

and it has no other method. According to the Republican press his principal qualification for the high office of Secretary of State consists in the fact that he was selected by me for a lesser or subordinate office, for which the Republican Senate refused to confirm him. The opposition are welcome to whatever consolation or argument they can derive from that circumstance. The Democrats will win this fall because the honest, bona fide workmen of the State will vote their ticket. They realize that whatever beneficial legislation has been had in the past has been secured mainly through the efforts of Democrats and usually against the opposition of the Republicans. The records of the Legislature prove this fact. Nearly every disasteful labor measure received the united Democratic vote and passed with the aid of a very few Republicans, the main body of opposing men who were opposed to the proceedings of the Legislature for several years past know this to be the truth. The various third parties, which are suddenly sprung up and not engineered by genuine workmen, but by ambitious politicians, ministers, priests, lawyers and other professional men. The Knights of Labor, the benevolent and republican labor organizations take little stock in these new political movements. The laboring man wants practical measures of relief, not mere theories which will take a century to work, and he is satisfied with the provisions of the Democratic platform this fall.

But the Republicans claim that they have secured the course of the Legislature last winter. What do you say to that? The Republicans always claim everything they have accomplished themselves it must have been by something other than their legislation. Perhaps it was by their course in reference to confirming appointments, or possibly by the manner in which they refused to confirm Mr. Arkell, a reputable citizen of ability, who would have made an excellent Railroad Commissioner, or by the manner in which they refused to confirm Mr. Arkell, a reputable citizen of ability, who would have made an excellent Railroad Commissioner, or by the manner in which they refused to confirm Mr. Arkell, a reputable citizen of ability, who would have made an excellent Railroad Commissioner.

What about the renomination of President Cleveland next year? It is not wise to attempt to cross a bridge until you get to it. The will be determined near enough before. Every Republican who is reported in the Republican press various interviews, understandings and arrangements purporting to have been had with or made by me, and have only to state that they are all wholly unfounded. The Presidential question of 1888 will settle itself at the proper time. Until then I have nothing to say. The Democratic party of this State has only one present duty before it, and that is to achieve success in the pending election, and every true Democrat will exert himself manfully to do his duty. The party is united, enthusiastic and confident, and again I repeat we expect to win this fall.

THOSE ELECTION INSPECTORS.

The United Labor Party's Application for a Mandamus Denied. In the General Term of the Supreme Court to-day Presiding Justice Van Brunt and Justices Daniels and Bartlett handed down an opinion affirming the order of the Special Term denying a motion for a peremptory mandamus in the action of the United Labor Party against the Board of Election Inspectors. The fifth election inspector from that party.

In the opinion, which is per curiam, Judge Daniels says: "If the allegation that the United Labor Party as a party for the election had cast upward of 50,000 votes at the last election had been established beyond reasonable ground of controversy, then the motion for a peremptory writ would be granted. The Board of Police Commissioners to appoint the additional inspectors from that party would have been successful." The opinion continues that this was not done, an issue of fact is necessarily created, and no court without the consent of all the parties, can consider and decide otherwise than by a formal verdict.

Concluding the Court says: "In order to determine to which party or organization the additional inspectors in each district can be given, it must first be ascertained and determined by a trial before the Court, whether the party, if either of them is, by which these 50,000 votes were given, and until that fact is established to the satisfaction of a majority of the Court upon this application no authority to make any appointment of these inspectors exists either in the Board of Police or in the Court. If it was to either of the three parties, then it seems to follow that no additional inspectors can be appointed.

Ordinarily the case would present an issue to be tried by a jury, but the parties to the contest have permitted by the law to waive a trial by jury, and to consent either to a reference to a trial before the Court, or to a reference to a trial before the Court.

The Court says that the case must proceed at the earliest possible moment before a Circuit Judge who will be selected in order that whichever party is entitled to the inspectors may have them and the inspectors allowed to act and protect the interests of their constituents.

Theft at Harvard and Expulsion. Boston, Oct. 10.—Morris Mnsacke, of Cleveland, O., an eighteen-year-old student at Harvard, was arrested Saturday, charged with purloining the sum of \$11 from the pocket of J. B. Thomas, a Freshman. The student was committed to the gymnasium, where Thomas was exercising. Joseph Follen, the janitor, watched Mnsacke and saw him take the money. The janitor informed Sargent, who made the complaint on which the student was arrested. He was arraigned this morning and fined \$50 and cost, which his friends subscribed. Prof. White telegraphed his parents, who are wealthy, of the student's disgrace, at the same time saying that he was expelled.

