

# Royal Baking Powder

## ABSOLUTELY PURE

Healthful cream of tartar, derived solely from grapes, refined to absolute purity, is the active principle of every pound of Royal Baking Powder.

Hence it is that Royal Baking Powder renders the food remarkable both for its fine flavor and healthfulness.

No alum, no phosphate—which are the principal elements of the so-called cheap baking powders—and which are derived from bones, rock and sulphuric acid.

ROYAL BAKING POWDER CO., NEW YORK.

### CAUGHT IN THRESHER BELT

Iowa Farmer Probably Fatally Injured—Arm and Ribs Broken.

Special to The Journal.

Mason City, Iowa, Oct. 3.—While scaping the drive belt of a threshing machine, Henry Diercks, a prominent farmer, was caught and hurled against the engine. His injuries may prove fatal. His arm is broken and several ribs are crushed in. Bad facial

wounds were also inflicted. He was injured in a similar manner last year.

### LUMBER JACKS LIVE HIGH.

The Shevlin-Carpenter Lumber company of Minneapolis is to be called upon in court at Grand Rapids to explain what it means by killing deer out of season to feed its men in the Itasca county camps. James Beatty, deputy game warden at Ashawa, has written a letter to the state game and fish commission telling of a "vicious deed" in what is known as "Farm Camp" of the Shevlin-Carpenter company near Grand Rapids.

## TRUCK GARDENERS SCOOP IN \$1,750,000

MARKET MEN WILL CLOSE PROFITABLE YEAR.

Crops, in spite of drawbacks, have been abundant and of good quality and demand has been equal to supply—Dealers Plan Coup in Potato Market.

The Minneapolis "garden-truck" market, which will close Nov. 1, has had the most successful season it has ever enjoyed, in spite of early drawbacks in the spring. Participating gardeners have received during the season nearly \$1,750,000 cash for their garden produce.

At the opening of the season, things looked somewhat gloomy. The high water drowned out many gardeners who for years past have been prominent in bringing in early garden products. So unsuccessful were the early crops in some instances, that these "regulars" of former days even refrained from renting stalls and those who did have early crops fit for market were able to get good, stiff prices. When the season was in full blast, with the coming of the warm summer months, 500 gardeners were daily to be found at the market stalls.

Melons Dwindle Away.

At the present time, the melon season is just about in its last days; while the final season for the market-gardener, the days of the "root-crops," are at hand. This has been a record season for both quality and quantity of home-grown musk and watermelons, and in spite of the profusion the fruit has found ready sale and at profitable figures.

The gardeners report that the "root-crops" are also exceptionally fine. These include potatoes, turnips, carrots, onions, etc. The general market season is well advanced, there is as yet little difference to be seen in the supply of "truck" offered at the market. This morning, the market gardeners report, there were seventy-five varieties of garden products offered.

Coup in Potatoes.

At the present time there is an interesting little game going on in the potato market, something of an innovation in the experience of market gardeners. The Minneapolis market has reached a point where its quotations are being accepted as the prevailing market price throughout the city among grocers and general dealers in garden products. The potato crop is fully equal this year to last, the amount of potatoes offered for sale is much less and the market is accordingly higher. It seems that large handlers of potatoes are sending buyers to meet the market gardeners at Minneapolis, and are routing much patronized by the incoming truck farmers. In the outskirts of the city the buyers for the large dealers purchase the potatoes and place them in storage. Thus, they are keeping up the price of potatoes on the Minneapolis market because of the supply being cut down in amount offered on the market and thus are profitably speculating.

Officers of the Minneapolis Market Garden company report that the company's income this year from all sources will be about \$200,000, about the same as last season. The principal source of this income is rental of market stalls.

### TAX SALES NOVEMBER 12

STATE AUDITOR DIRECTS COUNTY AUDITORS TO HOLD ALL ON SAME DAY.

State Auditor Iverson has sent out instructions to all county auditors for holding the annual forfeited tax sales. They will be held in every county on Nov. 12, and nothing bid in for the state in 1902 and succeeding years may be sold for less than the full amount of taxes, penalties, interest and costs. Owners may redeem by paying the amount due with 12 per cent interest from day of sale.

This will be the record sale held under the law of 1902. Last year about \$250,000 was realized from the sales. In Hennepin county there was \$25,802.81 realized, and in Ramsey \$22,953.32.

