Dr. DuBois Speaks

The first session in London on Saturday afternoon, August 27, was given over to a discussion of the lately inaugurated policy of segregation in West and South Africa. Dr. Alcindor of London, president of the African Progress Union, in his opening remarks briefly outlined the purposes of the Congress and in turn presented Dr. DuBois to the audience. Dr. Du Bois gave a remarkably clear and able presentation of the problems facing Africans and persons of African descent throughout the world. He traced the beginning of the movement to unite the thought of Africans from the time in 1900 when a group of men, including the late Bishop Alexander Walters and the late Coleridge Taylor, met in London; the races Congress in London in 1911 and the first Dr. DuBola Speaks

The Saturday evening session was given over to the discussion of the Negro problem of the United States. Both sides of the story were told. Dr.

Following Dr. Leys, the Rev. Mr. Marks of Sierre Leone told of conditions in his country, after which Dr. DuBois read a paper prepared by a South African who had been refused permission to attend the Congress. This paper was one of the most seathing indictments of British misrule heard. Grievance after Grievance was recited; the story of the chicanery, the trickery, the open robbing of the natives was given in so vivid a fashion that even the American delegates felt that the South of Africa and South of the United States had much in common. Other peakers followed who, not served.)

CONCERNING DICKSON ORPHANAGE.

There is probably no institution in the State of Texas, which performs a more definite and constructive service for our people than the orphanage at Gilmer, founded and now presided over by Rev. W. L. Bickson.

Gathered together in that home are 174 orphaned Negro children—children
—children who but for the shelter and protection offered there would be thrown
upon their own resources—untrained, uneducated, absolutely unprepared to meet the demands of supporting themselves honestly and honorably.

It is probable that we have not fully realized the value to us as a group of Realize that during a twenty year period, more than 2000 children have been

cared for and educated in this home,—fitted in a large measure to honorably support themselves and contribute to the well being of the world about them.

Think again in terms of this same 2000 children without the ministration of such a home and realize that its existence has eved the State and us from the care of them as criminals or the shame from them as unproductive individuals.

It is a source of constant blessing to our people in Texas, Every one of us should consider it so. And in such consideration we should

feel more keenly our duty toward it.

Every one of these 174 children must be clothed, fed, taught, sheltered for twelve months in the year.
