Marriages, Religious and Funeral Notices, not exceeding five lines, 25 cents.

☞ The WEEKLY TRIBUNE, a very large paper, for the Country, is published every Saturday morning, at the low price of $2 per annum, in advance.

THE TRIBUNE.

FIRE DEPARTMENT.—Judging from practical results, it appears to be doubtful whether the present '*law*' authorising the '*election*' of Engineers is any improvement on the former method of '*appointment*' by the Common Council. The present method of 'Election' seems almost like compelling a Chief Engineer to give offence to his own disadvantage; for, if in consequence of riotous conduct among firemen, or disobedience of orders, the Chief Engineer neglects or refuses to report the same to the proper department, the 'Common Council,' he thereby becomes *justly censurable* for dereliction of duty. If on the other hand he *does* report the same, the persons so reported, and perhaps their friends are liable to take umbrage and without any other cause oppose his re-election. It presents a case even worse than that of appointing interested jurors to decide a case in Court; and under the present system might at times be the means of depriving the city of *practically experienced* Engineers, a qualification so peculiarly necessary, especially for the responsible station of Chief Engineer of our extensive Fire Department.

It seems highly creditable to the present Chief Engineer that during the late election contest nothing was adduced to impair his character, or capability in the performance of the duties of that office which he has so long conducted with credit to himself and apparent satisfaction to the public generally. A CITIZEN.

To the Editor of the Tribune:

As you have always been a firm advocate for the Bankrupt Law, and an undeviating friend of the unfortunate and oppressed, I cannot avoid bringing to my mind your *predictions* that before one year after the said law went into operation, many who were opposing it would become its firmest friends, and be compelled to avail themselves of its provisions. In one instance these predictions have certainly come to pass. A large firm in Pearl st. who were loud advocates for the *repeal of the law*, and who were among the foremost to sign the call for the great meeting held at the Exchange to urge its repeal, one of the firm actually presiding as an officer of the meeting, are now calling their creditors together, offering them, *confidential* and all, 50 cents on the dollar, payable in goods and *debts*, or 50 cents on a dollar at one and two years, *without any security*; and if their creditors do not accept this offer, they must be compelled to avail themselves of the benefit of the Bankrupt Law. Verily your predictions have come to pass.

The Administration and the Country.

No little anxiety exists at present with regard to the probable disposition by the President of the Revenue Bill, which will undoubtedly be passed by Congress. As the best *official* exponent of the matter, we are induced to publish the following article, which appears in the Madisonian of Thursday. It will interest our readers, moreover, as showing the dignified *temper* of the Administration and the particular point from which it contemplates all the doings of Congress. It should be remembered that the measures here discussed are imperatively demanded by the necessities of the nation, and cannot be safely neglected to accommodate any man's personal ambition.—We may be permitted to express our astonishment that Congress should have so little democracy in its composition as to think of passing any bill without first consulting the President or the Madisonian as to its propriety. In quoting the article we 'follow copy.'

THE DIABOLICAL PLOT—THE REVENUE—DISTRIBUTION.—We have on more than one occasion characterised the schemes of vengeance and destruction meditated by the Clay Whigs in Congress. Our information has been sneered at by the Clay-whig press,—but it was nevertheless true. A few weeks more will develope everything.

The demoniac plan to crush the President was concocted and determined on by the Dictator himself. The magnitude and complication of the machinery required great circumspection and foresight in its formation. Its author was not deficient in mind. The diabolical instrument is now completed and awaits the day set apart (Mr. Fillmore managed his part very adroitly—giving his action the appearance of an "*after thought*"—artfully avoiding the suspicion of *premeditation*) for *execution*, to receive the victim.

Seven long months have rolled by, and Congress has done nothing—nothing but to erect a machine to torture the President. Exchequer, Tariff, Distribution, all have been neglected, notwithstanding the cries of the People. The Dictator decreed that nothing should be done for the country, until the President was killed.