It Wasn't Gus Williams. Mr. Barnard, Gus Williams's lawyer, received a letter this afternoon from H. B. Waldman, manager of the Matrimonial Agency, at No. 117 East Thirty-first street, acknowledging that he was mistaken in reference to Mr. Williams being the person who had secured his services to secure a wife, and he wishes to apologize to the vicar.

Another Cholera Victim. A child died of cholera on Swinburne Island yesterday, making the seventeenth death on the island of the Alecia passengers, and a total of twenty-five deaths since the Alecia left port.

DIMES FOR ANTI-POVERTY.

ENTHUSIASM CONTINUES AT THE FAIR WITHOUT THE RAFFLES.

Dr. McGlynn's Friends to Present His Portrait to Father Reilly as a Testimonial—Exciting Voting Contests—Mrs. George's Bantam Hen Lays an Egg—A Financial Success and Enormous Profits Assured.

THE action of the police authorities regarding the sale of "chances" on various articles, and the announcement that the law concerning lotteries would be rigidly enforced hereafter, have forced the management of the Anti-Poverty fair at Madison Square Garden to alter the programme in many particulars. But the fair will not be brought to an untimely end. A circular issued to-day sets forth the facts and states that the goods put up for distribution by lot will be sold at auction and the proceeds divided pro rata among those who hold the tickets, if the proceeds exceed the amount paid for chances, the surplus will go into the society fund. There are hundreds of articles, representing thousands of dollars in value, which were to be raffled off on Saturday next.

Five weeks ago nobody had thought of an Anti-Poverty fair. It was an idea born in one moment and carried into execution the next. The fair begins its third week to-day. Each day since its opening has added to its attractions, till the great pavilion is a wilderness of things beautiful and things picturesque. On Saturday night alone 7,000 people visited the exhibition, which means \$700 for the benefit of the Anti-Poverty Society. From the pockets of the 7,000 by every manner of device which genius could invent and pretty maidens practice.

There are portraits of Dr. Edward McGlynn everywhere and in all styles, shapes and sizes; and the ladies of St. Stephen's, who have stood so faithfully by their deposed priest, are so active that it is almost impossible to distinguish between the "parishioners" and the Anti-Poverty Society. Dr. McGlynn and Judge Maguire, of California, will address the people at the fair to-night, and other speakers will be called in to make up for the loss of the excitement consequent on the suppression of the raffles.

Dr. McGlynn in his recent visit to Rome, received a peculiar and gratifying surprise. The Rev. Father Reilly, of St. John's Church in that city, sought him out and paid great attention to him. He was full of the enthusiasm of the "Parishioners," and they will purchase the magnificent life-size photograph of the Doctor, which is exhibited near the entrance, and send it to Father Reilly.

There will be an entertainment of some sort each evening of this week at the fair, and on Saturday night the programme will alternate with McAville's Orchestra on Wednesday night and the voting contests will go on with the usual spirit every night. The card of the contesting party with the complement of men, who are now busily engaged in raking the lawn and woody slopes from Fifty-ninth to One Hundred and Tenth streets, will be the last of the leaves in the fragrant heap, and when a sufficient quantity has been collected they will be carted off somewhere and destroyed.

For a great many years past it has been customary to burn the leaves over on the west side of the Park. There was so much complaint last season, however, from the residents along Eighth avenue, that the smoke and dirt which was caused by burning this enormous quantity of leaves in the very heart of the city that the authorities have ordered that the leaves in the Park be taken up to Riverside to be burned. The people up in the goat district need not now be apprehensive of any more prairie fires such as have alarmed them in previous years when the big bonfires were in full blast.

At the Labor Convention. ST. PAUL, Minn., Oct. 10.—The Knights of Labor Assembly will meet this afternoon at 2 o'clock. The morning was devoted to sessions of the various committees. It is understood that Powderly's report on the attitude of the Catholic Church in the United States, given by Cardinal Gibbons credit for saving the organization from the ban of the Pope, will be presented.

In the Real-Estate Market. Business began at the Real-Estate Exchange to-day with an auction sale by Brown & LeVine of a four-story stone-front house, with lot 28, 28x38, No. 40 East Twenty-second street. The property was actively bid for, and finally sold to John Wilson for \$14,000. The Paulist Fathers have sold the premises known as Manhattan Hall on private terms. The real-estate apartment, Nos. 200 and 202 West One Hundred and Twenty-eighth street have been sold for \$74,000. Eighty-one building lots situated at Bath Beach, L. I., will be sold to-morrow on the premises by Jerome Johnson.