### STATE EQUALIZERS RAISE VALUES \$26,000,000

The state board of equalization has completed its review of real estate values throughout the state. The board has made a total increase in the values of more than \$26,000,000, compared to the figures returned by the county boards, and an increase of nearly \$50,000,000 compared to the figures of two years ago. Real estate assessments as left by the board this year, and compared with two years ago, are as follows:

	1906.	1904.
Farm land	\$402,571,237	\$382,228,240
Structures	45,274,329	40,412,430
Town and city lots	157,478,761	148,071,988
Town and city structures	140,652,548	122,108,858

### YOUNG ST. PAUL MATRON MYSTERIOUSLY ABSENT

Has Mrs. Robert Erdmann of Baker street, West St. Paul, been murdered, or has she committed suicide? This is a question which the St. Paul police are trying to solve. The woman, who is only 17 years of age, has been married eight months. Her mother, Mrs. Snyder of 178 West Ninth street, St. Paul, says several months of trouble between the young couple ended in a violent quarrel and the husband giving her \$1, all he had, told her never to show her face at his home again. This was two weeks ago and the man has not been seen nor heard of since.

### HANK OF HAIR IN COURT

Wife Enters Exhibit in Her Plea for Divorce.

A large handful of long hair was one of the most interesting exhibits in the divorce suit of Charles F. Grade against Emma J. Grade. The case was contested, each party asking for a divorce and each alleging cruel treatment on the part of the other. Mrs. Grade created the most excitement when relating her husband's alleged misdeeds, she said: "Why, he often beat me and threw me around by the hair. Look here!" she exclaimed, and she drew from her pocket a great handful of hair matching her own in color. The case was submitted to Judge Brown, who will file his order in a few days.

### WISCONSIN "U" MAKES 4-YEAR DEBATE PLANS

Madison, Wis., Oct. 3.—Announcement has just been made of the University of Wisconsin's schedule of intercollegiate debates for the next four years. During the ensuing year Iowa will send a team to Madison, while Wisconsin will send one to Lincoln, Neb., and next year Minnesota will send one to Madison and Wisconsin will send one to Urbana, Ill.

During the school year 1908-09 Nebraska will send a team to Madison, while Wisconsin will send one to Iowa City. During the school year 1909-10 Illinois will send a team to Madison, while Wisconsin will send one to Minneapolis.

In the contests of this league all communication with the debaters by prompting or otherwise is forbidden, also the introduction of both private

correspondence and charts is debarred by a new rule.

WILLISTON, N. D.—Frank Smith, Jr., a boy working for O. B. Hayes on a farm at Harrison, went hunting Sunday and nothing has since been seen of him.

## COLE'S HOT BLAST Wonderful Heater and Fuel Saver

For Soft Coal, Lignite or Hard Coal

### Cost of Stove Saved in Fuel

As you know one-half of soft coal is gas—the entire gas supply for many cities and towns being made from the same kind of soft coal you are using. The extent of unburned gases in hard coal is shown by opening the magazine cover of a base burner when the extra oxygen supplied fills the entire stove with flaming gas. Other stoves allow this gas, which is the best part of the coal, also a large part of the heat, to pass up the chimney. This waste will average from \$10.00 to \$50.00 a year for every family and millions of dollars in fuel are thus wasted annually.

### The Original Cole's Hot Blast Stove Saves All Wasted with Other Stoves

Cole's Original Hot Blast, by means of the Patented Hot Blast draft used in connection with other patented features, distills this gas from the upper surface of the coal, utilizing it as a heat producer along with the fixed carbon or coke in the coal.

On account of the patented air tight and gas tight construction giving perfect control over the drafts, it also saves the heat usually wasted up the chimney. \$5.00 worth of hard coal, soft coal or lignite, or a \$1.50 ton of slack or coal siftings is thus made to do the work of twice the amount of fuel in other stoves and the cost of the stove is more than saved in fuel each winter. \$7.50 worth of slack will heat your house all winter, five tons at \$1.50 a ton does the work.

### Build only One Fire a Winter

Cole's Hot Blast is so perfect in construction that fire keeps all night, and when the draft is opened in the morning will burn two or three hours with the hard coal or soft coal put in the night before. No other stove does this. Fire, therefore, never goes out, kindling fires is dispensed with, and the rooms are kept at an even temperature all the time.

Read the Guarantee. We are the exclusive agents for Cole's Original Hot Blast and sell it on the accompanying guarantee which cannot be made on any other heating stove in the world. If you want to save half your fuel bill and would enjoy the luxury of getting up in a warm house on cold winter mornings without kindling fires, buy Cole's Original Hot Blast now.

### Avoid Imitations

Imitations of this Original Hot Blast are many. None of them has the absolutely air-tight and gas-tight construction throughout which Cole's Hot Blast has by reason of its numerous patents. A Patented Steel Collar connects the elbow draft to the stove body and cannot open by action of the fiercest heat. The Patented Compound Hinge on the lower draft cannot warp, and the draft door closes air-tight by its own weight. The guaranteed Smoke-proof Feed Door prevents smoke, dust or gas escaping when fuel is put in the stove. Imitations soon open seams and cracks which spoil them for keeping fire and cause the gas half of the coal and much of the heat to escape up the chimney. See the name "Cole's Hot Blast" from Chicago" on the feed door of our stove. None genuine without it. Ask to see the patented dustless ash cover for removing ashes. Our method is the only clean way.
