The Ministerialists could not see any possibility of American goods coming into Canada under the lower tariff. The United States tariff would have to come down a great deal, they said, to correspond with Canada's general, or maximum, tariff, let alone ever reaching the low level of the intermediate tariff. Nevertheless, it might be possible under the new scheme to arrange for certain lines of American exports to come into Canada under the lower rate of duties in return for equal privileges granted to Canadian exporters.

The dumping clause, which was introduced as a feature of the old Canadian tariff, two years ago and which is designed to prevent the sale of American goods in Canada at slaughter prices, is continued in force with some changes. Hitherto it has applied only to dutiable goods, but this restriction

applied only to dutiable goods, but this restriction has been stricken out, and in the future it will apply to all importations, whether dutiable or free. It is also changed so that hereafter it will provide that the extra duties which will apply to goods being indiscriminately dumped in Canada will not in any case be more than 15 per cent.

The tariff also deals with denatured alcohol. This article has been free from excise duty for some the conditions in Canada under the old tariff and in the United States after the new lay comes into the United States after the new lay comes into effect on January 1 is that in the United States it is proposed to allow the manufacture of denatured alcohol to be carried on by certain distileries, while in Canada this less been a government monopoly. The rate of duty was formerly \$240 a gallon, but some time ago it was reduced to 80 cents, with the idea of reducing the cost of production for manufacturing purposes. Under the new tariff the duty is cut down to 20 cents a gallon, with the proviso that it may be wiped out at any time in the future. The Minister of Inland Revenue will for the present carry on experiments with the hope of greatly reducing the price of denatured alcohol, and if he deas carry on experiments with the lond. that purpose they will be allowed to import foreign

steel works at Sydney and Sault Ste. Marie have flourished. Should the United States Steel Trust decide to start a plant in Canada to make steel for the American markets it would not benefit by the bounties, as the tariff provides that they will apply only to steel made for the Canadian mar-ket.

# COLD IN THE YUKON.

# Some of the Effects Experienced by Dwellers in Dawson City.

Winnipeg, Man., Dec. 8 (Special)-E. L. Parsons. an old time Yukon miner, has arrived here from the frozen north and tells some remarkable stories of nappenings at Dawson City when the thermometer drops many degrees below zero. He says:

happenings at Dawson City when the thermometer drops many degrees below zero. He says:

Strange manifestations appear as a result of the extreme cold. One is the way a fire bun in the stove. It rears and crackles like a great forge, and we wonder the stove seems to dissolve in the stove. It rears and crackles like a great forge, and we wonder where the heat went. At 60 degrees below every stovepipe throws out a great white cloud of smoke and vapor, resembling that from a steamboat stack in its whiteness, and this cloud streams other white-gray mist or haze that remains permanent in the atmosphere of the town like a dense for white-gray mist or haze that remains permanent in the atmosphere of the town like a dense for whenever it is 40 or more degrees below zero. The white-gray fog is not a fog as you know it, but, a frozen mist, and every man, woman, child, animal and even the fire that burns is throwing out moisture into the air which is immediately turned into a cloud of frozen vapor, which floats away and remains visibly suspended in the air.

Exposed hands, ears and noses freeze in this temperature while going a few yards unless they are well protected. The breath roars like a mild jet of steam, while a dipper of boiling water thrown out into the air emits a peculiar whistling hiss as it drops through the frosty air.

Prospectors, in attempting to boil a dish of rice or beans upon a campfire unprotected from the weather find that the side of the dish which is in the fire will boil, while the part of the dish exposed to the weather will freeze. Edged tools subjected to this temperature become as hard and as brittle as glass, and will break as readily under strain. I have seen a safety valve blowing off steam, with the temperature become as hard and as brittle as glass, and will break as readily under strain. I have seen a safety valve blowing off steam, with the temperature become as hard and as brittle as glass, and will break as readily under strain. I have seen a safety valve blowing off steam, with the t

room, it caution must be exercised in the extremed weather not to freeze the lungs, which one wickly do if he hustles about at the ordinary Quick and fatal pneumonia can be cond in a few moments. One has to be careful

# STRIKE IMMINENT IN HEARST MINE.

### The Canadian Finance Minister is fully aware | Eight Hours and Union Wages Demanded by Homestead Men in Black Hills.

[By Telegraph to The Tribune.] Deadwood, S. D., Dec. 8 .- The Homestake gold mine in the Black Hills, owned by William Randolph Hearst and his mother, which has been do run as a non-union mine for twenty-five years, is causing trouble, and a strike is imminent. One thousand of the miners have joined the Western Federation of Miners, and demand an eighthour day, with union wages. The mine officials have refused.

