

AMONG THE COLLEGES.

HARVARD.

A WEEK OF GAYETY.

Cambridge, Dec. 18 (Special).—The week which has just closed and the few days remaining before the beginning of the Christmas recess have been filled with the customary round of gaiety.

On Friday night the annual fall concert was given by the Musical Club. This practically begins the series of concerts which will be given during the vacation at points between here and Chicago.

The college must first in order to "keep up with the procession" (as it were) and win and hold the confidence of the people. The successful college in its training must give prominence to the cultivation of the faculties of observation, the development of the power of will and the concentration of energy, the acquisition of bodily soundness and vigor, and the attainment of high moral standards.

CORNELL UNIVERSITY.

CHANGES IN THE REQUIREMENTS FOR ADMISSION.

Ithaca, N. Y., Dec. 18 (Special).—The Registrar for 1892-93 is now in type and will soon be issued. Among the new features which it will contain are an account of the summer school, which has been formally placed under University auspices, and a statement of the addition in requirements for admission.

The latest addition to the entrance requirements is, in accordance with the rule of the faculty passed about two weeks ago as follows: In and after June, 1894, plane and spherical trigonometry and higher algebra shall be required for admission to the college.

In addition, admission to the course in arts required Greek and Latin and Greek and Roman history. The course in philosophy, either French or German, or higher mathematics, with Latin and Greek and Roman history, and the course in letters and higher mathematics, with Latin and Greek and Roman history, and the course in letters and higher mathematics, with Latin and Greek and Roman history.

In and after 1894, in addition to the courses in science and letters and agriculture will be required, in addition to the above, an examination either in science or history and political science, the scientific requirements covering elementary physics, chemistry and botany; history and political science, covering general history, United States history and civil government. It further announced that the six primary subjects which had been previously required for admission to the college would, after 1894, be required to pass, at their option, one of the five groups that to be required for admission to science and letters.

The Registrar for 1893-94 announced a further increase in requirements, in that the optional students would be required, after 1893, to take the final examinations for the admission to the courses in science and letters. In "The Register" of 1890 the six fundamental studies in the course in science and letters and in the course in letters and higher mathematics were required to take were dropped, but the candidates were required to take two of the three subjects, French, German and higher mathematics. Instead of one, as before, while to the requirements for admission to the technical courses the important addition was made of either French or German. In and after 1894, for which candidates in architecture were at liberty to substitute Latin. These requirements were unchanged in the two succeeding "Registers." Though there was no nominal change in the requirements this year, there was an actual change in that the practice of admitting students to technical courses on the conditions in the advanced course was discontinued and the full requirement was exacted. This resulted in the exclusion of over 100 applicants.

The great change made evident by a comparison of the university before the movement toward advanced requirements began and what it will be in 1894 under the present legislation. In 1884 practically all the students in the university except a very small number in the course in arts had been admitted on the conditions in the course in arts alone. Nothing more was demanded of the technical students, and while one of the three groups, French, German and mathematics, was nominally demanded of students in science and letters, the requirement was never enforced. In 1891, one subject, American history, will be added to the traditional six primary examinations. All students in science and letters will be required to take two of the three groups, French, German and mathematics, and all technical students, although this action has not yet been applied to the civil engineering department, it undoubtedly will be applied to that department also. This restriction that for them one of the groups must be the mathematical group, including algebra, geometry, plane and spherical trigonometry at their option.

The policy that the university has entered upon in regard to its requirements will undoubtedly be maintained. The significance of the movement is to be found not only in the general course, but even more in the fact that the requirements for admission to the technical courses are being steadily increased. It is a sign of the times that the other departments in the university.

Hamilton, N. Y., Dec. 18 (Special).—At the meeting of the Board of Trustees held recently in New York, important action was taken toward increasing the usefulness of the university. Plans are now being drawn for a gymnasium. It will be specially constructed for the purpose of the Cornell Annex. A large fund is being raised for the erection of several new buildings and the further improvement of the campus.

Principal John Greene, of the Latin language and literature department, has been appointed to the chair of the department. His place at the academy was filled by the appointment of Professor C. H. Thurston, professor of modern languages in Cornell University. A new chair of pedagogy was established in the college. It will be filled by Professor Dunbar. Professor W. H. Crawford, who has had both English literature and rhetoric and oratory, was selected of the latter department, for which a new professorial position was made. Professor Ripley, of the department of the history of the university, was appointed to this place.

John C. Huber, of Delta Upsilon, entertained the Phi Kappa chapter of Theta Upsilon at his chapter house. The meeting was held in his chapter house. A lecture and reading were given by Professor J. P. Silvester, of Rochester University.

THE CONTESTANTS IN THE COMING CHESS MATCH.

New Haven, Conn., Dec. 18 (Special).—The following men have been selected to represent the different colleges in the intercollegiate chess tournament which will be held in New York on December 27. Yale, A. Bunnstead, '95, and A. E. Skinner, '95; Harvard, C. B. Wilson, '94, and Allen, '95; Cornell, J. M. McFarley, '94, and S. M. Jones, '95; Johns Hopkins, J. M. McFarley, '94, and S. M. Jones, '95; Yale, A. Bunnstead, '95, and A. E. Skinner, '95; Harvard, C. B. Wilson, '94, and Allen, '95; Cornell, J. M. McFarley, '94, and S. M. Jones, '95; Johns Hopkins, J. M. McFarley, '94, and S. M. Jones, '95.

The committee of judges for the competitive debate, consisting of Professors Hadley, Allen and Smith, has announced the winners of the first two debates. They are Frank E. Donnelly, '95, and E. R. Lawson, '93. These two, with a representative from Yale, will represent Yale in debate with Harvard.

Of the 1,500 students, 125 from Pennsylvania, 110 from Massachusetts, 90 from Illinois, 60 from New Jersey, 40 from Ohio, and 42 from Missouri. Forty-two states of the Union are now represented at Yale. The District of Columbia, and seventeen foreign countries. The academic department has 970 foreign countries. The academic department has 970 foreign countries. The academic department has 970 foreign countries.

Williamstown, Dec. 18 (Special).—The committee of the New England Intercollegiate Athletic Association, which was appointed to revise the constitution met in Springfield on Saturday, December 10. F. W. Beckman, of Amherst; L. B. Bacon, of Williams, and C. A. Howe, of Trinity, were present, and the work of revision was partially completed. It is probable that the constitution will be ready for adoption in a few days.

WELLS COLLEGE.

Aurora, N. Y., Dec. 18 (Special).—December 12, Founder's Day, was suitably observed. Flowers adorned the founders' picture and Mrs. Hitt, '77, professor of physical culture, gave in the morning exercises an interesting sketch of Mr. Wells' life and character, with reminiscences of his personal relations to the college when she was a student.

Miss Gertrude Morgan, the accomplished young violinist, assisted by Mr. Stevens, Miss Ellis, and Miss Anna M. Morgan, gave a recital on Friday evening, December 16. This was followed on Saturday evening by a student recital, in which the class sang as one selection, Bonaldi's cantata, "The Lady of Shalott."

On Tuesday evening, December 13, Dr. Sprague, of Aurora, delivered before the Y. M. C. A. a very interesting lecture on "The History of Wells College."

On Tuesday evening, December 13, Dr. Sprague, of Aurora, delivered before the Y. M. C. A. a very interesting lecture on "The History of Wells College."
