completed plans we cannot see grass, shrubs and trees in juxtaposition to freight Max Lieberman. President John H. Finley spoke of Mr. Churchill as a fine type of City College alumnus. Later Mr. Churchill permits this. We have only to think of the told the graduates that the college was ling, sale and preparation of patent concrete coal bin erected at Ninety-sixth his foster mother, to whom he street, where control of the waterfront was not given to the Park Department.

> OLD GRADS DAY AT COLUMBIA. Three Thousand in Alumni Confer

ence and at Play.

Preston, might almost be called the

Columbia University yesterday wel comed its 3,000 reunioning graduates, who kept things stirred up from early morning intil well after midnight. In Earl Hall in the afternoon the alumni fought out the questions of the methods of electing alumni nembers of the board of trustees and the preservation of the alumni council

John B. Pine, '77, a trustee of the univer-sity, declared that the alumni should be permitted to vote but that the ballot should be restricted. According to Mr. Pine, although Columbia has some fifteen or seventeen thousand living graduates, a seventeen thousand living graduates, a great many of them have no interests at all in the university, and especially those who obtained their baccalaureate degree in other institutions and finished their professional work under Columbia instructors. It would work no injustice, said Mr. Pine, to deprive such persons of the right to vote for members of the governing board.

The alumni voted to preserve the privilege of the trustee ballot to only those alumni who were definitely interested in the university. The alumni council and the Columbia Alumni News will be continued.

lieaded by the continental band of the

to the gymnasium, where the classes from 1890 down to 1912 produced a series of stunts.

Then there was an organ recital in St. Paul's Chapel by R. G. S. Pigott, '08, and a beefsteak disner in the commons. The Columbia varsity five played the Pennsylvania basketball team. A dance at which the alumni were guests of honor brought the day to an end.

TWO RIDES FOR A NICKEL. School Children Favored in Bill to

Wants Public Aid in Stopping Traffic in Drugs and Quack Cure-Alls.

LAWS MUST BE IMPROVED

Dr. Alsberg Hopes Each State Will Pass Adequate Pure Food Acts.

Dr. Carl L. Alsberg, successor to Dr. Harvey W. Wiley as chief of the Bureau of Chemistry, made the first public statement of his policy at the Waldorf. Astoria last night before the National Association of Manufacturers of Mail inal Products.

Dr. Alsberg bespoke cooperation ha tween the manufacturers, the public, the press and in one direction and between the States and the Federal Government in another, all designed for the control and regulation of the handmedicines, particularly narcotics, and breaking up of the indiscriminate sale of drugs like cocaine and opium and their derivatives.

Dr. Alsberg appeared with an olive branch, but made it plain that he also wore a sword. While he advocated cooperation he was as ready and willing to enforce all pure food and drug laws as anybody ever in charge of the bureau.

"In addressing an audience such as this," the chemistry chief said, "I fee that much that I would say to other branches of industry would be out of place here." Just previously he had said that he had been so short a time in charge of the work that his speech snust be a declaration of principles rather than a history of accomplishment. He was in effect "kiting a check." with the hope that the checks would be amply covered in time.

To most branches of the food industry, for example, he was ready to say that the bureau hopes to cooperate with them in placing their processes upon a scientific basis, in eliminating waste and utilizing by-products to the best advantage. He did not mention what branches of the industry the bureau did not hope to cooperate with. His bureau hoped to do for the food men what other branches of the Departmen

of Agriculture does for the farmer. As a matter of fact the solution of many therapeutic problems has been worked out in the commercial field, he said. Private investigators have not the money that commerce can expend. He instanced the coal tar products and other discoveries in proof of this. So far as pure food is concerned, Dr. Alsberg declared that a great step was

taken when the bureau won the confidence of the public. "We realize fully," he said, "that much remains to be done, but public confidence has been won and precedents

have been established. No backward step will be taken." "It is up to the separate States to

make the pure food and drug problem simple. Conditions throughout the Union will be right only when each State passes and enforces adequate food laws and when these laws have been unified and harmonized with those of the Federal Government."

He hoped that consumers in every State would work to that end.

There was a different tale to tell when it came to drugs and medicines, he speaker declared. The fault had een in part with unenforceable parts of the law. The one great good ac. complished had been by the cooperation the Treasury Department and the Department of Agriculture, which had kept from the country injurious drugs and misbranded patent medicines. The Treasury Department had been able to exercise absolute power in this particular to the benefit of the ill who

grasped at the cureall nostrums for-It is only when it comes to dealing with native manufacturers that trouble arises, Dr. Alsberg said. The Sherley act will compel the removal of all false and fraudulent printing from

the package and the removal of all false therapeutic claims. But that is only a partial remedy. It does not give the Agricultural Department power to enable bostrum proprietors to find ways

Dr. Alsberg found a ray of hope in this situation, however. This was because a small and powerful part of the press is censoring its patent medicina advertising voluntarily. Manufacturers themselves are aiding in the work, and one large concern has recently and nounced that it will no longer deal in patent medicines. It has substituted non-secret preparations of recognized merit.

Even if the people are protected from quack medicine a great task remains. forming drugs, such as opium and cocaine. Dr. Alsberg said it has been pretty well established that only onethird of the cocaine brought into country is used legitimately. The Harrison bill, now before Congress, shows Hamilton Lewis, Lawrence Y. Sher-be curbed, That proposes to liceuse all man, Frank H. Funk and Barney Berlyn persons dealing with the drugs, and as the great bulk of both is imported every consignment can be noted, followed and controlled as it is distributed among the several States.

Dr. Alsberg interrupted his address at this time to say: "Should this measure fall it is certain

to result in far more drastic measures." He said in conclusion: "I propose to ise every lawful means of the Bureau of Chemistry to accomplish this end