And now the day approaches. Fourteen days more, and there will be no means of collecting the revenue, and the sums arising from the public lands *must* be distributed among the States. After yielding implicit obedience to the mandate of the Dictator, having remained idle and inactive *seven months*, the ultra Whig Congress frames a bill of twelve lines, in violation of the Compromise act, and like a band of cold-blooded Inquisitors, resolve to bind the President upon their infernal wheel, apply the engines of torture, and offer him no other alternative but *instant* recantation or political death. They say that his belief in the inviolability of the Compromise act must be *unconditionally* recanted, and his sense of the propriety of suspending the Distribution until the National debt is paid, repudiated—or he shall now be broken on the wheel so carefully prepared for the occasion! He must put on sack-cloth and ashes at their bidding, and bow himself in the dust—acknowledge himself at the mercy of his tormentors—sacrifice his consistency, his conscience, his honor, or undergo instantaneous immolation! They have brought (during the *seven months* wasted) the finances of the country to the verge of ruin; they have (they think) placed the President between themselves and the precipice—spears are gleaming in their hands—he must (they think!) crave the mercy of the Dictator, or be hurled down the Tarpeian rock!

If the revenue of the country is annihilated within the next thirty days, (notwithstanding the *seven months wasted,*) the President must (they think!)die the death—the *Whig* death!

And this is the death—the Whig death—the offer, or deliberate (they think) dishonor! Will the Whigs of the country approve their conduct! We trust not! But if they *do*, the appeal is to the PEOPLE. What will the People say to such an indignity offered to the Chief Magistrate of the Nation! What will they say if the alternative of dishonor or death—*Whig* death—should be presented to the PRESIDENT OF THE UNITED STATES! What would the DEMOCRATS say! Ah! here we have the Dictator and his base minions! What would the DEMOCRATS say! They would say that the death the ultra Whigs could inflict on the President, would only elevate him into a *new life*, another existence, far ever beyond the reach of their assaults!

If the Dictator doubts the President's *nerve*, let him proceed with his machination! Even Mr. Clay himself, or the basest of his minions, never yet dared to express a doubt of his honor. If they think now to assail it successfully, let them venture on the attempt. John Tyler would unhesitatingly sacrifice both political and *human* life, if it were necessary, to maintain his purity. Even now, when the result of all their schemes, plans and plots, is apparent, and the GREAT CRISIS is at hand, *he defies their malice*. Armed with the intellect and the purity of motive which God gave him, he stands unmoved, unawed, over the political volcano they have prepared for his destruction. And there he will stand UNHARMED! He stands before his country, not guilty and crest-fallen, but with a brow erect, and a consciousness of rectitude.

We ask no favors of the Clay-Whig majority in Congress. If the approaching crisis is to prove disastrous to the country, it is all their own doing. They have filled the chalice with bitterness by their *seven months'* delay. If it must be quaffed, they shall drink it! Such will be the verdict of the People.

The People have beheld the unworthy conduct of this "President-making" Congress. They have marked the shameful attempts to "head" the President. They have seen Congress idle away seven months, *and then peril the revenue of the country* FOR WANT OF TIME to pass a law providing for the collection of the duties! The Clay legislators have consumed *seven months* without *attempting* to do any thing, and now they have only *fourteen days* in which to pass the most important measure of the session! And this they frame in so "questionable shape," that they hope it will "head the President" at last. Of course the President will do his duty. Whether it will be his duty to sign the bill, we know not yet, and say not—but we *do* know that the Clay Whigs would do any thing to ruin him with the Whig party.

It is a fortunate thing that their *party* is not the *country*. This, too, is their last hope of forcing a resignation. What say the People! Shall MANDRUM rule?

STEAMBOAT COLUMBUS AND GREEN BAY.—The traveling public will be pleased to learn by an advertisement in this paper that the Columbus will continue to ply as a regular packet between Buffalo and Green Bay. Few routes present more agreeable inducements for a voyage than this.—Sheltered by the islands from the turbulence of Lake Michigan, it offers a short and comparatively safe voyage to the remotest point of the West as yet visited by Lake boats, and also affords a favorable opportunity to emigrants of reaching within four days, one of the most healthy and delightful regions of the West. The water communication between this ancient port and the Mississippi is easy, and lines of stages connect with the more Southern towns of Lake Michigan as well as across the country to Fond-du-lac, Fort Winnebago, Madison, Mineral Point and Prairie Du Chien on the Upper Mississippi. The beautiful and fertile country around Lake Winnebago and the mining regions West of it are beginning to attract the attention of Eastern people, and they are rapidly filling with an industrious population. The exports of Lead and Copper which now find their way so great a distance by land to Lake Michigan, will soon give much activity to the easy water communication of this route, and render it a great thoroughfare for the business regions of the Upper Mississippi, as presenting the quickest and cheapest route for the importations of a territory larger in extent than the whole Lake country yet traversed by steamboats West of Buffalo.

[Buffalo Com. Adv.

