STOCK MARKET OPERATIONS.

In yesterday's stock market transactions were Hill issues, St. Paul, United States Steel and Amalgamated Copper, sharp advances were recorded, while throughout the list last quotations transactions being due to heavier purchases by who for many months have been committed to the bull side. Perhaps the strongest and best buying of the day took place in the last half hour, when prices advanced 1 per cent and more in the leading active securities, and the development of this strength attracted increased buying from the so-called public. Easier money market conditions, the expectation of a favorable bank statement to-day and indications of an active resumption of heavy operations by substantial speculative interests naturally served to \$4,500,000 inspire greater confidence in commission house circles over the future of the commission circles over the future of the circles over the cir age the feeling that bull operations, which for several weeks have been held in check, had been resumed. Strength in Union Pacific was due to heavy buying by the interests who recently were active in the issue, while the same thing may be said of the movement in Reading and United States Steel common, activity in the last named being helped by the expectation of an announcement regarding the ore deal terms, which were made public after the close of business. Last

> quotations generally were at the best. The easier tendency in the money market is responsible for higher quotations in sterling exchange, which suggests the improbability of further large imports of gold at present, especially as the price of money in Europe is higher than it was a few weeks ago. Europe is favorably inclined toward American securities, however, and the chances are that later on in the season there will be an active buying demand for European account of our stocks and bonds, and it is believed in well informed quarters that this buying movement will serve in great meas ure to offset the accumulated obligations which this country has incurred abroad through loans. An enormous amount of finance bills are now maturing and are being renewed, the renewals being due to the confidence of foreign bankers in the financial and business situation in this country, and this fact ought to serve to oncourage increased confidence at home in the future of the money and securities markets. Information received from sources which are particularly well informed regarding the attitude of foreigners on our market leads to the belief that London, Paris and Berlin bankers are preaching to their oustomers the wisdom of placing money in this country, their arguments being based on the stability of business conditions, on the favorable political outlook and on the vast increase which is constantly taking place in the wealth of this nation. If an active foreign inquiry should develop for our bonds, the movement undoubtedly would be effective in inducing large purchases by our own capitalists, and an increase in dealings in the bond department naturally would be followed by ex-

pansion in trading in shares. The fact that money conditions have been so carefully handled, insuring the improbability of disturbance, despite low bank reserves, at a time when the demand for funds is most urgent, has helped the speculative outlook and has developed a feeling of great enthusiasm among holders of securities who are maintaining a position Consum Gas 5s.— 105 | People's Gas 5s.— 1024 |

The campaign of Mr. Hearst is not a factor in the market at present, and the chances are so bright for the success of the Republican ticket that Wall Street is not disposed to consider politics much of an influence, though, of course, conditions before election may change sufficiently to bring about some uneasiness in the speculative community. Doubtless at times the bear element will endeavor to reduce prices, on the argument that the re-election of a Republican Congress is not at all certain, but it hardly seems likely that actual holders of American investment issues will find in the political situa-

IMPORTS OF DRYGOODS.

Imports and marketings of drygoods this week, with comparisons, were as follows:

CURB MARKET TRADING.

The market for outside securities was active and strong, notably so in the mining issues. Interest shifted from one to another issue as the day advanced, and, while heavy profit taking occurred at times after high levels were reached, the reactions were comparatively small, and in most instances were comparatively small, and in most instances rallies quickly followed. A number of industrials moved upward rapidly. This was especially so in Manhattan Transit, which rose nearly a point on enormous dealings, while bids of ½ to call the stock for a week were made at 3½ points above the selling price. Nipissing opened strong, but reacted like points. Cumberland-Ely rose over 1 point and Nevada Consolidated 1½. Butte Coalition was somewhat irregular. Davis-Daly broke more than 1 point. Furnace Creek was firm. Giroux lost 1½. Gold Hill opened strong, but later receded. Union was weak. McKinley Darragh was active within narrow limits. Old Hundred improved ½. tion any reason for the sale of their stocks and

In London the general market, with the exception of Russian bonds, was firm. There were no changes of importance in the foreign discount market, and no expectation of materially easier quotations in the near future. About \$2,000,000 gold will be available in the open market in London Monday, and it BANKS GAIN CASH .- The reported movements of currency this week indicate a gain in cash held by the banks of more than \$3,000,000, due to special government deposits against engagements of gold abroad. On the interior movement the loss was \$3,481,700. The total gain by new gold was \$8,578,200 and by United States deposits \$4,000,000. On Sub-Treasury operations proper there was a gain of \$19,700. The net loss to the interior was smaller than in the corresponding week of 1905 and 1904. Shipments to the South showed an increase over the preceding week. NORFOLK & WESTERN.-The fact that the

