The Springtime Output of Authors and Publishers

Life's Comedy and Tragedy Portrayed in Current Fiction

Silas Wright in Romance
Mr. Belcher's First Tale of Political Sins and Sufferings

It is a good thing to use the great names of American Statesmen in the way of fiction, as one of those other books, as themes of literary development, in which the imagination is the true author, and the truth of history is merely the subject matter. Silas Wright, the former Governor of New York, and one of the ablest men of our times, is the subject of the following story, which is by George Moore. Moore is the author of the well-known "Irving," and the editor of "The Atlantic Monthly." He is a man of wide knowledge and vast experience in the art of fiction, and he has written a story that is full of humor and pathos. The story is set in New York, and the characters are drawn with great care and accuracy. It is a story that will be read with interest by all who are fond of fiction, and it will be a valuable addition to the literature of the American people.
