FRIDAY, August 27-6 P. M. The features of interest in Wall street to-day were the excitement and betting consequent upon the boat race in England, the speculation in the Gold om and the fluctuations of Erie. As to the boat race It attracted a great deal of attention, and groups were gathered on the sidewalks in Wall and Broad treets the whole day, laying wagers before the race nd commenting upon it after the result was known. The first despatch announcing a victory for Oxford was followed by one announcing the Harvard men as winners, and no little confusion was the consequence. It the apparent authenticity of a telegraphic munication, and was doubtless a device to enble the losers to "hedge," Such was its general Respectation when the first despatch had been onfirmed. In Eric the revival of interest and ope-ations was evidenced in the crowd gathered at the rational Stock Exchange, and the constant passing to and fro of people between the two Exchange buildings. The price opened in the vicinity of 34, advanced to 35%, "cash;" yielded to 33%, and closed ance of the agreement with Michigan Southern, are to withdraw their boats from the lakes, and give ness to the railroad. The London price adwho is one of the prominent directors, is a heavy urchaser of the sterling stock, and that he is exsected within a week or so from Europe. As Jay sould, in the capacity of receiver, still retains the ower to cancel the overlasues, there is an apprehension that in the process of registration a virapl" will be sprung on the heavy short interest in Erie. A lively future is the immediate prospect for operations in it. The rest of the railways were heavy at the opening, and declined with a fall in New York Central, which went down from 203% to 199%. Hudson River went off to 182. The exceptions to the general declined verse New Jerses Central, which advanced to 10736. were New Jersey Central, which advanced to 107%: nrg, which rose to 108, and Ohio and Mis ppl. which touched 33. Lake Shore was steady. The easier feeling in money and the expectation of a favorable bank statement to-morrow led to a strong but dull market at the close. The range of the lead-

The money market was easier under the disburse-nents of the Treasury in payment for the three millions of bonds purchased this week, and the prevail-ing rate was six per cent on all classes of collaterals, with the usual exceptions at seven on stocks, and frequent exceptions at five on governments. Com-

ercial paper was more current.
Foreign exchange was weak, and the leading bankers yielded an eighth in their rates. The follow-ing was the range of quotations at the close of business:—Sterling, sixty days, commercial, 105% a 109%; good to prime, bankers', 109% a 109%; short 109½; 200d to Prime, banacas, 100½ a 100½; anort night, 109½ a 110½; Paris, sixty days, 5.20 a 5.15½; short sight, 5.13½ a 5.13½; Antwerp, 5.20 a 5.15½; switzerland, 5.20 a 5.15½; Hamburg, 35½ a 35½; Amsterdam, 40½ a 40½; Frankfort, 40½ a 40½; on, 78% a 79; Prussian thalers, 70% a 71%.

nts were very strong on all the issues an dvanced about a quarter per cent, except for the 17's. The rise in gold made the market firm despite able news from Europe. From present appearances the forthcoming monthly debt statement will make a favorable showing, notwithstanding the beavy payments of the government. It is now thought the reductions will reach at least two millions. Assistant Treasurer General Butterfield gives notice that parties resident out of the city, choosing sume the risk and expense of carriage both ways, may remit coupons by mail or express, with their post office address, and payment, when due, will be made by remittance of gold or gold notes, by mail or express, as may be directed, or by remittan of gold check payable to order, which will be cashed only upon presentation by banks or known respon-sible parties in this city. Jersey City. SCENE IN THE RECORDER'S COURT-ALTERCATION

BETWEEN A POLICEMAN AND A LAWYER .- Jennie Vreeland was found in company with a police officer Vreeland was found in company with a polloc officer in No. 1 engine house at an early nour yesterday morning and she was taken to the station house. When brought before the Recorder her counsel (Mr. Rowe) attempted to speak with her, but he was ordered outside the railing by officer Mann. He obeyed the order, but soon after a dispute took place between the officer and the lawyer on the subject, and Mann finally arrested the lawyer and took him before the Recorder, who promptly discharged him and told the officer he had no right to arrest any man under such circumstances. If a policeman be abused he is not justified in retalisting by making an arrest so long as no criminal offence is committed, and any officer who acts in such a manner is liable to prosecution for false imprisonment. The Chief of Police here remarked that the officers in such cases were merely carrying out his orders, and that he should always order his men to arrest any one who may abuse them. The Recorder replied that the Chief had no authority to issue such an order, and that he became amenable to the law by doing so. He stated further that the officer had no right to prevent a lawyer from holding a consultation with his client. As soon as Mr. Rowe left the court he proceeded to the office of Justice Haybeck and procured a warrant for the arrest of the officer. He will also commence a suit forthwith, laying heavy damages. in No. 1 engine house at an early hour yesterday

ed to organize a Paterson Council of the Order of United American Mechanics. This Order, which is purely benevotent in its character, is said to num-ber 2,000 members in Newark and over 60,000 in Philadelphia.

