tivity and advance in the Louisiana and South Carolina consols. Railroad bonds have been strong, and in most cases the quotations have advanced, yet in too many instances it was clearly due to a local speculative rather than to a legitimate demand.

The stock speculation for the full account has been carried on with varying success. With the lessening chances of a general European war, and the more enlightened opinion that in case of one the United States would suffer more than it would gain thereby, the talk has changed from "war" to that of peaceful agriculture, and it now is the next crop which is to bless stockholders. Of the general speculative list the majority show a decline when compared with last Saturday, the particular exceptions being the "Grangers," which were vigorously pushed at the end, establishing an advance for the week ranging from ⅝ for St. Paul common, to 2½ per cent for North-Western preferred. On the other hand the principal declines were Western Union, 2¼; C., C., C. and I., 3; American Express, 4; and Chicago and Alton, 5 per cent; Lake Shore, Michigan Central, Central and Hudson, Erie, Illinois Central, and the coal shares show declines ranging from ¾ to 1¾ per cent. The total business for the six days—1,000,875 shares—reflects a less general interest in the market than for the preceding week.

The principal features of the stock market to-day were Rock Island, the St. Pauls, North-Westerns, and Michigan Central, in each of which there was a well concerted and executed upward movement, which although not entirely maintained at the end was over-strong to be pleasing to a "bear." There was no new gossip afloat concerning any of these fancies to account for the movements, and they seemed to be conducted with considerable mystery, particularly that of Michigan Central, the transfer books of which being already closed it could not be imagined for what purpose the stock seemingly was being so persistently bought. The other railroads generally improved in sympathy with these movements and on the closing up of "short accounts" thereby induced. The coal stocks continued weak, closing but a fraction better than lowest prices. Opinions still differ as to the reply of Mr. Gowen to the proposal to suspend the production of coal for one month; nor withstanding it was rumored he had refused to enter into the plan. But from a trustworthy source we are able to state his reply to be an unconditional refusal. It cannot now be doubted to what result the coal trade this will lead. In our estimate of yesterday (Friday) of the quantity of coal in sight, we were in error in crediting the Reading Company with 360,000 tons at "Port Richmond and South Amboy"—the 100,000 tons at the latter (Pennsylvania Railroad's) depot being that of private others. With this correction and after a reexamination we still believe the figures we give to each company to be substantially correct. Western Union to-day refused to join in the general movement, only advancing to 63⅞, to sell off at 62⅞ at the close, and American Express made a further decline to 48@48½.

The sales at the last call—3:15 p. m.—of the Open Board were: 200 Central and Hudson, 93⅞; 600 Lake Shore, 53⅛; 100 Michigan Central, 45⅝; 300 Rock Island, 94⅜; 100 Pacific Mail, 21⅝; 100 Delaware, Lackawanna and Western, 42⅜, and 600 Western Union, 63⅞.