☞ Princeton College is now in a very prosperous condition, the number of pupils having materially increased since the last session, and being classed as follows: Seniors, 44; Juniors, 83; Sophomores, 59; Freshmen, 21. The next annual commencement will be on the last Wednesday of September, when Samuel J. Wilkin, of New-York, will deliver the oration before the Alumni Association. On the preceding afternoon, James Iredell, of North Carolina, will deliver the oration before the societies.

ASSOCIATION;

Or, Principles of a True Organization of Society.

☞ *The editorship of this column is distinct from that of The Tribune. Address letters, post-paid, to* A. BRISBANE, *Residence, 76 Leonard-street.*

Right of Man to Labor.

We have received a letter from a very intelligent working-man upon this subject. We give a short extract as it bears upon an important question.

"I fully concur with you that "the Right of Labor is the primary and most important Right of man," though I apprehend you will find it difficult, as you seem to be aware, to convince most people that they do not already possess this Right. Yet it is very plain that no conception of Right can exist separate and apart from action, for the term implies action of some sort, and in this case the action is defined to be that of work. Now if any individual is without work, it certainly would be absurd to tell him that he had a Right to do that which was not to be done. That there are many in this Country, and in this City, debarred from this precious privilege, I have no reason to doubt. I belong to a class of tradesmen, (and I flatter myself you will not suspect me of incompetency or disqualification) whose office it is to supply articles (clothing) of absolute necessity; and although I daily see hundreds out at elbow, and am anxious and fully disposed, I have been a whole month deprived of the *Right* to supply any of their wants, while they no doubt, from a similar cause, are unable to give me employment. It is nonsense to say the *demand* for these articles does not exist; every patch and hole proclaims the contrary. The truth is, the *power* to supply the demand has been taken away with the Right to work." D.

To the Friends of Association throughout the United States.

The great Cause of Association appeals directly to every noble Mind, and to every generous Heart, and must excite in them an earnest desire to see it prosper and advance to a speedy consummation. It appeals to all who desire to see the reign of Truth, Justice and Happiness on Earth, and the realization in practice of the great principles of universal Liberty and Brotherhood, which are now admitted as true, and are admired in theory.

We deem it of the highest importance to adopt at present additional means for the propagation of our Principles.

There are no doubt thousands of ardent, generous Souls in this Country, who require only to be informed of the system of Association and to understand its principles, to embrace it eagerly as the practical means of realizing hopes and feelings which they have secretly cherished in their own hearts.

We must reach them; but under the cold and callous indifference of the Press to this great Cause, it would seem almost impossible to do so. The best, and perhaps the only, means of attaining this end, is the publication of a pamphlet, containing a concise, practical view of the System or Plan of Association, which can be afforded very cheap, and scattered by thousands throughout the Country.

We must, if possible, rouse the whole Country to the importance of Association, and as through the means of our column in The Tribune we reach comparatively but a small portion of it, a cheap Pamphlet will perhaps be the best auxiliary aid we can at present devise and adopt. As well as reaching great numbers who otherwise might remain ignorant of our Doctrines, the Pamphlet will be valuable as a manual or text-book for the Readers of The Tribune. In it the leading principles and features will be presented, which will be very useful as a key to the explanations we shall make, as we progress in unfolding the whole System.

There are a great many persons who believe in the Principles of Association, and look upon it as a great and noble Cause, which in time must triumph, but they hardly hope to see it realized themselves. We would inspire them with more hope, and we feel convinced that if they would unite with us and give the Cause their active co-operation, that our combined Action would lead to a practical realization at an early day.

We can print a handsome Pamphlet of eighty pages, which we can afford at the low rate of three or four dollars per hundred.

We call upon our friends to subscribe and remit to us such sums as their means will allow in aid of this important Publication, and we will forward to them a corresponding number of Pamphlets, which they can give away, or dispose of as they judge proper.

We hope that all those who are interested in the Cause in every section of the Country will take especial pains to obtain subscribers, and forward us, as early as possible, the amount collected, with a list of the names, the receipt of which will be acknowledged in The Tribune. The direction and mode of sending the Pamphlets is also requested, whether by Mail or otherwise.

We hope that the Ladies, with their accustomed spirit of devotion to all noble undertakings, will lend their powerful aid and influence.

We would state that a heavy expense is attendant upon the propagation of the Doctrines of Association, which has hitherto been borne exclusively by a few devoted Friends in this City. The principal permanent expense which they have to meet is that of the columns in The Daily and Weekly Tribune. We ask the Friends of the Cause to unite and contribute to the support of the latter expense. Any contribution intended to be appropriated to this object should be distinguished from such subscriptions as are intended to be applied to the publication of the Pamphlet.

