation of water.

Claims—What constitutes evidence of invalidity, homestead, desert, mining claims, placer, lode, forest homestead.

Uses—Publicity schedule of charges, revocation, question of highest use, easements.

Railway—Transmission lines, reservoirs (drainage), easements versus permits and full title acquisition of site.

Water power—Regulations, regula-

CHAMBER APPOINTS COMMITTEES

SOME SPECIAL MATTERS DEMANDING ATTENTION RESULT IN THIS ACTION.

The chamber of commerce yesterday announced the appointment of several special committees to undertake matters of immediate importance in Missoula.

Messrs. Dan O'Hern, F. S. Lusk and J. B. Henley are a committee to work out a plan whereby the consolidation of the two local telephone systems may be brought about.

S. R. Inch, G. F. Peterson and W. F. Wayne are to ascertain and report back to the executive committee the feasibility of having the chamber of commerce quarters moved into a more central and more modern office.

Sid. J. Coffee, D. J. Donohue and J. M. Keith are asked to confer with a like delegation from the university to devise ways and means for making the interscholastic meet for 1912 an unqualified success.

James Bonner, Dan McQuarrie and H. Y. Gephart are appointed as additional delegates to the northwestern mining convention to be held at Spokane, February 15, 16 and 17.

JAIL IS TOO LARGE FOR ENTRANCE

DOOR TO THE CITY HALL BASEMENT IS TOO SMALL TO ADMIT THE CAGES.

The new city jail has come. It is undoubtedly here. It was shipped from Cleveland on January 9. It arrived yesterday. The greater part of it is reposing on the outside of the city hall. There is reason for its being left outdoors. The reason is that it won't go inside. There is no aperture of sufficient size to permit its being placed in the basement where it belongs. It looks as if the city hall would have to be built around the jail.

Or else that the city will have to get another jail. However, a solution has been found. If the door leading to the basement is taken out and enlarged and a piece of the side wall is removed, the steel for the cages can be taken into the basement. This will be tried today. It is hoped that it can be so arranged, as it would be inconvenient to have the jail outside.

The debate between the team from Anaconda and the local high school team, which was scheduled for February 16, has been moved forward to February 9 on account of conflict with a university lecture on the date first named. Keen interest is shown in this first contest for the interscholastic series of the year by the Missoula team. The side taken by the local speakers is not in high favor, but it was not a matter of choice, and the young people are making the best of what fell to their lot.

The Missoula County Medical association will meet in regular session in Dr. Fixley's office Saturday evening at 8:30 o'clock. Dr. W. P. Mills will

It's a Good Sound Common Sense Policy

To use medicines only of KNOWN COMPOSITION, and which contain neither alcohol nor habit-forming drugs. It is foolish—often dangerous to do otherwise. The most intelligent people, and many of the most successful, conscientious physicians, follow this judicious course of action. The leading medical authorities, of all schools of medicine, endorse the ingredients composing Dr. Pierce's medicines. These are plainly printed on wrappers and attested under oath. There's no secrecy; an open publicity, square-deal policy is followed by the makers.

Dr. Pierce's Favorite Prescription

THE ONE REMEDY for woman's ailments, sold by druggists, devised and gotten up by a regularly graduated physician of vast experience in treating woman's peculiar diseases and carefully adapted to work in harmony with her delicate organization, by an experienced and skilled specialist in her maladies.

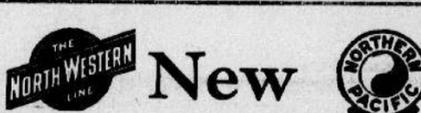

THE ONE REMEDY for woman's ailments, sold by druggists, which contains neither alcohol (which to most women is the rankest poison) or other injurious or habit-forming drugs.

THE ONE REMEDY for women, the composition of which is so perfect and good that its makers are not afraid to print its every ingredient, in plain English on its outside bottle-wrapper, and attest the correctness of the same under oath.

We have a profound desire to avoid all offense to the most delicate sensitiveness of modest women, for whom we entertain the most sincere respect and admiration. We shall not, therefore, particularize here concerning the symptoms and peculiar ailments incident to the sex for afflicted of the gentler sex than to refer them to Dr. Pierce's Common Sense Medical Adviser, a great family doctor book of 1000 pages, ailments and matters about which every woman, whether young or old, single or married, should know, but which their sense of delicacy makes them hesitate to ask even the family physician about, are made plain in this great book. Write for it.
