

have undergone a special grand jury inquiry and one has been begun in Suffolk county. Mr. Hennessy declares that he will be able to show that in twenty-two counties of the State Tammany enjoyed a record of graft during the former highway administration.

Both the Governor and Mr. Hennessy refused to say to-night just what other counties would have grand jury investigations.

Gov. Sulzer also designated to-day Supreme Court Justice Borah to preside over a special term of the Supreme Court which will investigate late in August the Great Meadow prison graft allegations of George W. Blake. The Governor and Commissioner Blake count on the grand jury finding indictments.

The Governor has in mind a similar investigation by a grand jury in Cayuga county of the Auburn prison situation, which Blake criticized.

MARCONI WIZARD BACK TO CURB.

Cartier, Who Made a Fortune in Three Weeks, Comes Down a Peg.

L. P. Cartier, curb broker and wizard of Marconi stock, who in the bubble prices of Marconis of March and April a year ago went from the condition of ordinary curb broker to a fortune of six hundred and sixteenth of a million dollars, is back to the curb. His fortune of \$400,000, or sixteenth of a million, has melted away. So says the curb.

The Marconi wizard was up at his home in Larchmont. His office, formerly in the apartment house at 35 Broadway, had been stripped away and sold two weeks ago. The office was here except for a red carpet and a few wicker chairs, emblems of prosperity.

The wizard is planning to do the curb grind for some Stock Exchange firm. Either that or he is going to get out of the curb, and make a fortune for himself. His big house at Larchmont, it is said, is still his. Also he has sold only one of his automobiles instead of both of them. It wasn't any good anyhow, said the Cartier representative in the deserted office yesterday. How much more of his fortune he has retained was not told. In the present state of the game, however, he is not going to pay \$50,000 a year office rent and keep a staff of forty-nine. These days are different from those wonderful weeks in April when Marconi stock skyrocketed from \$15 to \$250 and the wizard cleaned up his sudden wealth.

SIX PROPOSE TO COURIER.

Miss Murphy on Auto Tour Makes Big Hit in New England.

Mrs. Susan Walker Fitzgerald and her delayed band of suffrage couriers, including Miss Margaret Murphy, Dr. Eliza L. Ransome and Miss Matilda A. Fraser, reached New York yesterday in time for the Woman Suffrage party's second reception for them. They brought more than 1,000 signatures to their petition, the fruit of a 2,000 mile automobile journey through New England, made since July 14.

They were joined here by the party which has been touring Massachusetts in the automobile of J. F. Kelly, secretary of the Massachusetts Women's League, which succeeded in doubling the membership of that organization during an itinerary that included fifty towns, with four or five meetings in each.

Only two suffragists, Misses Caroline Riley and Margaret Peary, were in New York yesterday. Mrs. Inez Haynes Gilmore, Miss Florence Tinscomb and Mrs. Maude Wood Parker having gone back to Boston from their tour. Mrs. Henderson Evans and Miss Margaret Taylor went on to Washington. Miss Riley was the proud custodian of 3,748 Massachusetts signatures, and reported that many of the young men who had joined the men's league said they were doing so on the advice of their political leaders, who said woman suffrage was surely coming.

The New England party naturally had more adventures to report, including six proposals for Miss Margaret Murphy, the blue eyed, black haired one, who is the daughter of Michael Murphy of the Boston Central Labor Union.

Other couriers will leave on the 5 o'clock train for Washington, among them Mrs. Olive Stott Gabriel, who will carry the New York State petition with 6,000 signatures.

SUFFRAGE TENT ASSIGNED.

Organizations That Will Occupy It During Yonkers Fair.

The drawing for possession of the suffrage tent, which is to be one of the features of the Yonkers fair, was held at the Yonkers Y. M. C. A. building, took place yesterday. Mr. Ronald Stuart drew it for the first week for the State association. Mrs. M. S. Suffer drew the second for the Woman Suffrage party. Mrs. James Lees Laidlaw the third for the national association and Miss Beatrice Brown the fourth for the Woman's Political Union.

The last week will have suffrage day, Saturday, August 30, when 40,000 are expected to attend to hear Col. Roosevelt and Mrs. Roosevelt. There will be a torchlight parade and other features. All local suffrage organizations will cooperate.

In order to make the affair a success the committee of which Mrs. M. W. A. Water is chairman has opened headquarters in the Heidelberg Building.

COPPER MEN NEED THE TROOPS.

Appeal to Gov. Ferris Not to Remove Militia.