Norfolk & Western reports a decrease in August surplus over charges is due principally to the increase of \$31,000 in charges and taxes for the month. This increase was a little more than twice the gain in net earnings for the month. The company's monthly statement does not separate charges from taxes, but bond issues account for most of the increase mentioned. In the last year the company has issued \$3,000,000 additional of its divisional first lien bonds and \$4,000,600 of equipment trust notes. Most of these obligations have been sold within the last six months. IRON SITUATION .- Further sales of No. 2

foundry iron for immediate delivery have been made on a basis of \$18, Birmingham. Future delivery iron commands from \$15 50 to \$16 a ton. Bessemer iron is scarce, and some sales in the Pittsburg district are reported as high as \$22 and \$23 a ton. Practically the entire possible production of the valley furnaces for the first half of next year has been engaged.

APPLICATION TO LIST.—Application has been made to the New York Stock Exchange to list the following securities: An additional \$25,000,000 of common stock of the Chicago, Milwaukee & St. Paul Railway Company; an additional \$3,348,000 of the 4 per cent refunding mortgage bonds, due in 1951, of the St. Louis & San Francisco Railroad Company; an additional \$1,333,000 of the 4 per cent refunding mortgage bonds, due in 1938, of the Kansas City, Fort Scott & Memphis Railway Company. VULCAN DETINNING DIVIDEND.—The Vul-

can Detinning Company has declared a quarterly dividend of 1% per cent on the preferred stock, payable October 20, 1906. The company has built and has just completed a large addition to its Sewaren plant, thus increasing its capacity by one-third. The cost of this addition, together with its complete equipment, has been already paid for out of the earnings of the company. Further improve-ments have been planned and are now under way. On account of this extraordinary expenditure of earnings the directors have deemed it wise and conservative to pay no part of the deferred dividends at this time, but with the increased earnings which will result from this increased capacity it is hoped and expected that payments of the back dividends due to the holders of the preferred stock will be resumed at an early date.

REDEMPTION OF 'FRISCO 6 PER CENT

BONDS.—Notice is given that the second mortgage 6 per cent bonds of the St. Louis & San Francisco Railway Company, series A, B and C, now outstanding to the amount of \$2,050,300, and maturing on November 1 next, will be paid at the office of Redmond & Co., No. 33 Pine street. The option is given by Redmond & Co. of exchanging these bonds for refunding 4 per cent bonds of the St. Louis & San Francisco Railroad Company at 83% and in-terest, the maturing bonds to be taken at par and accrued interest to maturity, less discount at the rate of 4 per cent a year. CONDITION OF TRADE.

No unfavorable developments have appeared, encept the damage by storm at the South, which was almost entirely local in effect. The sound condition of the country, as a whole, was indicated by in light mercantile mortality during the third quarter of 1906, when failures were only 2,300 in number with total liabilities of \$21,996,163. This is the best exhibit of recent years, with the single exceptioned 1899, and, making allowance for the greatly have creased number of firms in business and amount of capital involved, even the good record of seven years ago is surpassed. Autumn trade is now if full swing, especial activity being reported in dragoods, millinery and footwear. Manufacturing plants are engaged far in advance in all the leading industries, the metal departments making the most striking exhibits, and the activity of transporters shown by railway earnings in September, \$2 percent larger than last year's figures. Foreign commerce at this port for the last week recorded rise in prices. More gold has been secured abroad and the amount of money in circulation on October 1 rose far above all records, with an average \$33.08 for each of an estimated population of \$000,000, yet rates continue firm because of the great of mand for funds in handling the nation's unexampled yolume of business. Bank exchanges at New York for the week were 16.9 per cent larger than in the corresponding week of 1905, while at other leading cities the gain averaged 6.7 per cent.

"Bradstreet's" says:

Trade is still of record volume for the sea vastly underdone in some sections, of traffic on the country's railway taxing all available facilities and arp congestion when winter-like we hank clearings are heavy due in under present conditions to name quotations at the time of shipment. This action would seem to indicate that consumers are looking for still higher prices for the metal. Producers are talking still higher prices. The retail copper dealers are doing some business at highest levels.

NEW CURB PROPERTY.—The property of the Old Hundred Mining Company, the stock of which the country's realways is very large, taxing all available facilities and pressant a sharp congestion when winter-like weather arrives. Bank clearings are heavy, due largely to increased totals at New York, and for nine months all records have been broken. Fallures for nine months are down to the minimum in number, while fallure damage, though swelled by a few and well below some other recent years.
