

Day With the Bankers, the Merchants and the Brokers.

Small Grain Moves Up Two Cents

Inability to Secure Wheat for Grinding Main Cause for Advance in Grain Market.

CHICAGO, Oct. 14.—Inability of domestic flour mills to secure wheat suitable for grinding was the main cause of an advance of over two cents a bushel in the price of wheat options today. A big shortage in the French crop added to the feeling of buoyancy. At the close of the day, wheat was up 2½c. May closed at 1.13½, and December at 1.12½. The strength was weak, but the advance was a net gain of 1½c. Provisions are 7½ to 12½c.

Throughout the latter part of the season wheat shorts were urgent buyers, the December option being the greatest favorite. Prices advanced rapidly until December sold at 1.12½. May rallied to 1.13½. The strength was weak, but the advance was a net gain of 1½c. Provisions are 7½ to 12½c.

The governing factor in the oats market was the action of wheat and corn. Trading was rather light, but the heavy movement and to the accumulation of stocks. After opening 5½c lower, oats rallied to 1.13½, and closed at 1.13½. Local receipts were 65 cars. The leading factor in the hog market. At the close January pork was up 1½c at 12.75. Lard and ribs were 7½c lower at 17.75 and 8.25 respectively.

RANGE OF THE LEADING FUTURES.