CALUMET, Mich., July 29.—A meeting of the financial and retail and wholesale men of Calumet to-day resulted in an appeal to Gov. Ferris by fifty banking and commercial houses asking him not to remove the troops now guarding mining property.

The proposal of the Governor to arbitrate comes at a time when the situation begins to show the most threatening aspect since the military forces have been in charge. Loyal employees of the Calumet and Hecla were being in some of the nights to-day after they had left work on the pumps. Deputy sheriffs arrested two men near Hancock to-night on suspicion of having taken part in beating up two men near the Superior mine.

It will be a month before all the workings are cleared of water, as new machinery must be lowered and placed. Attempts will be made to mine copper on the upper levels, but just when the companies will be ready to start work is not known.

TRAIN MISSES AUTO BY INCHES.

Magistrate Leach Drives Machine Through Railroad Gates.

Magistrate John A. Leach drove his automobile through the closed railroad gates at the Lawrence street crossing at Flushing yesterday morning just in time to save his party from being hit by an electric train of the Long Island railroad.

He was driving to court, accompanied by Probation Officer Kenneth S. Major and Court Reporter Gustave Huttenlocher. When the automobile was on the track at Lawrence street, the gates on either side were lowered by the motorman as a train was approaching. Magistrate Leach instantly chose the only means of escape, and drove his car through the gates, narrowly missing the train. The train rushed by.

WARNING!

The holders of our Burglary Insurance Policies are warned to instruct members of their households not to allow strange men to enter the premises without showing written evidence that they are what they pretend to be. They are also urged to lock up their jewelry when not in use. Residences have recently been robbed by men gaining admission by misrepresenting themselves as plasterers, messengers, and "inspectors," and thefts have been committed of articles worth many thousands of dollars.

FUSION CAMP NEAR SPLIT ON CANDIDATE

Threat From Hearst to Bolt Lands Like Bomb on Committee.

MITCHELL MEN CONTENT

Collector Favored as Compromise Between McAneny and Whitman.

Fusion politics reached the danger point yesterday. The various fusion leaders are nearer disruption than at any time since the committee on candidates began looking over the field. Dogday heat and arbitrary demands from leaders of antagonistic parties had the slatemakers at their wits end.

The executive committee had two sessions with the sub-committee on candidates and in addition listened to a half hour talk from John Purroy Mitchell, who went before them with the intention, as he said, of clearing up misapprehensions about himself.

When all was said and done it was clear that Mr. Mitchell's stock had risen considerably during the day. The committee on candidates put him neck and neck with Borough President McAneny, with Mr. Whitman, who had the same proportion was said to prevail among the twenty-three members of the executive committee.

Favor Mitchell's Chance.

The showing was so good that the Progressive leaders claimed a victory for Mr. Mitchell. They said that thus far the fight had gone in his favor and that he would put in a good showing in the general committee.

The movement toward Mr. Mitchell was an abrupt change in the lineup. It was ascribed to a letter from John J. Hopper, who has carried the Hearst flag in conflicts of many sorts. According to the report in circulation last night Mr. Hopper mailed a letter on Monday night to Joseph M. Price, chairman of the executive committee, threatening in the name of William R. Hearst to bolt the fusion ticket in the event of Mr. McAneny's nomination. It landed in the fusion ranks like a bomb.

Hearst is Deft.

Mr. Hopper is said to have told the fusionists that Hearst would not only refuse to lend the Independence League to the fusionists if Mr. McAneny were the candidate, but that he would put a ticket in the field to rout the fusionists. Mr. Hopper said that he would be the candidate, or possibly Mr. Hearst might run again. In any event, Hopper would have nothing to do with a McAneny ticket, and the fusionists neither by hook nor crook could induce Hopper to take a place on the ticket.

Behind it all was said to be an understanding between Francis W. Bird, chairman of the Progressive county committee, and the Hearst people to run Mr. Mitchell as an independent candidate.

The fusionists were faced with a dilemma in the case of Mr. Whitman because they have felt that the Republican organization was only waiting for a good chance to run the District Attorney on a ticket of its own. If they nominate him they have the promise that the Progressives will bolt the fusion ticket and if they don't the Republicans may put him in the race.

Reach a Deadlock.

No definite report came last night from the committee room, but to all appearances things were deadlocked. When members of the committee came to the general room at fusion headquarters they showed every sign of a quarrel. The Progressive leaders thought of putting up the Supreme Court Justice Seabury as the last hope for harmony.

The committee wound up its session at 12:30 this morning to meet again this afternoon at 2:30 o'clock. It was clear that it was far from a decision. It seemed probable that the fight will be carried into the general committee to-morrow evening.