Smith & Ryan will sell four lots on Claremont ave., Twenty-third ward. J. T. Stearns will sell the Chrystie estate, comprising the site of the Macomber estate, near Witter and Weygant place, Fordham Heights, Twenty-fourth ward. Smith & Ryan will sell property on the corner of Stanton and Gorek sts., No. 5 East 63d st., No. 72 East 84th st., No. 12 East 84th st., No. 66 Lexington ave., No. 21 Leonard st.

BEARS CAPTURE THE MARKET

MASTER DALLAS'S READING REPORT CAUSES A SENSATION.

If His Decision is Carried Out Reading Will Have the North Pennsylvania and Bond Brook and other—Benevolent's sudden Reaction from Europe Starts Reports of a Cable War—Gossip on the Street.

WALL STREET, 8 P. M. The bear market to-day proceeded in working down the prices of leading stocks materially. First it was Erie and then the Grangers, and then the Vanderbilts, the Commodore-Bathman party making a particularly savage drive against Lake Shore. Reading and Western Union served to stiffen prices at intervals, but the spells of firmness were of short duration.

The great event of the day was the announcement that Special Master Dallas of the Reading had filed his report, in which he finds that the first Series mortgage currency note of the North Pennsylvania lease, confirming the position of the Wharton-Kemble syndicate. If the decision of the Master is carried out, the Reading will be forced to sell the North Pennsylvania and Bond Brook line at its mercy and consequently it is thought that the contesting parties will come together.

The French and English steamers which have arrived from Europe were made the basis for a report that the cable war was approaching a settlement. The French and English steamers which have arrived from Europe were made the basis for a report that the cable war was approaching a settlement.

The Merchants' Hotel ranked among the first in the city, but the march of progress has left it only the last of its former capacity, a few boarders, some transient guests who drop in on their way from the Cortlandt street ferry, and others who patronize it because their fathers and grandfathers stopped there fifty years ago. These last usually want to see the register of the hotel to study the chronology of their ancestors, and they daily bother to Landlord Samuel Cole, who has managed the establishment for a year past.

The immediate predecessor was H. E. Billings, who, for nine years, welcomed guests to the time-honored public house. He was the successor of William Schenck and his partner, Mr. Clark, who, in 1812, started the hotel. Mr. Muirhead, a Jerseyman, was the first proprietor. Dr. Joseph W. Saul, of Baltimore, who is now about eighty years of age, will be stopped at the hotel for forty-three years, when in the city, laughs as he relates how the knowing ones used to gather at the Merchants' when Astor was building his hotel and each of them would tell how he was ruining himself financially by building "such a big barrack of a castle so far up town." It never would be filled, they said, and would stand ever as a monument to the folly of its builder.

The Doctor says that those of the croakers who have lived to see their error, have changed the opinion so fully expressed in the Thirties. Since the first touches of frost the leaves in the parks have begun to make their annual litter. Although many of the trees in Central Park are still green, leaves have fallen so rapidly within the past two days that the Superintendent has put to work the full complement of men, who are now busily engaged in raking the lawn and woody slopes from Fifty-ninth to One Hundred and Tenth streets. They gather the leaves into big, fragrant heaps, and when a sufficient quantity has been collected they will be carted off somewhere and destroyed.

For a great many years past it has been customary to burn the leaves over on the west side of the Park. There was so much complaint last season, however, from the residents along Eighth avenue, that the smoke and dirt which was caused by burning this enormous quantity of leaves in the very heart of the city that the authorities have ordered that the leaves in the Park be taken up to Riverside to be burned. The people up in the goat district need not now be apprehensive of any more prairie fires such as have alarmed them in previous years when the big bonfires were in full blast.

The Grain Market. The remarkably heavy movement of spring wheat in the Northwest during the past few days, and rapidly accumulating stocks in the elevators at St. Paul, Minneapolis and Duluth has made the speculative trades both at Chicago and in the local market very bearish in temper. Last Saturday the receipts at Minneapolis alone were 1,000,000 bushels, and at Chicago 1,000,000 bushels were shipped. At the same time, while the total stocks in elevators and Minneapolis and Duluth were 1,000,000 bushels, the corresponding date this year the amount in store was only 1,000,000 bushels. The speculative condition, however, at the present time, prevent this fact from being regarded as a strong bull point, and for this reason the market, both at New York and in the local market, is very bearish in temper. The opening price for the present season, already in active circulation and signed by over fifty Wall street firms, will back it up. Two hundred firms names are expected to grace the document, which will precipitate a battle between Exchange conservatism and liberalism and will work wonders.