ORITUARY .- The funeral of Aaron S. Pennington, which takes place this afternoon, will be attended by the members of the bar residing in Paterson, and the members of the bar residing in Paterson, and from other portions of the State, in a body. Mr. Pennington was toe son of the late William 5. Pennington, formerly devernor of New Jersey, and a brother of William Pennington, deceased, who was also Governor of New Jersey and ones Speaker in the House of Representatives. He was in the seventieth year of his age and had practised law in Paterson over forty years. He was Prosecutor of the Plasa and a member of the Assembly in 1837.

TRAGIC SUICIDE-A MAN STABS HIMSELF TWENTY-FOUR TIMES AND IS APPERWARDS DROWNED .-About seven o'clock on Thursday evening a party of two gentlemen, who were returning from a fishing excursion, observed the body of a man floating in the river Delware, on the confines of this city. Directly they gave the alarm, and the Chief of Police Directly they gave the alarm, and the Chief of Poli ce and others arrived, and the body was towed to the shore. The Coroner was sent for, but not arriving till after dark, a match was lighted, and in the paie glimmering of the taper a most ghasily spectacie was prosented to the view. There were not less than twenty-four stabs all over the body, evidently indicted with a bunt instrument. The most dangerous wound was in the side of the neck. The remains not being recognized, and the circumstances surrounding the affair so mysterious, the Coroner ordered the body to be closely secured in the City Hospital till yesterday morning, when an inquest was held. The people assembled in crowds to view the body, and before the jury had assembled it was recognized as that of William H. Johns, formerly a merchant doing business in New York and recently in Philadelphia. From the evidence elicited at the inquest it appears that the deceased, who had failed in business in the two former places, came to Trenton about three months since and procured employment as dry goods clerk in a store on State street. A few daysago he was discharged and being unable to obtain another situation he commenced drinking so excessively that he was seized with delirium tremens on Tuesday. On Wednesday night he was so furious that three of his fellow boarders remained up to watch him. Thursday morning he left his room and was not seen or heard of till discovered as above stated. A pair of blunt-pointed scissors was found on his person, with which, in the opinion of the physician, he inflicted the wounds, none of which was sufficient, it is supposed, to cause death. The jury rondered a verdict "that the deceased came to his death by wounds and drowning while laboring under a lit of temporary insanity." Deceased leaves a wife and family in Philadelphia. and others arrived, and the body was towed to the

THE LAST CONNECTIONT TRAGEDY. Death of Mrs. McGuire.

Death of Mrs. McGuire.

[From the Hartford Times, August 25.]

Mrs. McGuire, the victim of last Sunday's iragedy, died at a few innuites past four yesterday (Wednesday) afteracon. She had been failing quite rapidly for several hours previous to her death, and was aware that she could not live long. Her faculties remained clear up to the time of her death, and she was able to speak a few words, and made clear and distinct replies to questions put to her by relatives and others who were present.

Dr. Stearns was in attendance, and remained until she passed away. She suffered great pain for some time previous to her death, but her last moments were apparently painless. She died in Mrs. Porticot's room, where she was carried after the bloody assault. Just before her death she was able to assist those who were trying to relieve her by raising her up, and on being laid back on the pillow said, "Let me rest," and died almost immediately. About an hour previous to her death she made her will, and gave all her property, both real and personal, to her four children, to be divided equally. Her attorney, A. N. Hathaway, drew up and assisted in the execution of the will. It is said that she left \$1,200 in money, two or three building lots, two heffers and some other live stock, besides her personal effects. Her father and mother, Mr. and Mrs. Garrity, were made executors of the will.

The husband murderer has not yet been arrested.

The Louisiana Rice Crop.—The rice crop of Louisiana is estimated this year at not less than 70,000 barrels. Before the war the average was not above 10,000 barrels. The swamps on both sides the river are well adapted to its growth, irrigation is easy, and the sea breezes render the rice plantations comparatively free from the sickness which characterizes the plantations of South Carolina and Georgia. So rapid is the increase of production that steam milis are being erected in New Orieans, and every modern improvement in the way of gathering the crop and preparing it for commerce is being introduced. It is confidently expected that this region in a few years will be capable of supplying the United States with this important article of food.