The executive committee, it is understood, will pass on three tickets to the general fusion committee at its meeting to-morrow night.

Men believe that with Hearst the ultimate dictator of the fusion slate enough McAneny men would go over to Tammany to counteract any possible advantage Hearst could give the fusion ticket.

THREE HURT IN MOTOR CRASHES MAY NOT LIVE

One Girl and One Boy Injured by Autos—Ambulance Strikes Truck.

One girl and one boy are expected to die from injuries received by being knocked down by automobiles yesterday. A man hurt in a collision between a motor truck and an ambulance is not expected to survive.

Several persons were knocked down at a Manhattan street and Broadway by an automobile at 9:30 in the evening. Pauline K. Weaver, 15 years old, of 24 Barre street, Newport, R. I., is thought to be suffering from a fracture of the skull and concussion of the brain. Her mother, Mrs. Grace K. Lentz, of 854 Summit avenue, The Bronx, has a sprained ankle.

The automobile was operated by Daniel Steinberg, a muslin manufacturer of 802 West 131st street. He was driving a Manhattan street he saw a group of persons waiting for a southbound surface car. Steinberg swerved his machine to avoid running over one person in front of the automobile and dashed into the group.

An ambulance took Miss Weaver to the Knickerbocker Hospital. Her condition was reported as critical. R. C. Peck, a clerk in the office of Alton B. Parker, was bruised by the auto.

Steinberg was arrested on the charge of recklessly operating an automobile and was taken to the night court.

Walter L. 12, of 305 West 130th street, was knocked down by an automobile owned and driven by Mrs. Ethel M. Hisebe at 212th street and Broadway late in the afternoon. Graham had just stepped from a street car when the machine struck him.

Mrs. Hisebe was accompanied by her husband, Eugene Hisebe, a reporter. They took an ambulance to the Washington Heights Hospital. Dr. Grimsby said there was a fracture at the base of the skull and concussion of the brain and that there was little hope for the boy's recovery.

The boy's father, John Graham, was killed by the breaking of a boom while working on the Municipal Building about a year ago. Last Thursday the Graham family were driven from their apartment by fire.

One man was fatally injured in the crash of a motor truck and a Lebanon Hospital ambulance at 167th street and Fort Washington avenue. The ambulance was struck by the truck. The driver, Henry Claudy, swerved to the curb. The two men with him pitched out. Charles McCarry of 414 East Twenty-third street was taken to Lebanon Hospital in another ambulance. He is not expected to live. Chester Barrow of 412 East Twenty-third street went home. He was bruised.

The ambulance driver, William Devine, was uninjured. Dr. Frankfeld sprained his wrist.

DIVING BOY STIFLED IN MUD.

His Men Search Chinatown for Drug Illegally Imported.

Men of the staff of John Purroy Mitchell, Collector of the Port, raided opium joints in Chinatown yesterday. The ambulance in which the boy was taken to the hospital was found by the boy's father, who was looking for him in the mud that he couldn't extricate him.

Some one got a grappling hook and pulled the boy out. It was still warm. Dr. Schick, who came from the New York Hospital, said after an hour's work that the boy could have been resuscitated if he had been drowned and not smothered in the mud.

HEAT PREVENTS TRANSFUSION.

No Operation Yesterday in Attempt to Save Mr. Middleton's Life.

On account of the intense heat yesterday afternoon the transfusion of blood was postponed. The transfusion was to have been made in the attempt to save Mr. Middleton's life. The physicians said that another transfusion would not be made until there was a break in the heat wave.

The condition of Mr. Middleton, who is in St. Luke's Hospital suffering from aplastic anemia, was about the same yesterday.

4 MEET DEATH AS RESULT OF THE HEAT

Child Dies in Mother's Arms on Way to Hospital; Man Drops Dead on Sidewalk.

BOY, COOLING OFF, DROWNS

Humidity From 80 to 90 Degrees; Temperature 88 Degrees 414 Feet in Air.

A sunshine shower that gave out little more moisture than a dew fall, and a thunder storm that shot its bolts in the bright face of a declining sun, were features of the weather hereabout yesterday. The meteorological watchers on the Whitehall tower noted that the first rumble came at 5:24 and that, after many growlings, there were real electrical gashes in the cloudless air. There was no trace of rain on the sidewalk, but little showers of momentary duration splashed in many different places, from the Battery to The Bronx.