The Ship News Boiled Down. ARRIVED TO-DAY. Elder, Bremen and Southampton. (Monaco, New Orleans. Peter de Cominek, New Orleans. City of Columbia, Ferdinandia. Araba, Liverpool. DUE TO-NIGHT OR TO-MORROW. Cienfuegos, Havana, Oct. 6. Jersey City, Bristol, Sept. 19. Small, St. Johns, Sept. 11. Elicao, Porto Rico, Oct. 4. Italy, Liverpool, Sept. 29. On the moon call the following prices are quoted for the wheat options: November, 81 1/2c, a 81 1/2c; December, 80 1/2c, a 80 1/2c; January, 80 1/2c, a 80 1/2c; February, 80 1/2c, a 80 1/2c; March, 80 1/2c, a 80 1/2c; April, 80 1/2c, a 80 1/2c; May, 80 1/2c, a 80 1/2c; June, 80 1/2c, a 80 1/2c; July, 80 1/2c, a 80 1/2c; August, 80 1/2c, a 80 1/2c; September, 80 1/2c, a 80 1/2c; October, 80 1/2c, a 80 1/2c; November, 80 1/2c, a 80 1/2c; December, 80 1/2c, a 80 1/2c; January, 80 1/2c, a 80 1/2c; February, 80 1/2c, a 80 1/2c; March, 80 1/2c, a 80 1/2c; April, 80 1/2c, a 80 1/2c; May, 80 1/2c, a 80 1/2c; June, 80 1/2c, a 80 1/2c; July, 80 1/2c, a 80 1/2c; August, 80 1/2c, a 80 1/2c; September, 80 1/2c, a 80 1/2c; October, 80 1/2c, a 80 1/2c; November, 80 1/2c, a 80 1/2c; December, 80 1/2c, a 80 1/2c; January, 80 1/2c, a 80 1/2c; February, 80 1/2c, a 80 1/2c; March, 80 1/2c, a 80 1/2c; April, 80 1/2c, a 80 1/2c; May, 80 1/2c, a 80 1/2c; June, 80 1/2c, a 80 1/2c; July, 80 1/2c, a 80 1/2c; August, 80 1/2c, a 80 1/2c; September, 80 1/2c, a 80 1/2c; October, 80 1/2c, a 80 1/2c; November, 80 1/2c, a 80 1/2c; December, 80 1/2c, a 80 1/2c; January, 80 1/2c, a 80 1/2c; February, 80 1/2c, a 80 1/2c; March, 80 1/2c, a 80 1/2c; April, 80 1/2c, a 80 1/2c; May, 80 1/2c, a 80 1/2c; June, 80 1/2c, a 80 1/2c; July, 80 1/2c, a 80 1/2c; August, 80 1/2c, a 80 1/2c; September, 80 1/2c, a 80 1/2c; October, 80 1/2c, a 80 1/2c; November, 80 1/2c, a 80 1/2c; December, 80 1/2c, a 80 1/2c; January, 80 1/2c, a 80 1/2c; February, 80 1/2c, a 80 1/2c; March, 80 1/2c, a 80 1/2c; April, 80 1/2c, a 80 1/2c; May, 80 1/2c, a 80 1/2c; June, 80 1/2c, a 80 1/2c; July, 80 1/2c, a 80 1/2c; August, 80 1/2c, a 80 1/2c; September, 80 1/2c, a 80 1/2c; October, 80 1/2c, a 80 1/2c; November, 80 1/2c, a 80 1/2c; December, 80 1/2c, a 80 1/2c; January, 80 1/2c, a 80 1/2c; February, 80 1/2c, a 80 1/2c; March, 80 1/2c, a 80 1/2c; April, 80 1/2c, a 80 1/2c; May, 80 1/2c, a 80 1/2c; June, 80 1/2c, a 80 1/2c; July, 80 1/2c, a 80 1/2c; August, 80 1/2c, a 80 1/2c; September, 80 1/2c, a 80 1/2c; October, 80 1/2c, a 80 1/2c; November, 80 1/2c, a 80 1/2c; December, 80 1/2c, a 80 1/2c; January, 80 1/2c, a 80 1/2c; February, 80 1/2c, a 80 1/2c; March, 80 1/2c, a 80 1/2c; April, 80 1/2c, a 80 1/2c; May, 80 1/2c, a 80 1/2c; June, 80 1/2c, a 80 1/2c; July, 80 1/2c, a 80 1/2c; August, 80 1/2c, a 80 1/2c; September, 80 1/2c, a 80 1/2c; October, 80 1/2c, a 80 1/2c; November, 80 1/2c, a 80 1/2c; December, 80 1/2c, a 80 1/2c; January, 80 1/2c, a 80 1/2c; February, 80 1/2c, a 80 1/2c; March, 80 1/2c, a 80 1/2c;
