THE COPPER MARKET.—Good sales of copper continue, but many of the selling agencies and producers have withdrawn their 12% cent a pound quotation. It is estimated that the sales on the current movement aggregate a total of about 15,000,000 pounds and that all the companies have made themselves easy until the first of the year at least. The general opinion is that the current month will show a further shrinkage of stocks on had in this country and abroa?, although the curtailment of copper production will not begin to be actually reflected in the copper Producers' statistics until the atter part of next month. The opening was steady at an advance of 5 points on October to a decline of 3 points. Other deliveries were easy, and during the first few minutes the active months sold off to a net loss of 6 to 9 points. A rally on heavy buying by trade and other recent supporters of the market, carried the market back to about, or a point over, Monday's close, and after easing off from this level to a net decline of 10 to 13 points, the market again railied on a rumor that the West Indian storm was heading inland. But there was no broadening of demand on the advance, and the market later broke into new low ground under a renewal of liquida-	tained.