The mine employs 2,500 men, and in case of a

strike every mine in the Black Hills would be affected. The state militia has been ordered to hold itself ready to start for Deadwood on two hours' notice. Should a strike occur, thousands

# of men will be idle in the mountain towns, and trouble is expected. The federation officials have issued an ultimatum to the union miners to enforce union rules or strike.

# LITTLE SNOW FALLS.

# Predicted Storm Arrives, but Remains Short Time.

The snowfall predicted by the weather bureau began last night and continued for several hours. The mercury, which was 11 degrees above zero is the morning, crept up to 18 degrees, and remained there until midnight. Throughout the day them was little sunshine, but an acundence of bill blasts from the northwest.

A strong westerly gale which has been blowing for the last forty-eight hours at sea, has delaye the fleet of transatlantic liners due yesterday. Few ships reached port, and the frested sides of those that did showed that cold Weather and high seas prevailed outside the Hook.

The sudden change in temperature within the last ten days has caused much illness in the city, in the stuffy and ill smelling surface cars the coughing of passengers with colds could be heard continually.

While coal is not a scarce commodity, there has been a general compiaint among flat dwellers of a lack of heat. The unusually low temperature has come a trifle too soon for the average flat owner, who generally plans to hold on to his coal supply until December 1s. ne a trine too such for the average hat owner, o generally plans to hold on to his coal supply il December his he forecast of the local weather bureau for tov is snow with a rise in temperature. The hightemperature yesterday was 22 degrees, at 11
the property of the m.: the lowest, il degrees, at 3 a.m. Southe; ly nds, shifting later to the north, are predicted.

#### HELD FOR A FOUR-CENT THEFT.

#### Workman in Refinery Accused of Stealing Pail of Sugar.

A cheerless Christmas is in view for Julius Staminiski's wife and three little children. He is locked up in the Queens County Jail, in Long Island City, charged with stealing four cents' worth of sugar from the big sugar plant of the American Sugar Company, at Pidgeon street and the East River, Long Island City. The alleged theft took place about 6:30 o'clock Friday night, when, with place about 6:30 o'clock Friday night, when, with his battered dinnerpail about half fille! with sugar which he had gathered from the floor, Slaminiski sought to leave the building. He apparently saw no wrong in taking the sugar, it is said, for his pail was without a cover and open to inspection by any one who cared to note its contents. As he was about to leave the building he was accosted by the watchman, Louis Holzbach, who inspected the contents of the pail and arrested him. Excorting him down to the 24th street ferry, he turned his prisoner over to Patrolinan Quian, who is one of the three policemen stationed at this, one of the most important posts in Long Island city. Quian was compelled to quit his post and accompany the watchman with his prisoner to the station, where Slaminiski was formally charged with petty larceny. with petty larceny.

Slaminski gave his address as No. 138 Pierrepont street, Brooklyn, where he said his wife and children were waiting his homecoming. When asked to place a value on the sugar the watchman said it was worth about four cents.

#### DINNER IN SETH LOW'S HONOR.

Birmingham, Ala., Dec. 8.-Ex-Mayor Seth Low York was the guest of honor at a dinner he Country Club to-night. He will leave here New York to-morrow.

### NEW WOMEN'S TAILORING OFFERS.

S. Kheitel, women's tailor, at No. 8 East 30th street, near Fifth avenue, is advertising special reductions this week in made-to-order tailor gowns of new and exclusive styles. Mr. Kueltel attends October November to all fittings personally, and guarantees entire to all fittings personally, and guarantees entire satisfaction in every case. He announces that he has returned from making an exhaustive research among the best ateliers in Europe, and has styles that will suit the most discriminating tastes. Each design, he says, has a novelty and charm that will be found to be most pleasing. Mr. Kneitel also announces a special sale of Paris models and of a rare collection of imported tailored costumes left over from this season.

### THE FEDERAL TREASURY.

Washington, Dec. 8 .- The condition of the Treasury at the beginning of business to-day was as RESERVE FUND.
