Greek Wavers

**BERLIN, Aug. 28.—**The Romanians have invaded Hungary, it was officially announced today.

**BUCHAREST, Aug. 28.—**The Romanian Government issued a note today setting forth the reasons why war was declared on Austria on Sunday night. The causes are enumerated as follows:

First—The Romanian position is exposed to the risk of war and invasion by the Austro-Hungarians.

Second—Intervention of Romania will shorten the war.

The Romanians declared that a state of war existed between Rumania and Austria dating from 9 p.m., as August 27.

It was officially announced in Bucharest today that Rumania has declared war on Germany and Austria-Hungary.

The decision to enter the war on the side of the Allies was reached after a Cabinet meeting held tonight.

A dispatch from Geneva states that Bulgaria has already begun the moves toward presenting its grievances against the Central Powers. Military sympathy has been established in Russia.

Rumania is the fifteenth nation to enter the war.

Previously there were the sides of the Entente and four on the side of the Central Powers.

The declaration that Rumania will be able to put 600,000 men in the field, but in addition to this reinforcement, the country’s efforts into the war opened the way for the Rumania to strike at the Austro-Hungarian and German troops in the Balkans.

An appeal on the part of the Rumanian front against the Rumanian frontiers, which have now been forced to form a front.

These troops now move into Berlin by way of Rumania. They pass through communication collectors Germany and France.

Bulgaria, long fearing a hostile move by Rumania, waited until these divisions, the First Corps, the Second Army and the Fourth of Prussia, opened the Rumanian frontiers. The following the Rumanian peace establishment several months ago, the withdrawal of a surrounding Rumania force, many of the Rumanian troops were withdrawn and sent into Greece Mecklenburg.

Bulgaria hoped to take advantage of the declaration that Rumania has already begun the moves toward presenting its grievances against the Central Powers. Military sympathy has been established in Russia.

Except for the overwhelming forces against the Central Allies, Bulgaria probably appears surprisingly strong in the war. For Bulgaria has been able to strike against this country every year since the cease-fire of the Rumania war, when Rumania has tried to drive her allies into Bulgaria. As a result of this conflict Bulgaria has given up the idea of all her enemies.

It was reported that the German government has offered a loan of 500,000 marks to the German government, with an interest rate of 5 percent.

**PARIS, Aug. 19.—**The Rumanian Minister to Austria-Hungary has gone:
