Fritz Kreisler, the Austrian Violinist OPEN TO ALL MEMBERS closes the division of the old ball park grounds, announced several days ago.

DISTINGUISHED ARTIST WHO WILL APPEAR IN MINNEAPOLIS NEXT REAL ESTATE BOARD RECORDS WEEK WITH JEAN GERAR DY AND JOSEF HOFMANN.

Of the three artists who are to appear at the Lyceum theater Thursday evening, April 24, none is more interesting for a debut.

Although as a wonder-child at the age Kreisler, the violinist. He was born in Austria twenty-seven years ago, and since chord in the hearts of his auditors, it has that time has been an infant prodigy, a remained for the young man of 27 with conservatory student, a "child-wonder," his strong personality, his sturdy virilated a recluse in Italy, a German soldier, and his audacity and verve, to win the young man, who, on the sudden illness of Ysaye advertised to play at one of the Philharmonics' concerts at Berlin, He feels the elemental power in him seized the tide of fortune at the flood, and by his wonderful playing conquered the fastidious Berlin public, and fiddled he plays with great dash and assurance,

his way to fame and fortune.

Many illustrious names have been coupled with that of young Kreisler in his wonderful career. His first appearance as a prodigy of only four years was on the same platform with Adelina Patit.

At the forever Paris concernatory her forever paris concernatory has forever paris concernatory. At the famous Paris conservatory he studied two years with Massart, and to him was awarded first prize by such famous musicians as Sauret and Sarasate. And Massart prophesied as great a career for him as for Wieniawski, his most linists an almost tear-compelling tenderfor him as for Wieniawski, his most lear-compelling tender-famous pupil. After his meteoric tour in America at the age of 14, he took a course of instruction under Delibes and Godard, and it was the great Ysaye and Arthur Nikisch, conductor of the Boston Symphony orchestra and later of the Leipsic and Josef Hofmann, the pianist.

Campaign for Additional Members Expected to Bring Important Results.

The Real Estate board has issued an order which will popularize membership in the organization and lead men on the outside to see a gain in being listed. Upon request for instructions, Secretary Robert Webb was notified that all records on file would be open to members of the board. This means that the reports made by the valuation committee will be accessible to members of the board and members only. Under the rules the reports of this committee are made in duplicate. A signed copy is given to the one applying for the services of the committee and the other is placed in the

board's records. The value of this concession will a once be appreciated by the fraternity. For instance, the valuation committee at the request of a prominent insurance company placed values on the company's Minneapolis property amounting to about half a million dollars. This company owns sixty distinct parcels of real estate here, and was willing to pay the fee for the sake of an appraisal by competent

men.
Thursday evening Lester B. Elwood will again entertain the valuation committee which had been directed by a big cor-poration owning a million dollars' worth of city property to value its holdings. The committee will meet at the Min

The real estate board will make a move similar to that employed recently by the Minneapolis club for securing larger membership. It is desired to get the reliable and honest men of the profession into the fold. The membership commit-tee is already planning a campaign of accession. The board presents induce ments which ought to bring outsiders in without great effort.

Never scratching, never wearing.-At Grocers A Few Words

So many men come to me after they have tried every drug known to medical men without success that I want to make it plain to every weak, nervous and debilitated man that the day is coming when you will wonder why you ever swallowed a drug in the hope of ever deriving benefit to your nerves. There is no nerve life in drugs-no strength. When a man is breaking down there is only one positive means from which he can recover his power-that is electricity. Professor Loeb, the scientist, recently proclaimed that electricity was the basis of life. That is what I have been proving for the past twenty-one years.