It may, perhaps, be well to have it distinctly understood that no Individual engaged in the Cause of Association derives any personal benefit, pecuniary or otherwise, from it, and that all that is done, is entirely voluntary, and without desire or expectation of reward, other than the triumph of the Cause.

It is obvious that a concentration of efforts is the only means of success in a great undertaking like ours. It is, therefore, hoped that the present appeal will be favorably received, and that the Cause, which has hitherto been supported by a few, will now receive the aid and support of all its Friends.

THE FOURIER ASSOCIATION OF THE CITY OF NEW-YORK takes this occasion to return its thanks to those who, up to the present time, have labored in behalf of the Doctrine of Association, and particularly to A. BRISBANE, Esq., who, since his return from Europe to this County in 1834, has, with a constancy worthy of the Cause, been indefatigable in advocating and spreading it by his own publications and at his own expense.

We now call upon all Philanthropists to aid those generous efforts, and success must follow.

The above Appeal has been adopted by a Resolution of the FOURIER ASSOCIATION OF THE CITY OF NEW-YORK. Subscriptions and contributions will be forwarded to FREDERICK GRAIN, Esq., No. 39 Lispenard-street, New-York, who is Treasurer of the Association. City subscriptions will be received as above—at the Lecture Hall of the FOURIER ASSOCIATION on Lecture evenings, and at the Book-Store of R. Lockwood, 411 Broadway.

E. GILES, Sec. T. W. WHITLEY, Pres.

WANTED—A partner with a capital of $5000 to engage in a profitable and permanent branch of Manufacturing business in the city. The article manufactured has been long and favorably known in the market and commands a ready and extensive sale. MUTUAL INSURANCE.—On Dwelling Houses and Furniture only, profits returned to the Assured. THE HOUSEHOLDERS' MUTUAL INSURANCE COMPANY, Office 45 Wall st., for separating the insurance of Dwelling Houses and Furniture from that of Stores and Merchandize.

It is well known that almost all the losses incurred in the business of insurance, are the result of the burning of valuable stores and costly goods.

This increases the expense of insurance to the household, and may possibly deprive him of the very security for which he pays his premiums.

The cash payments or premiums form a fund, which, after paying expenses and losses, is represented by scrip, and is issued to the insured in proportion to the amount of their insurance.

This Company is prepared to insure against loss or damage by fire, Dwelling Houses, occupied in whole or in part as such, Household Furniture and all Household Property ordinarily kept in dwelling houses. Every person insuring with this Company is entitled to one vote for each hundred dollars insured.

DIRECTORS.

Gerhard C. Verplanck, R. A. Robertson, Stephen Cambreleng, Isaac Henry Ludlow, Samuel Stanton, Frederick Depeyster, William H. Harison, Fred'k Schmidtmann, Daniel Seymour.

A. R. SODGERS, President.
D. C. TAYLOR, Secretary.

MERCHANTS' FIRE Insurance Company—Capital Half a Million of Dollars—Office No. 54 Wall st.—This Company continues to insure against loss or damage by fire, dwelling houses, warehouses, and other buildings, ships in port, merchandize and household furniture, and every description of personal property, on terms as favorable as any similar institution in this city.

DIRECTORS.

HOVEY'S TRUNK REPOSITORY, No. 128 Pearl-st. opposite Cedar.—R. HOVEY manufactures and keeps constantly on hand every description of Traveling and Packing Trunks, Carpet Bags, Valises, &c. at wholesale and retail, cheap for cash or approved paper. my8 3m

DENTISTRY.—Wm. Thorn, Dentist, would call the attention of those who wear Artificial Teeth, and those who may require them, to his method of supplying the masticatory family, viz. the teeth. Knowing that there is a disagreeable taste in the mouths of those who indulge in acids, resulting from the action of the same on the gold plate, in all cases that admit of it, he inserts teeth from one to a complete set, without using one particle of metal of any description. my22 1m* T. T. 84 CHAMBERS ST.

DINNEFORD'S PATENT IMPROVED ELECTRICAL FLESH GLOVES and STRAPS produce a healthy state of the system by friction without the risk of tearing the skin, as all the ordinary Horse-Hair Gloves are liable to do.

The great value of the Horse-Hair Renovator as a therapeutic agent, when applied to the human body is now too well known to every one who has paid the least attention to the importance of a healthy action of the skin to require further comment.
