ALL RECORDS ARE BROKEN BY MINES

Was Greater Than History Has to Show.

COAL SHOWS BIG GAIN

Phenomenal Increase Noted in the Production of Primary Spelter.

mineral output of the United States 1912, according to the specialists of the United States geological survey. The figures of coat production are the est sensational, all previous records baving been surpassed by about 50,000,000 tons, an increase equal to the total production of the country forty years ago. The production for 1911 was 496,221,168 short tons; the estimate for 1912 is 550,-090,000 tons, and the final figures may even reach a still higher mark.

Copper Output Large.

The production of copper was also the largest in the history of the industry, the high-water mark reached in 1911 being statistics and estimates received by the survey, the output of blister and Lake opper was 1,249,000,000 pounds in 1913, ompared with 1,097,202,749 pounds in 1911, the respective values being nearly \$200,000,000 and \$127,154,092. The profuction of refined copper is estimated at 1,569,000,000 pounds in 1912, compared

Iron and Petroleum.

The production of iron ore in 1912 was, according to survey estimates, from 25 to 22 per cont greator than that of 1911, the figures for 1912 being between 54,500,000 and 57,500,000 long tons, against \$5,500,652 tons in 1911. It is believed possible that the record figure of 56,889,734 tons produced in 1910 may be exceeded by the 1912 output.

The United States continued to lead the world in petroleum production in 1912—in fact, produced more than all the rest of the world—and is estimated to have maintained the tremendous record of 220,440,391 barrels made in 1911. The geological survey's estimate for 1912 is 220,220,900 barrels. The cstimated value of the 1912 output, however, is much greater than that of 1911, the figures being \$150,000,000, against \$131,144,152.

OPOHONGO DIVIDEND POSTED WEDNESDAY

The directors of the Openongo com-pany on Wednesday declared a dividend of I cent a share, which will be paid on January 36, the books closing on Janu-ary 25. This calls for the payment of

SSSS 78.

Such favorable action on the part of the directors was unexpected by the public, for the stock of recent weeks has been one of the weak features of the local exchange, despite the good dividend record of the company. Many reports have been current to account for this weakness, one being that the reserves were being depicted faster than developed.

oped.

It was stated authoritatively yesterday that the Opohongo was in better condition than is generally appreciated, and that while the ore reserves are not as large as they were, production is being maintained steadily, there is a good amount of ore known to be ready for the market, while the opportunity of developing a new tonnage is considered excellent.

AVERAGE PRICE OF METALS HUNG HIGH

the Best for Producers in Many Years.

It is a happy coincidence that while A meeting which is being watched the United States was breaking all preshared generously, while the cost of pro-duction, especially copper, has never been Large figures, some of them clean try as it was in 1912. The producers, record-breakers, have been attained in therefore, found the world auxious fo its metals, willing to pay a premium for

therefore, found the world auxious for its metals, willing to pay a premium for the same, while the cost of production in part at least was the lowest evergained.

Copper in 1912 averaged 16.241 cents per pound, against 12.356 cents in 1913 and 12.738 cents in 1919.

Silver in 1912 averaged 69.835 cents per ounce, against 52.394 cents in 1911 and 3.486 cents in 1910.

Zine in 1912 averaged 69.835 cents per pound (St. Louis prices), against 5.668 cents in 1911 and 5.750 cents in 1919.

Lead was somewhnt of a disappointment to the west, averaging in September and October of list year better than 5 cents a pound for the first time in several years, but failing back again when it became evident that the tariff was to be disturbed by the new administration. Lead in 1912 averaged 4.471 cents per pound, against 4.62 cents in 1911 and 4.466 cents in 1910.

These wide spreads in the value of the metals were responsible for the fact that, while the Utah metal production was not materially increased in extent the value was materially raised, giving the state the greatest production value in its long and henorable history.

COPPER SALES ARE GOING TO APPEAR

duction of refined copper is estimated at 1.569,000,000 points in 1912. Compared with 1.428.56,059 pounds in 1912. The production in Arizon may have exceeded 3.50,000,000 points in 1912 and the production in the confidence of the production was valued at \$15,550,000. The lotal value of Alaska's indirectly of the cold production research of \$1.00,000 on mark.

Silver and Lead.

Silver and Lead.

