

SCORNS PILLS AND HIGH HEELS FOR YOUNG GIRLS

Dr. Lillian Welsh Deplores Lack of
Physical Perfection of
Women

SPEAKS AT Y. W. C. A. HERE

Slapper Who Chews Her Emotions
And Then Chews Them Again
Comes In for Share of Attention
From Lecturer.

Inaugurating the series of lectures at Westhampton College on the "Duties and Obligations of Motherhood" which the Prazier Foundation has just made available, Dr. Lillian Welsh, of Baltimore, head of the department of physiology and hygiene and college physician of Goucher College, spoke in the auditorium of the Y. W. C. A. today afternoon at 4 o'clock to a large audience of young women, including the student body of Westhampton.

Dean May Keller, of Westhampton, introduced Dr. Welsh, who is a graduate of the Woman's Medical College of Philadelphia and the University of Zurich.

Stressing the physical unfitness of women generally by declaring that she had yet to find one perfect physical specimen, Dr. Welsh declared that the United States government did not draft the women of the country as well as the men for the things they were able and capable of doing and that just the war work they wanted to do voluntarily.

The result of the draft, so far as the mothers concerned, proving that only 65 per cent of the men of the country were physically fit—a little more than half—had set the country thinking, Dr. Welsh declared, and she declared that the good thing to have taken stock of the women of the country also. She termed it "disgraceful" that there were so few normally healthy young women.

"Menagerie of Hiss," Dr. Welsh treated the various classes of aches and pains of college girls with humorous sarcasm. The girl who "chews and swallows her emotions and puts them back in her cheeks when over again" came in for her share of attention as well as "the milk-taking animal" and the neurotic and others who had a "menagerie of Hiss."

She illustrated with chalk the fashionable feminine shoe, and just what it did to feminine feet, and declared with kindly scorn that there was absolutely no defense for woman's dress since the time of the French revolution and that no woman if fashionably and becomingly dressed would ever, by any chance, admit that she was not perfectly comely.

"A lady," said Dr. Welsh, "is a parasite on society." The term was explained and the further statement that all her clothes tended to make her more helpless.

Dr. Welsh will lecture again this afternoon at 5 o'clock.

ROBBERS BREAK IN SAFE AND STEAL LIBERTY BONDS

Police Make Finger Print Impressions
And, Before Arrest, Are
Near.

Robbers, early yesterday morning, broke into the office and safe of J. M. Mallory-Martin Wood and Coal Yard, West Clay Street, near the Hermitage Road, and escaped with Liberty bonds, cash, a revolver, razors and other things valued at nearly \$500. Five hundred and fifty dollars of the amount was in Liberty bonds. The balance was gained by smashing a window and unfastening the door.

The safe had probably not been properly locked. It is thought by police, since according to evidence in the hands of detectives, the thieves must have battered at the door for some time with an automobile axle, found in the office, and then found that the safe had been unlocked, or worked a combination. Chief of Detectives Wright asserted yesterday that the robbery was evidently the work of rank amateurs.

William Ernest Toler made impressions of several vague fingerprints for identification purposes, and police believe that the culprits will be arrested in a few days.

TUBERCULOSIS PRESENT IN THIRTY-ONE CASES

Forty-Seven Persons Who Had Influenza Examined by Prevention Society.

TWELVE CASES ARE POSITIVE

These Will Be Placed in Sanatorium. Richmond Anti-Tuberculosis Society Is Now Conducting Membership Campaign.

Results of free chest examinations made recently by the Richmond Anti-Tuberculosis Association for the special benefit of persons who had suffered from influenza were made public yesterday afternoon by Miss Blanche Webb, executive secretary of the association. Out of forty-seven persons examined, thirty-one were found to be infected to some extent.

"This remarkable record," said Miss Webb, "was due to the fact that those who came to be examined were people who had had influenza and were suffering from a chronic cough. It is concerned about their physical condition because of suspicious symptoms. There were twelve positive cases, eleven of which will be placed in the sanatorium, three arrested cases, and sixteen suspicious cases, including persons with phthisis."