There has been seldom a more oppressive day than the humidity was pretty close to the point of precipitation from dawn until long after dark. In the evening the moisture materialized in rain drippings downtown. The humidity fluctuated between 80 and 90 per cent, and that is why the perspiration was so general and the discomfort likewise. The highest temperature in the air above us, 414 feet, was 88 degrees at 2 P. M. The thermometer on the tower, however, showed from four to ten degrees. The thermometer at Perry's pharmacy showed 92 degrees.

It will be warmer to-day, according to the forecast. The Washington forecast is for continued warmth to-day and to-morrow, with light to moderate south and southwest winds.

Four persons in or near New York met death as a result of yesterday's heat. There were many prostrations.

List of the Dead.

TRAAR, JOSEPH, 25 years old, 40 Third street, Passaic, N. J., rolled off the roof of a four story tenement house, at 131 West 131st street, Brooklyn, and died. FREDRICH, JACOB, 10 years old, of 131 West 131st street, Brooklyn, died. LANZER, PERCIVAL, 3 months old, of 222 Napier avenue, Woodhaven, L. I., died. UNIDENTIFIED WOMAN, found in Pacific street, near Rockaway road, Jamaica.

Joseph Traar, of 40 Third street, Passaic, N. J., went to the roof of the four story tenement in which he lives to get fresh air. He fell asleep there, rolled off the roof and was killed. His body was found by Walter Thekla of 35 Fourth street.

Perceval Lanzer, whose mother, Harriet Lanzer, lives in 926 Napier avenue, Woodhaven, L. I., died while being carried to Jamaica Hospital. The mother died of a heart failure when she saw that the boy, three months old, was ill she carried him through the hot sun to the hospital, three miles from her home. She was startled when she saw the boy when a doctor at the hospital told her that the little boy was dead.

Jacob Friedrich, 10 years old, of 131 West 131st street, Brooklyn, was overheated when playing yesterday and decided to go in swimming in a pond near Metropolitan avenue, Middle Village, L. I. He started with a cramp and died. His cries attracted Frank Burdette, who ran to the boy's aid, but by the time he got the boy out Friedrich was dead.

Drops Dead on Sidewalk.

A man was seen staggering through Pacific street near Rockaway road, Jamaica, L. I., yesterday afternoon. A short time afterward he was found dead near the sidewalk. There was no card or letter in his pockets to help identify him. The man, about 45 years old, weighed about 140 pounds, had black hair and was dressed in a suit and tie. He was carrying a bag in his hand. He was found by a passerby who called the police. The man was taken to the hospital, but he died before he could be identified.

Frank Patella, 32 years old, of 725 Flushing avenue, Brooklyn, was overcome at Jamaica and Legeton avenues, Union Course, Queens, yesterday. The Jewish man, 35 years old, of 4 West 105th street, became temporarily insane from the heat. She was taken to Bellevue Hospital.

BERNSTORFF ON HIS VACATION.

Says Our Relations With Germany Are Serious.

Count von Bernstorff, German Ambassador to this country, sailed yesterday for Bremen by the North German Lloyd liner Kronprinz Wilhelm, declaring that everything between Germany and America was at a standstill and that he had the right to take his annual vacation.

In response to the question, "Has the tariff question been settled to the satisfaction of the German Government?" he said: "The matter has been adjusted."

"What do you think of the Mexican crisis?" he was asked.

The Ambassador threw up his hands, laughing. He was asked if he was Ambassador, Mr. Wilson, talked enough about that?

NEW \$14,000,000 WABASH LIEN.

Equitable Trust Co. Indebtedness Will Mature on Friday.

DETROIT, July 29.—Judge Clarence A. Sessions of the Federal Court signed to-day an order authorizing the receivers of the Wabash Railroad to issue certificates amounting to \$14,000,000 to provide funds for the indebtedness incurred by the issuance of certain certificates on February 1, 1912.

The certificates are not to be of over \$1,000 denomination each, and are to include a 6 per cent. interest clause, payable semi-annually. Funds from the sale of the railroad will be used to pay the certificates and are to be applied on the principal of the receivers' indebtedness.

The indebtedness incurred with the Equitable Trust Company of New York matures on August 1, 1913. The company holds a lien on virtually all the property of the road.

The condition of Mr. Middleton, who is in St. Luke's Hospital suffering from aplastic anemia, was about the same yesterday.

HEAT PREVENTS TRANSFUSION.

No Operation Yesterday in Attempt to Save Mr. Middleton's Life.

On account of the intense heat yesterday afternoon the transfusion of blood was postponed. The transfusion was to have been made in the attempt to save Mr. Middleton's life. The physicians said that another transfusion would not be made until there was a break in the heat wave.