In silver production in the United States in 1912 the indications are for a possible output of \$4,560,000. The cold was estimated at \$5,500,000 on a seale down from these flaures. Local coppers were into the cold production was valued at \$15,550,000. The lotal value of Alaska's indirectly production was valued at \$15,550,000. The lotal value of Alaska's indirectly production was valued at \$15,550,000. The lotal value of Alaska's indirectly production was valued at \$15,550,000. The lotal value of Alaska's indirectly production was valued at \$15,550,000. The lotal value of Alaska's indirectly production. The average price of the lotal value of Alaska's indirectly production. The average price of the lotal value of the production. The average price of the lotal value of the production. The average price of the lotal value of the lotal

Daly West Annual. Notices have been received announcing the Daly West annual meeting, to be held in Denver on February 17.

This is the tobacco that put the "smoothness" in pipe smoking!

DEXTER WHITE CAPS HARD PROBLEM FOR IN A MERGER DEAL

Mineral Output Last Year Past Twelve Months Were Proposition Will Be Submitted Reduction in Copper Price to Shareholders Later in

the Month.

vious records, for amount of mineral pro- pair on January 29, is that of the Dexter duction in 1912 the average price of all White Caps company of Manhattan, for the metals, with the sole exception of at this session a proposition will be subead, showed a splendid improvement over mitted to the shareholders for consoliprevous years. The improvement in sil- dating their proposition with others of ver, copper and zine were especially the Manhattan district. It is necessary marked, in which the Utah producer that 75 per cent of the Dexter stock be

CHINO SHOVELS WERE ON LOW GRADE ORE

The east explains the decrease in the December copper production of the Chino company as due to the fact that the steam shovels were located on lower-grade ore than usual, the output for the month being 3.545,104 pounds, a decrease of about 509.000 pounds over November. The December formage treated was at the rate of 1259 tons dally per unit, or a total of 5000 tons dally, four units having been kept in commission.

TINTIC STOCKS ARE LEADERS ON EXCHANGE

The Tintic issues retain their leader-ship on the local mining share market, fron Blossom, Colorado, Gold Chain, Opo-hongo, May Day and one or two others being in demand without any changes of oeing in demand without any changes of material moment in market value. The sales for the day reached a total of 24,-025 shares of stock, the market value of which was \$11,236.50.

Problem of Future.

But producing interests refuse to make price concessions on the theory that such steps would not stimulate consumption. The collapse of the copper pool of 1901 however, was accompanied by sales of something like 200,000,000 nounds of the metal, and that of the 1907 pool by approximately 120,000,000, nounds of copper by one of the largest agencies. In both instances the price had been held up the opes that consumers would be forced to buy but the latter were able to get along with much smaller supplies than the producers were obliged to cut prices and lighten ship.

CONDITION OF BUTTE AND ELY TERRITORY

In a review of Fly conditions in the Expositor, E. W. Hulse has the following to say in regard to the Butto & Ely company:

"Company is capitalized for 500,000 shares, par value \$5, all issued. Control held by Giron. The property has been well developed and by churn drilling there is known to exist a large body of sulphide ore, the same as the Liberty is plit of the Nevada Consolidated, and the Nevada Consolidated has made arrangements to buy this ore from the Eutte & Ely. They will take this out along with their own ore from the same pit, as it is simply an extension of the Liberty ore body.

ore body.

"The company has \$240,000 cash on hand, but inasmuch as the Giroux owns control of the stock, traders have felt as though it would be fully taken over in the course of time. Therefore, it has not been a very active trader. Present Price is 75 cents. High for 1912, \$1.25; low, 50 cents.

The Mining and Englisher World of Chicago editorially has trollowing to say in its January 11 tag.

"You admit by what it have told me that you know nothing of the conditions in the mining ste, that you know nothing of minings and that you have never tried a sing case. I have asked you if you be the meaning of a half dozen termined in mining and you say you doot. Dozen't that prove your incompeter."

The above excerpt from Washington press dispatch appearing 1 recent issue of a Chicago morning press dispatch appearing 1 recent issue of a Chicago morning press dispatch appearing 1 recent issue of a Chicago morning press dispatch the Interior Wate L. Fisher and an Arizona United lites senator. The interview was bross should by the senator's protest over a recent ruling of the secretary that there could be no prospecting for value minerals as practiced for more that quarter of a century, that the minerals allow the surface and at sink any shafts.