Miss Webb stated that the association expects the eleven positive cases to be placed in the proper sanatorium. "Advice as to the necessary treatment will be given, and those in need of financial aid will be put in touch with agencies which furnish such aid," she said. "It is our experience that when hospital care is needed for persons without the necessary means for such care, the association is able to request from the association to organizations or individuals for assistance invariably brings the desired results. In the sixteen suspicious cases revealed by our examinations watchful care will, no doubt, prevent active trouble in the future."

The warning issued by the association to persons who suffered from influenza to submit to a physical examination, and to the fact that many persons who did not avail themselves of the opportunity for a free chest examination, telephone calls to the association's headquarters, 112 Capitol Street, inquiring how to proceed to determine whether or not they were developing tuberculosis. Shortness of breath, spasms of coughing, profuse expectoration, and general weakness are cited by the association as danger signs that should not be ignored.

Though the period set aside by the association for the enrollment of 1919 members has passed, the appeal issued during the membership drive is still bearing fruit. New memberships have been issued to the amount of \$500 and the sum is made to increase this sum to at least \$1,000.

SEEKS LAW TO MOTORIZED ENTIRE FIRE DEPARTMENT

Seaton Introduces Measure in Council for Appropriation of \$148,000.

Councilman Seaton, at the special meeting of the Common Council last night, introduced a resolution providing for the appropriation of \$148,000 to motorize the Fire Department of Richmond. The resolution bears the hearty endorsement of Director of Public Safety Myers, who declares that if the department is motorized he can within a few years save the total cost of the change.

Councilman Morgan R. Mills introduced a resolution appropriating \$100,000 for the reception of the soldiers and sailors and to be known as the "Soldiers' Public Fund."

Due to the fact that only eleven members attended the session last night the Council could not vote on the matter of appropriating \$100,000 for the grading of Fourth Street, in South Richmond, leading to the boiler plant. The council committee in charge of the matter is transferring to the heads of departments certain executive and administrative matters, and the committee is read from the Finance Committee, in which there was a recommendation for an increase in the salary of Police Justice Crutchfield. The recommendation was taken from the justice asking that the salary of his clerk be brought up to the standard of the clerks of other courts.

ALLEGED BOOTLEGGERS ESCAPE FROM OFFICERS

Six Men Seized at Yorktown Flew From Sheriff and Prohibition Agent.

FOUR NEGROES AND TWO WHITE

Commissioner Peters Keeping Close Watch on Channels by Which Liquors Are Being Transported. Has Tip Three Cars En Route.

Dr. J. Sydney Peters received a report yesterday from a prohibition inspector in Yorktown stating that six bootleggers apprehended by him and a deputy sheriff had made their escape from the officers, after putting up a sensational fight.

According to the report, received by long distance telephone, the prohibition inspector was working with the deputy at a steamboat landing, when six men—four negroes and two white men—names unknown to the officers, walked by with satchels loaded with whisky. They were placed under arrest at once. Each officer seized three of them. Suddenly the three men in the charge of the deputy knocked him down and ran. The other three men, who were in the charge of the prohibition inspector, found it necessary to go to his aid. When he turned his back on the three men in his custody, all six of the bootleggers took to their heels and made good their escape. None of them were captured.

Peters Hears Whisky En Route.

Wednesday night prohibition headquarters in Richmond received word that a notorious bootlegger had left Baltimore for Richmond with three automobiles loaded with whisky, and was expected to pass by Ashland late Wednesday night. Prohibition inspectors in automobiles went down the road and ambuscaded for the whisky-laden cars. An automobile driver, thought to be from Richmond, passed the officers, and evidently recognizing them, stopped his car and informed them that if he met any bootleggers ahead on the road he meant to warn them of their danger.

Believes Transporters Warned.

He evidently fulfilled his promise, Dr. Peters asserts, as none of the whisky arrived. It is said by the prohibition men, however, that the three automobiles have not reached Richmond, and that a sharp lookout will be kept that they do not slip in without being apprehended. Dr. Peters asserted yesterday that he had men covering all the roads from Washington and all steamboat lines into Yorktown, and that he intended to keep these lines of travel closed to bootleggers until after July 1.
