STOCK MARKET OPERATIONS.

In the early dealings in yesterday's stock market transactions were moderately active, while the movement of values tended in the direction of higher quotations. Commission house business generally was light, while the operations of the professional element amounted to substantial figures, especially in Amalgamated Copper, St. Paul, Erie, Illinois Central, Manhattan, Metropolitan, Reading, Southern Pacific, Union Pacific and the United States Steel shares. In these issues advances ran from fractions to 1 per cent and above, the largest gains being recorded by Illinois Central, which enjoyed a maximum advance of over 3 points; St. Paul, Baltimore and Ohio, Union Pacific and the Steel securities. Following the improvement in the first two hours of trading, prices reacted under the influence of realizing sales and bear pressure, and at the close the greater number of stocks were well under the best figures of the day, with net losses in a few of the active securities, notably American Sugar Refining, Consolidated Gas and Metropolitan. Selling in the last named stock was based on the expected falling off in the company's receipts, owing to the growing popularity of the underground system and to the proposed new operations of the Interborough company in The Bronx, in a district where the Metropolitan company has been supposed to have had control of the local passenger transportation business. While the Metropolitan securities were weak, Manhattan stock was decidedly strong; also Interborough stock, the last named issue advancing over 10 points on the curb.

Call money rates ruled at an easy level, but sterling exchange was strong, and further engagements of gold for export were made, total withdrawals of gold coin bars amounting to more than $2,000,000. According to the opinion of the best informed men in the Street, the outward movement of gold will continue in the rest of the current months, as it is believed that foreign requirements and the low price of money at this centre will make shipments of the precious metal profitable. The fact that gold is going abroad does not cause uneasiness in Wall Street circles, as it is known that the movement is wholly due to legitimate international monetary conditions. This is the cheapest money market in the world at present, and just as long as rates for call funds remain at their present low level gold will move to centres where it can be more profitably employed.

A violent rise in the wheat market had no influence on stocks, although the advancing tendency of the cereal was considered a factor in the outward movement of gold. Wheat exports from the United States have been extremely small in the last twelve months, and as a consequence the balance of trade, especially recently, has been running against this country, so far as exports of agricultural products are concerned. Fortunately, exports of manufactures have been heavy, while all indications point toward another year of large shipments by the American manufacturer. At the moment great difference of opinion is noted in Wall Street circles regarding the immediate future of the stock market, but in the higher financial circles no attempt is made to conceal the belief that, barring an adverse change in the country's industrial and financial condition, higher quotations will be recorded in the stock market. The fact that many plans are being made by various railroad companies and Wall Street financiers for the flotation of bonds in the near future encourages the idea that every effort will be made by the controlling Wall Street interests to maintain a high level of values in the securities market. It is an easy matter to sell bonds when prices on the Stock Exchange are advancing.

BOND MARKET TRADING.

GOVERNMENT BONDS.—Market steady. Final quotations follow:
