

BRIDGE COST GROWS.

APPROACH VALUES JUMP.

Blackwell's Island Structure Estimate Increased \$8,000,000.

Blackwell's Island Bridge may cost \$7,000,000 more than the estimate of the engineers. The land for approaches, estimated at \$3,000,000, cannot be purchased for less than \$6,000,000, and the price may run up to \$8,000,000. Charles S. Hervey, supervising statistician and examiner in the Finance Department, yesterday turned in a report to the Controller which tells of the difference between promise and performance. It is suggested by the investigator that in connection with the purchase of land needed for the bridge the "speculator has been active." This is the only comment made on the rapid increase of property values.

Mr. Hervey's report in calling attention to the foregoing says that the former Board of Public Improvements decided that the bridge would cost \$2,545,500, including the land necessary for approaches. It now appears, Mr. Hervey says, that this bridge may cost the city from \$18,000,000 to \$20,000,000. In the original estimate the price of the land required was placed at \$2,145,500. This land may cost \$3,000,000, and perhaps \$5,000,000.

By recent action of the Board of Estimate and Apportionment, Mr. Hervey says, the Manhattan approach has been extended. "In the area of land to be acquired from Pier 1 to Third avenue," he declares, "it appears from facts obtained by my examinations in the office of the Corporation Counsel, the speculator has been active, and before the property has been finally purchased the city is likely to be heavily mulcted." Continuing, Mr. Hervey says:

The estimated cost in excess of \$18,000,000 is based upon the following summary of disbursements already made, obligations assumed and estimated cost of land and other contracts to be let:

Paid out to April 1, 1907	\$2,145,500
Obligations contracted and outstanding	2,250,000
Proposed overhauls for footpaths, etc.	250,000
Estimated cost of land and other contracts to be let	6,000,000
Total	\$10,645,500

O. F. Nichols, consulting engineer up to April 1, is authority for the statement that the original estimate of \$4,000,000 pounds of steel for the superstructure was too low by about 10,000,000 pounds, bringing the total up to \$4,000,000 pounds. Modified plans adopted in 1905 required about 6,000,000 pounds of structural material, or 10,000,000 pounds, or 12,000 tons in all. Of this amount 3,000 tons had been manufactured and shipped by the Pennsylvania Steel Company to April 1 last.

The outstanding obligations, or contract liabilities, for construction and for material for the bridge on April 1, 1907, were as follows:

Pennsylvania Steel Company	\$1,841,299.00
Williams Engineering and Construction Company	567,744.25
Company, power house, etc.	2,000.00
Company, approach, etc.	5,701.49
Company, approach, etc.	797,804.00
Architectural services—H. F. Hornbush	200.00
Total	\$3,212,548.74

Following is a statement giving the estimated amount of contracts yet to be awarded, plans for which are now being prepared:

Queens approach—Masonry	\$500,000
Manhattan approach—Masonry	1,000,000
Flooring, railroad tracks, railing, etc.	500,000
Ornamentation on towers	50,000
Elevators and stairways in towers	200,000
Total	\$2,250,000

According to Mr. Hervey, there is to be a long delay on account of the backwardness of the work on the approaches. He says that nothing of a definite character has been done on the plans for the approach in Manhattan. The reason given for the delay, he says, was the uncertainty which existed until a few months ago as to whether Second avenue was to be widened, and consequently what arrangements might be made to go over or under the Second avenue elevated railroad. This uncertainty has been removed, and Mr. Hervey says the plans for both approach and plan in Manhattan should be got under way at once.

SEVENTH REGIMENT VETERANS DINE.

The 7th Regiment Veterans' Association held its annual reunion and dinner last night at the Hotel Astor. More than three hundred attended.

With Colonel Thomas Diamond, president of the Veterans' Association, who presided, was Colonel Daniel Appleton, the president regimental commander, who responded to the toast, "The 7th." Justice Scott spoke on "The Civil Power," the Rev. L. W. Martin on "The Moral Power," Colonel William F. Boom on "The Patriotic Power" and Captain J. Weston Meyers on "The Staff."

CIVIL SERVICE REFORM DINNER.

The Civil Service Reform Association, in connection with its annual meeting at the Hotel Astor, on Wednesday, May 8, will give a dinner. The meeting will be held at 7 o'clock, and will be followed by the dinner at 7:30. Colonel Silas W. Burr, president of the association, will preside, and Secretary James H. Garfield, Controller Mitz, Edward M. Shepard, John G. Milburn, Thomas M. O'Brien, of Buffalo, will speak. Only members of the association and of the women's auxiliary will be invited.

CAR FALLS DOWN HILL.

Twelve Hurt as Newark Trolley Takes Incline Backward.

Sixty passengers who were packed in a Kinney street trolley car in Newark yesterday afternoon had a wild ride when the vehicle ran backward down the steep West Kinney street hill, jumped the tracks and dashed along the sidewalk for almost a block. Twelve of the passengers, one of them a woman with a baby in her arms, were seriously injured and were taken to hospitals or to their homes.

The brake chain of the car snapped in two when the car was nearing the summit of the incline, and the emergency brakes failed to work. The car shot back down the hill at a rapid rate, passengers jumping or falling from it as it went. The injured are:

BLOOMIN, Samuel, fifteen years old, of No. 84 School street; shock and bruises.

CANTWELL, Edward F., twenty-three years old, No. 621 High street; injured about the back; St. Barnabas's Hospital.

GITT, Edward H., No. 310 Waverley avenue; bruised about the head and body; went home.

HENDERSON, Frank D., forty-three years old, No. 24 Monmouth street; contusions on the back; St. Barnabas's Hospital.

KRISTAL, Miss Esther, sixteen years old, No. 151 Prince street; shock and bruises.

NEWMAN, Mrs. Mary, No. 600 Market street; crushed and believed to be internally hurt; taken home.

PATTERSON, William, No. 112 Elm street; legs hurt; went home.

SALTZ, Mrs. Dora, No. 23 Hillside place, and her fifteen months' old baby; taken home.

STOKINGER, EDWARD, No. 612 Springfield avenue; body and arms hurt; went home.

WALIN, Constantine, No. 283 West Kinney street; bruised about the legs and body; taken home.

WASSERMAN, Max, No. 285 Belmont avenue; crushed by other passengers; went home.

WOLFSON, Meyer, thirty years old, No. 435 Hunterdon street; skull fractured; St. Barnabas's Hospital.

The scene of the accident is one of the steepest hills in the city, and to make transportation by trolley a possibility the Public Service Corporation runs its smallest cars up the hill. They are usually crowded, owing to their size.

Frederick Pennell, the conductor, and William J. Rooney, the motorman of the car, were arrested and later released in the custody of their employers. Rooney said that his car had almost reached the summit of the hill when the trolley pole slipped, and he put on his brakes to bring the car to a stop. As he whirled the brake around, he said, the brake chain seemed to work until the car was almost at a standstill, when suddenly the chain broke and the vehicle started on its downward flight. At the foot of the hill the tracks make a sharp turn to the north in Washington street, and as the heavily laden car reached the curved rails it jumped and continued down through Kinney street.

Men and women stood clinging to straps when the car began its wild flight. Then a panic broke out, the men, it is said, roughly beating their way through the car in an effort to save themselves. When it struck the sharp turn at the foot of the hill men, women and children were thrown into a heap. The car did not stop until it had tore down a big tree and had narrowly missed several pedestrians.

Doctors were quickly called to the scene and attended the injured until the ambulances arrived.

F. C. DUNLAP BACK IN PHILADELPHIA.

Succeeds Major C. E. Gillette as Chief of Quaker City Bureau of Filtration.

Philadelphia, April 27.—Frederick C. Dunlap, of the New York City Water Department, was appointed chief of the Bureau of Filtration of this city to-day, to succeed Major Cassius E. Gillette, who resigned by request. The salary of the office will be reduced from \$17,000 a year to \$8,000. Dunlap was formerly connected with the bureau, but when John W. Hill, of Cincinnati, chief of the bureau, was removed by Mayor Weaver after the political upheaval two years ago, he resigned and went to New York.

Major Gillette resigned from the engineer corps of the United States Army to succeed Hill. Shortly after he came here he charged that the contracting firm of McNichol & Co., of which several well known politicians are members, defrauded the city of a large sum of money in the construction of the filtration system.

B. R. T. STRIKE BELITTLED.

General Manager Calderwood Blames Labor Agitators for Trouble with Firemen.

General Manager Calderwood of the Brooklyn Rapid Transit Company said yesterday that the company did not fear a strike of the firemen at the power houses, and that the men did not want to strike. He said the motormen and conductors would have no idea of striking in sympathy. "The company voluntarily increased the wages of the firemen a year ago, and all who are now at work are satisfied," said Mr. Calderwood. "The labor agitators induced twenty-five men to strike at the central power house on Tuesday for another increase, and they would all like to get back, but we have filled their places. If every one went out

of the firemen a year ago, and all who are now at work are satisfied," said Mr. Calderwood. "The labor agitators induced twenty-five men to strike at the central power house on Tuesday for another increase, and they would all like to get back, but we have filled their places. If every one went out

of the firemen a year ago, and all who are now at work are satisfied," said Mr. Calderwood. "The labor agitators induced twenty-five men to strike at the central power house on Tuesday for another increase, and they would all like to get back, but we have filled their places. If every one went out

of the firemen a year ago, and all who are now at work are satisfied," said Mr. Calderwood. "The labor agitators induced twenty-five men to strike at the central power house on Tuesday for another increase, and they would all like to get back, but we have filled their places. If every one went out
